Cybernetics and the Constructed Environment Zihao Zhang, 2024-07-25 Grounded in contemporary landscape architecture theory and practice *Cybernetics and the Constructed Environment* blends examples from art design and engineering with concepts from cybernetics and posthumanism offering a transdisciplinary examination of the ramifications of cybernetics on the constructed environment Cybernetics or the study of communication and control in animals and machines has grown increasingly relevant nearly 80 years after its inception Cyber physical systems sensing networks and spatial computing algorithms and intelligent machines create endless feedback loops with human and non human actors co-producing a cybernetic environment Yet when an ecosystem is meticulously managed by intelligent machines can we still call it wild nature Posthumanism ideas such as new materialism actor network theory and object oriented ontology have become increasingly popular among design disciplines including landscape architecture and may have provided transformative frameworks to understand this entangled reality However design still entails a sense of intentionality and an urge to control How do we then address the tension between the designer's intentionality and the co-produced reality of more than human agents in the cybernetic environment Is posthumanism enough to develop a framework to think beyond our all too human ways of thinking For researchers scholars practitioners and students in environmental design and engineering disciplines this book maps out a paradigm of environmentalism and ecological design rooted in non communication and uncontrollability and puts a speculative turn on cybernetics Chapters 8 and 9 of this book are freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license

Our Biggest Fight Frank H. McCourt, Jr., 2024-03-12 NATIONAL BESTSELLER The internet as we know it is broken Here's how we can seize back control of our lives from the corporate algorithms and create a better internet before it's too late In the spirit of Thomas Paine's Revolution era *Common Sense* this manifesto challenges us to create new digital architectures to safeguard democracy Walter Isaacson 1 New York Times bestselling author of *Elon Musk* It was once a utopian dream But today's internet despite its conveniences and connectivity is the primary cause of a pervasive unease that has taken hold in the U.S. and other democratic societies It's why youth suicide rates are rising why politics has become toxic and why our most important institutions are faltering Information is the lifeblood of any society and our current system for distributing it is corrupted at its heart Everything comes down to our ability to communicate openly and trustfully with each other But thanks to the dominant digital platforms and the ways they distort human behavior we have lost that ability while at the same time we've been robbed of the data that is rightfully ours The roots of this crisis argue Frank McCourt and Michael Casey lie in

the prevailing order of the internet In plain but forceful language the authors a civic entrepreneur and an acclaimed journalist show how a centralized system controlled by a small group of for profit entities has set this catastrophe in motion and eroded our personhood And then they describe a groundbreaking solution to reclaim it rather than superficial patchwork regulations we must reimagine the very architecture of the internet The resulting third generation internet would replace the status quo with a new model marked by digital property rights autonomy and ownership Inspired by historical calls to action like Thomas Paine s Common Sense Our Biggest Fight argues that we must act now to embed the core values of a free democratic society in the internet of tomorrow Do it right and we will finally properly unlock its immense potential

Artificial Whiteness Yarden Katz, 2020-11-17 Dramatic statements about the promise and peril of artificial intelligence for humanity abound as an industry of experts claims that AI is poised to reshape nearly every sphere of life Who profits from the idea that the age of AI has arrived Why do ideas of AI's transformative potential keep reappearing in social and political discourse and how are they linked to broader political agendas Yarden Katz reveals the ideology embedded in the concept of artificial intelligence contending that it both serves and mimics the logic of white supremacy He demonstrates that understandings of AI as a field and a technology have shifted dramatically over time based on the needs of its funders and the professional class that formed around it From its origins in the Cold War military industrial complex through its present day Silicon Valley proselytizers and eager policy analysts AI has never been simply a technical project enabled by larger data and better computing Drawing on intimate familiarity with the field and its practices Katz instead asks us to see how AI reinforces models of knowledge that assume white male superiority and an imperialist worldview Only by seeing the connection between artificial intelligence and whiteness can we prioritize alternatives to the conception of AI as an all encompassing technological force Bringing together theories of whiteness and race in the humanities and social sciences with a deep understanding of the history and practice of science and computing *Artificial Whiteness* is an incisive urgent critique of the uses of AI as a political tool to uphold social hierarchies
