Cardiovascular and metabolic issues in the treatment of schizophrenia: focus on the management of negative symptoms

P. Falkai

Psychiatry, University of Munich, Munich, Germany
doi: 10.1192/j.eurpsy.2024.74

Abstract: Mortality from cardiovascular disease is increased in people with mental health disorders in general and schizophrenia in particular. The causes are multifactorial, but it is known that antipsychotic medication can cause cardiac side-effects beyond the traditional coronary risk factors. Schizophrenia itself is a contributor to an increased risk of cardiovascular mortality via cardiac autonomic dysfunction and a higher prevalence of metabolic syndrome, both contributing to a reduced life expectancy. Overall, management of cardiovascular risk within this population group must be multifaceted and nuanced to allow the most effective treatment of serious mental illness to be conducted within acceptable parameters of cardiovascular risk; some practical measures are presented for the clinical cardiologist.

Abstract: Negative symptoms of schizophrenia are linked with poor functioning and quality of life. Therefore, appropriate measurement tools to assess negative symptoms are needed. The NIMH-MATRICS Consensus defined five domains for negative symptoms. We used the COSMIN guidelines for systematic reviews to evaluate the quality of psychometric data of negative symptom scales as Clinician-Rated Outcome Measure (ClinROM). COSMIN assesses risk of bias, so-called updated criteria of measurement properties, a modified GRADE approach and a final judgement on the rating scale. In the lecture the process will be described using the Brief Negative Symptom Scale and the Clinical Assessment Interview for Negative Symptoms (CAINS) as examples.

Digital treatments for affective disorders: an integrated overview

U. Volpe

Department of Clinical Neurosciences/DIMESC, Università Politecnica delle Marche, Ancona, Italy

doi: 10.1192/j.eurpsy.2024.76

Abstract: Affective disorders represent a category of psychiatric syndromes with high prevalence and associated disability. While effective, both pharmacological and psychosocial, treatments are available for depression and bipolar disorder, the many therapeutic needs of affected patients are far from being properly addressed under routine conditions. Along the past decade, several digital treatments, tools and approaches have been developed and tested in clinical settings, showing an highly promising potential to fill the treatment gap of affective psychopathology. In more detail, reviewed here will be telepsychiatry solutions for affective disorders, also encompassing the available officially approved digital therapies for major depression and bipolar disorder. Furthermore, the impact of artificial intelligence, serious gaming, social media and virtual/augmented reality in the treatment of mood disorders will be also discussed, in the light of the most recent research evidence on these topics.

Abstract

Introduction: The final aim of the EXPERIENCE project is to enable individuals to record and share extended personal realities in Virtual Reality (VR) - which entails the consideration of a person's neuro-physiological, psychological, and cognitive states. One prospective application is using this technology to aid in assessing symptoms of affective disorders.

Objectives: The objective is to test the ability of a pre-designed VR environment to differentiate between individuals with depressive symptoms and healthy controls (HCs) via machine learning algorithms.

Methods: Conducted as a pilot study in Italy, we recruited 100 volunteers, comprising 50 HCs and 50 individuals with moderate depressive symptoms assessed via the PHQ-9. Through a 40-60-minute VR engagement, comprehensive data on cognitive (inc. cognitive flexibility, sustained attention, working memory, processing speed), behavioral (exploration, attentional bias), and physiological (heart-rate variability, skin conductance) variables was collected. Subsequently, an explainable artificial intelligence model (xAI) was trained on data from 80% of the sample and tested on the remaining 20% in terms of accuracy for between-group classification.

