Cybersecurity Obligations for Attorneys Brian E. Finch, 2023

Should Cybersecurity Be a Human Right? Exploring the 'Shared Responsibility' of Cyber Peace Scott Shackelford, 2019 Having access to the internet is increasingly considered to be an emerging human right International

organizations and national governments have begun to formally recognize its importance to freedom of speech expression and information exchange The next step to help ensure some measure of cyber peace online may be for cybersecurity to be recognized as a human right too This Article investigates the nuances of this debate and analyzes the implications of such a designation through the lens of the Corporate Social Responsibility CSR movement How the European Court of Justice Case "right to be forgotten" can be relevant for cybersecurity Antonio Boscarino, 2018-07-24 Research Paper undergraduate from the year 2018 in the subject Law European and International Law Intellectual Properties grade 5 5 Tallinn University TT Tallinn University Of Technology course Cybersecurity Law language English abstract The Internet is overwhelmed by personal data that are massively collected and traded and it is quite common in our everyday life to hear news concerning cyber attacks or generally cyber threats that increasingly have the purpose of violating users data Moreover States on an international level have shown serious difficulties in creating binding treaties to protect efficiently the data subjects as some recent scandals proved In fact with the growing importance and involvement of personal data it will be difficult to think at all the authorities to prevent or to countercheck efficiently the future cyber threats and so I would like to show in the following chapters how the right to be forgotten might become the crucial factor with which individuals can protect themselves and their rights Furthermore I will try to analyze the right to be forgotten and its relevancy for cybersecurity within three fundamental aspects Firstly how EU citizens may use appropriately the right to be forgotten to prevent the harmfulness of cyber attacks secondly which are the limits of this right in order not be itself prejudicial for cyber security eventually the tensions among citizens governments and enterprises in ensuring protection and security The right to be forgotten has been analyzed by the European Court of Justice in Google Spain Case taking as a reference point the directive 95 46 In the judges opinion Google and the other search engines must be considered as the controllers and they have the duty to erase those data that have not any more a public interest that justifies them and if there is an order laid down by a judge In this research I am taking into account some issues of Italian National Law that can be useful to extend the reasonings analogically to other Countries Furthermore to analyze the digital education of the data subjects I am taking as an example Singapore

Global Cybercrime and Cybersecurity Laws and Regulations: Shahid M. Shahidullah,2022 The global Internet and cyberspace age witness a new generation of cybercriminals hackers cybergangs cyber terrorists and cyber sexual harassers This phenomenon broadly defined as cybercrimes is the focus of this book The International Telecommunication Union s Global Cyber Security Index found that about 90 percent of the world s countries have enacted laws and regulations to control and combat cybercrime This book has examined some of those cyber laws and regulations in 12 countries including the United States United Kingdom Canada China Russia Japan Singapore Nigeria South Africa India Pakistan and Bangladesh Different chapters of this book have found some common themes First in most of the countries of the world there is an advancing process of legally criminalizing cybercrimes including such behaviors as unauthorized access use and interception damage and deletion of computer data damage and destruction of computer networks and dissemination and transportation of illegally obtained computer data Second there is high sensitivity in all countries studied about the security of the information infrastructure and their critical economic political and social infrastructures such as power plants chemical industries aviation systems and electoral systems Third all forms of cybercrime committed by using the computer and the Internet are also defined as fraud and forgery identity theft cyber espionage sexual harassment cyber sexual extortion online child pornography and revenge pornography One of the more critical themes that emerged is that no country defines cybersecurity as just a technical matter a matter only of coding and decoding and encryption and decryption Cybersecurity is also broadly perceived as a legal political organizational and educational issue It is perceived as a matter to be dealt with by a government in cooperation with international partners potentially barring China and Russia One of the other themes that emerged as a genuine concern is the rapid escalation of cyber sexual violence against women and minors In most countries examined in this book the policymakers and law enforcement believe that social media is partly responsible for increasing cyber sexual violence

The Human Factor in Cybercrime and Cybersecurity E. Rutger Leukfeldt,2017 With the digitization of society crime has

also digitized Digitization has consequences for the entire spectrum of crime and raises all sorts of questions For example are we dealing with a new type of offender or with the same old offenders who simply moved their activities online How can potential victims be made resilient against attacks And who should protect potential victims the police commercial cybersecurity companies or internet service providers To date many of these questions remain unanswered This is partly because current studies have a strong focus on technology or are exploratory in nature suffer from methodological limitations and focus on just a few of the many types of cybercrime The aim of this research agenda is to stimulate research on the human factor in cybercrime and cybersecurity The agenda provides the state of the art of research on the role of the human factor in this field In addition examples are given of important research questions and innovative methods and datasets that are needed for future studies
