Mann, 2011-09-15 Two hundred million years ago the earth consisted of a single vast continent Pangea surrounded by a great planetary sea Continental drift tore apart Pangea and for millennia the hemispheres were separate evolving almost entirely different suites of plants and animals

Columbus's arrival in the Americas brought together these long separate worlds. Many historians believe that this collision of ecosystems and cultures, the Columbian Exchange, was the most consequential event in human history since the Neolithic Revolution. And it was the most consequential event in biological history since the extinction of the dinosaurs. Beginning with the world of microbes and moving up the species ladder to mankind, Mann rivetingly describes the profound effect this exchanging of species had on the culture of both continents.

I, Columbus Peter Roop, Connie Roop, 2015-05-05 A Notable Social Studies Trade Book for Young People A firsthand account of Christopher Columbus's famous voyage to the East taken directly from his journal entries. Christopher Columbus had a dream to reach the fabled lands of the East rich with spices, jewels, silver, and especially gold. Having studied the travels of other explorers, Columbus was convinced he could reach his destination by traveling west across the seas. After convincing Queen Isabella and King Ferdinand to fund his expedition, he set sail in August of 1492. In this account, the voyage Columbus undertook is told in his own voice through his journal entries of that year. He tells of excitement, drama, and terror on the high seas, as well as the doubts he faces from his own crew as together they weather the path to victory.

I, Columbus Christopher Columbus, Peter Roop, 1991 Follows the first voyage of discovery made by Christopher Columbus through excerpts from the journal he kept. *The Diario of Christopher Columbus's First Voyage to America, 1492-1493*, 1989 This definitive edition of Columbus's account of the voyage presents the most accurate printed version of his journal available to date. Unfortunately, both Columbus's original manuscript presented to Ferdinand and Isabella, along with other evidence of his discoveries, and a single complete copy have been lost for centuries. The primary surviving record of the voyage, part quotation, part summary of the complete copy, is a transcription made by Bartolome de las Casas in the 1530s. This new edition of the Las Casas manuscript presents its entire contents, including notes, insertions, and canceled text, more accurately, completely, and graphically than any other Spanish text published so far. In addition, the new translation, which strives for readability and accuracy, appears on pages facing the Spanish, encouraging on-the-spot comparisons of the translation with the original. Study of the work is further facilitated by extensive notes documenting differences between the editor's transcription and translation and those of other transcribers and translators, and summarizing current research and debates on unanswered questions concerning the voyage. In addition to being the only edition in which Spanish and English are presented side by side, this edition includes the only concordance ever prepared for the *Diario*. Awaited by scholars, this new edition will help reduce the guesswork that has long plagued the study of Columbus's voyage. It may shed light on a number of issues related to Columbus's navigational methods and the identity of his landing places, issues whose resolution depend at least in part on an accurate transcription of the *Diario*. Containing day-by-day accounts of the voyage and the first sighting of land, the first encounters with the native populations, and the first appraisals of his islands explored, and of a suspenseful return voyage to Spain, the *Diario* provides a fascinating and useful account to historians, geographers, anthropologists, sailors, students, and

anyone else interested in the discovery or in a very good sea story Oliver Dunn received the PH D degree from Cornell University He is Professor Emeritus in Purdue University and a longtime student of Spanish and early history of Spanish America James E Kelley Jr received the M A degree from American University A mathematician and computer and management consultant by vocation for the past twenty years he has studied the history of European cartography and navigation in late medieval times Both are members of the Society for the History of Discoveries and have written extensively on the history of navigation and on Columbus s first voyage Although they remain unconvinced of its conclusions both were consultants to the National geographic Society s 1986 effort to establish Samana Cay as the site of Columbus s first landing
