Handbook of Research on Artificial Intelligence Applications in the Aviation and Aerospace Industries Shmelova, Tetiana, Sikirda, Yuliya, Sterenharz, Arnold, 2019-10-11 With the emergence of smart technology and automated systems in today's world artificial intelligence AI is being incorporated into an array of professions The aviation and aerospace industry specifically is a field that has seen the successful implementation of early stages of automation in daily flight operations through flight management systems and autopilot However the effectiveness of aviation systems and the provision of flight safety still depend primarily upon the reliability of aviation specialists and human decision making The Handbook of Research on Artificial Intelligence Applications in the Aviation and Aerospace Industries is a pivotal reference source that explores best practices for AI implementation in aviation to enhance security and the ability to learn improve and predict While highlighting topics such as computer aided design automated systems and human factors this publication explores the enhancement of global aviation security as well as the methods of modern information systems in the aeronautics industry This book is ideally designed for pilots scientists engineers aviation operators air crash investigators teachers academicians researchers and students seeking current research on the application of AI in the field of aviation *Understanding the Airport's Role in Performance-based Navigation* Sebastian D. Timar, Robb Varani, Robert Hemm, Brian Townsend, Mark Ricketson, Wayne MacKenzie, William J. Dunlay, Grafton Technologies, Inc, 2016 TRB's Airport Cooperative Research Program ACRP Report 150 NextGen for Airports Volume I Understanding the Airport's Role in Performance Based Navigation Resource Guide the first report in this series provides comprehensive information to practitioners concerning all aspects of Performance Based Navigation PBN and how implementation affects overall airport operations This Resource Guide encompasses background information description of effects on short and long term airport development impacts on safety and performance measures and other critical factors affecting future airport operations In addition to providing guidance to users on available resources for additional assistance this volume also includes lessons learned and best practices based on findings from case studies that examined the airport operator's role in PBN implementation The Next Generation Air Transportation System NextGen refers to the federal programs predominately airspace air traffic or avionics related that are designed to modernize the National Airspace System NAS ACRP's NextGen initiative aims to inform airport operators about some of these programs and how the enabling practices data and technologies resulting from them will affect airports and change how they operate Publisher China Satellite Navigation Conference (CSNC) 2018 Proceedings Jiadong Sun, Changfeng Yang, Shuren Guo, 2018-05-03 These proceedings present selected research papers from CSNC 2018 held during 23rd-25th May in Harbin China The theme of CSNC 2018 is Location Time of Augmentation These papers discuss the technologies and applications of the Global Navigation Satellite System GNSS and the latest progress made in the China BeiDou System BDS especially They are divided into 12 topics to match the corresponding sessions in CSNC 2018 which

