U.S. Destroyer Norman Friedman, 1985

U.S. Amphibious Ships and Craft Norman Friedman, 2002

In this latest addition to his acclaimed U S warship design history series Norman Friedman describes the ships and the craft of the U S amphibious force from its inception in the 1920s through World War II to the present He explains how and why the United States successfully created an entirely new kind of fleet to fight and win such World War II battles as D Day and the island landings in the Pacific To an extent not previously documented his book lays out the differing views and contributions of the U S Army Navy and Marines as well as the British and how they affected the development of prewar and wartime amphibious forces Current and future amphibious forces and tactics are explained together with their implications for ships and craft from 40 000 ton amphibious carriers down to tracked amphibious vehicles As in earlier volumes in the series this study uses previously unpublished sources to illustrate not only what was actually built but what was planned and never brought into service For example the book offers the first comprehensive and fully illustrated account of abortive attempts in the 1960s and beyond to build new fire support ships LFS With nearly two hundred photographs and specially commissioned line drawings and extensive appendixes the work conveniently brings together details of the ships and their service histories found elsewhere only in scattered official references

lavishly illustrated with colorized photos *Battleships* Stanley Sandler, 2004-12 From ancient times to World War II and the postwar period *Battleships* charts the evolution of the vessel that ruled the seas a vessel that until the arrival of the aircraft carrier would be the most expensive and complex human made moving object in history *Battleships* charts the dramatic evolution of this dominating war vessel Coverage ranges from ancient galleys to the great ships of World War II to the present with special emphasis on the ironclad era of the mid 19th century which saw the greatest innovation over the shortest timespan in naval history and the great 20th century battleship race of the dreadnought era Written by expert military historian Stanley Sandler *Battleships* provides insightful examinations of the technological and tactical aspects of important warships from around the world and across time It also looks at the political and social factors driving the decision to produce battleships in different countries No other volume has ever captured so completely the impact of the battleship as a weapon of war and a symbol of power *Battleships* William H. Garzke, Robert O. Dulin, 1995 Part of a three volume set on the world's battleships this book provides a comprehensive history of all U S Navy battleships and battlecruisers built designed or projected built since the early 1930s It covers their design and construction operational careers and eventual disposition Complete plans are presented for many classes as well as extensive technical data covering their characteristics and performance information that is sometimes hard to find and often contradictory The operational careers of the ships are chronicled in detail Incidents that challenged a ship's design adequacy particularly from the standpoint of damage resistance are discussed Originally published in 1976 with the subtitle U S Battleships in World War II the book has undergone significant revision Not only has it been brought up to date with the addition of a new chapter covering the Iowa class reactivation through 1992 but the book now includes revelations uncovered in newly accessible material The authors offer a complete description and analysis of the tragic turret explosion aboard the USS Iowa in April 1989 with conclusions that differ from those widely reported by the media and from those officially presented by the Navy In an appendix they bring to light for the first time the full extent of President Franklin D Roosevelt's involvement in the shaping of the U S fleet and credit him with influencing the design construction and deployment of battleships and battlecruisers built during his administration For example they cite Roosevelt as the individual responsible for the speed and endurance of the Alaska class battleships and the design and construction of the Alaska class battlecruisers and for controlling the number general characteristics gunnery and anti aircraft armament of other classes as well In addition this massive work now offers information about the secret development of accurate long range major caliber gunfire control in the period before World War II the proposed conversion of the Iowa and Alaska ships to aircraft carriers and the twin skeg problems encountered by battleships Ship histories have been updated to include details about the service of the four reactivated Iowa battleships and their recent retirements BOOK JACKET Title Summary field provided by Blackwell North America Inc All Rights Reserved *American Battleships* Max R.
