The Power of the God Who Can't Russ Dean, 2023-10-31 In a world that values power above all else we need to rethink God It's not just better athletes and bigger engines but weapons of mass destruction assault rifles lethal drugs Our obsession with stronger faster more and bigger everything is killing us and at the top of this power pyramid an all powerful God validates it all For those who want a theology justifying the power game in all its forms omnipotence is the perfect pretext but for a growing segment of our modern scientific world the notion of an all controlling deity sounds increasingly superstitious tribalistic People of faith must do better Our world needs a God whose nature is love not all controlling power That God the God who can't is even more powerful The survival of the world even the future of God may depend on us learning to say God always does everything God can do

Varieties of Understanding Stephen Robert Grimm, 2019 What does it mean to understand something What is the essence of understanding when compared across multiple domains Varieties of Understanding offers new and original work on the nature of understanding raising questions about what understanding looks like from different perspectives and exploring how ordinary people use the notion of understanding According to a long historical tradition understanding comes in different varieties In particular it is said that understanding people has a different epistemic profile than understanding the natural world that it calls on different cognitive resources and brings to bear distinctive normative considerations Thus in order to understand people we might need to appreciate or in some way sympathetically reconstruct the reasons that led a person to act in a certain way By comparison when it comes to understanding natural events like earthquakes or eclipses no appreciation of reasons or acts of sympathetic reconstruction is arguably needed mainly because there are no reasons on the scene to even be appreciated and no perspectives to be sympathetically pieced together This volume brings together some of the world's leading philosophers psychologists and theologians in order to shed light on the various ways in which we understand the world pushing debates on this issue to new levels of sophistication and insight