broadly covered key topics in GNSS Readers can learn about the BDS and keep abreast of the latest advances in GNSS techniques and applications Civil Liability for Damage Caused by Global Navigation Satellite System Dejian Kong, 2019-05-24 It has come to pass that national security economic growth and transportation safety not to mention such infrastructure as banking and electricity are severely dependent on the positioning information navigation capabilities and time dissemination provided by Global Navigation Satellite System GNSS However GNSS is not risk free The more humanity depends on GNSS the more risks it has to face It is irresponsible to wait for an accident to happen merely to justify the need for an appropriate GNSS civil liability regime This hugely important book examines the structure of such a regime in unprecedented depth and proposes a uniform governance structure composed of an institutional framework and a legal system for GNSS with safety of life signals at its core Exploring whether the current international law including air law and space law conventions is adequate to deal with the issue of civil liability in the context of GNSS the author confronts and responds to such crucial issues as the following ensuring that parties suffering damage caused by GNSS get fair prompt and adequate compensation balancing the interests of the GNSS industry in order for it to maintain its sustainable development identifying legal gaps arising in the GNSS context and how we should move forward determining which parts of the value chain of GNSS may qualify as origins of damage and construing GNSS civil liability mainly from contractual product and general tort liability perspectives The author assesses various solutions for GNSS civil liability based on their feasibility including an institutional defence against the doctrine of sovereign immunity and recommendations on how several international organisations can work together in this endeavour He examines scholarships travaux pr paratoires conference documents and treaties as well as national legislation A hypothetical case where damage is caused by GNSS is elaborated illustrating each legal relationship and causal link In its committed urging of GNSS signal providers to improve the stability of the satellite navigation systems and its insightful recommendations on how to promote public safety this book offers a roadmap indicating a truly viable international regime of GNSS civil liability Relevant international organisations and States as well as practitioners are sure to respond positively to its unique and important analysis **Risk, Reliability and Safety: Innovating Theory and Practice** Lesley Walls, Matthew Revie, Tim Bedford, 2016-11-25 The safe and reliable performance of many systems with which we interact daily has been achieved through the analysis and management of risk From complex infrastructures to consumer durables from engineering systems and technologies used in transportation health energy chemical oil gas aerospace maritime defence and other sectors the management of risk during design manufacture operation and decommissioning is vital Methods and models to support risk informed decision making are well established but are continually challenged by technology innovations increasing interdependencies and changes in societal expectations Risk Reliability and Safety contains papers describing innovations in theory and practice contributed to the scientific programme of the European Safety and Reliability conference ESREL 2016 held at the University of Strathclyde in Glasgow Scotland 25

29 September 2016 Authors include scientists academics practitioners regulators and other key individuals with expertise and experience relevant to specific areas Papers include domain specific applications as well as general modelling methods Papers cover evaluation of contemporary solutions exploration of future challenges and exposition of concepts methods and processes Topics include human factors occupational health and safety dynamic and systems reliability modelling maintenance optimisation uncertainty analysis resilience assessment risk and crisis management

Global Navigation Satellite System (GNSS) Manual, 2013 *Proceedings of the 2nd International Workshop on Advances in Civil Aviation Systems Development* Ivan Ostroumov, Maksym Zaliskyi, 2024-05-14 This book includes high quality research papers presented at 2nd International Workshop on Advances in Civil Aviation Systems Development ACASD 2024 which was at National Aviation University Kyiv Ukraine on March 26 2024 This book presents original results of a scholarly study of unique research teams and market leaders on the development in civil aviation systems and its application The book topics include major research areas focused on advances in air traffic management data processing in civil aviation automatic control in civil aviation systems modern trends in navigation systems development methods of operational efficiency improvement human factor and application of artificial intelligence in civil aviation systems This book is useful for scholars and professionals in the civil aviation domain

Cognitive Infocommunications, Theory and Applications Ryszard Klempous, Jan Nikodem, Péter Zoltán Baranyi, 2018-08-25 The book gathers the chapters of Cognitive InfoCommunication research relevant to a variety of application areas including data visualization emotion expression brain computer interfaces or speech technologies It provides an overview of the kind of cognitive capabilities that are being analyzed and developed Based on this common ground it may become possible to see new opportunities for synergy among disciplines that were heretofore viewed as being separate Cognitive InfoCommunication begins by modeling human cognitive states and aptitudes in order to better understand what the user of a system is capable of comprehending and doing The patterns of exploration and the specific tools that are described can certainly be of interest and of great relevance for all researchers who focus on modeling human states and aptitudes This innovative research area provides answers to the latest challenges in influence of cognitive states and aptitudes in order to facilitate learning or generally improve performance in certain cognitive tasks such as decision making Some capabilities are purely human while others are purely artificial but in general this distinction is rarely clear cut Therefore when discussing new human cognitive capabilities the technological background which makes them possible cannot be neglected and indeed often plays a central role This book highlights the synergy between various fields that are perfectly fit under the umbrella of CogInfoCom and contribute to understanding and developing new human artificial intelligence hybrid capabilities These merged capabilities are currently appearing and the importance of the role they play in everyday life are unique to the cognitive entity generation that is currently growing up