Results: Following an iterative process that considered both the importance assigned to each variable in the different models and

Unity in Adversity Charlotte O'Brien, 2017-11-30 In this important contribution to the analysis and construction of European Union citizenship Charlotte O'Brien provides her characteristic blend of rigorous legal scholarship and compelling social vision. She identifies challenging questions about the relationship between justice and vulnerability that should concern the shaping of law at all levels of governance. Professor Niamh Nic Shuibhne, University of Edinburgh, 'Piercing the veil of well known proclamations of equality and non discrimination in this intimate portrait of Union law O'Brien sounds a sobering wake up call. The Union to the genuine surprise of some converted is a powerful actor of injustice failing the vulnerable Europeans at many a turn blinded by its own proclaimed righteousness and goodness to be aware of the plight of those it lets down. The sooner we dispel the oxymoronic myth of a market citizen as a necessary tool of the uniquely benevolent EU internal market project the sooner the process of healing the Union turning its back on the majority of Europeans can begin. This book is an important part of this beginning.' Professor Dimitry Kochenov, University of Groningen, 'Doctrinal mastery. Intellectual rigour. Conceptual depth. Empirical enrichment.' O'Brien's landmark text offers its readers all of these qualities. But she also writes with a clarity and honesty of purpose that is an inspiration to her readers. Particularly at a time when certain political actors seek to vilify expertise, *Unity in Adversity* is a testament to the value of independent and critical academic research. Professor Michael Dougan, University of Liverpool, 'The EU is at a crossroads of constitution and conscience. *Unity in Adversity* argues that EU market citizenship is incompatible with a pursuit of social justice because it contributes to the social exclusion of women and children, promotes a class based conception of rights and tolerates in-work poverty. The limitations of EU citizenship are clearest when EU nationals engage with national welfare systems but this experience has been neglected in EU legal research. *Unity in Adversity* draws upon the ground-breaking EU Rights Project working first hand with EU nationals in the UK providing advice and advocacy and giving ethnographic insight into the process of navigating EU and UK welfare law. Its study of EU law in action is a radical new approach and the case studies illustrate the political, legal and administrative obstacles to justice faced by EU nationals. Taken together the strands demonstrate that equal treatment for EU nationals is an illusion. The UK's welfare reforms directed at EU nationals are analysed as a programme of declaratory discrimination and in light of the subsequent referendum should be treated as a cautionary tale both to the EU to take social justice seriously and to other Member States to steer away from xenophobic law making.' Shortlisted for the 2018 BBC Thinking Allowed Award for Ethnography. Winner of the 2019 Hart SLSA Book Prize.

The New PhD Leonard Cassuto, Robert Weisbuch, 2021-01-19 This book examines the failed graduate school reforms of the past and presents a plan for a practical and sustainable PhD For too many students today's PhD is a bridge to nowhere Imagine an entering cohort of eight doctoral students By current statistics four of the eight 50% will not complete the degree Of the other four two will never secure full time academic positions The remaining pair will find full time teaching jobs likely at teaching intensive institutions And maybe just maybe one of them will garner a position at a research university like the one where those eight students began graduate school But all eight members of that original group will be trained according to the needs of that single one of them who might snag a job at a research university Graduate school has been preparing students for jobs that don't exist and preparing them to want those

jobs above all others In *The New PhD* Leonard Cassuto and Robert Weisbuch argue that universities need to ready graduate students for the jobs they will get not just the academic ones Connecting scholarly training to the vast array of career options open to graduates requires a PhD that looks outside the walls of the university not one that turns inward a PhD that doesn't narrow student minds but unlocks and broadens them practically as well as intellectually Cassuto and Weisbuch document the growing movement for a student centered career diverse graduate education and they highlight some of the most promising innovations that are taking place on campuses right now They also review for the first time the myriad national reform efforts sponsored by major players like Carnegie and Mellon that took place between 1990 and 2010 look at why these attempts failed and ask how we can do better this time around A more humane and socially dynamic PhD experience the authors assert is possible This new PhD reconceives of graduate education as a public good not a hermetically sealed cloister and it won't happen by itself Throughout the book Cassuto and Weisbuch offer specific examples of how graduate programs can work to reduce the time it takes students to earn a degree expand career opportunities after graduation encourage public scholarship create coherent curricula and rethink the dissertation attract a truly representative student cohort and provide the resources financial cultural and emotional that students need to successfully complete the program *The New PhD* is a toolbox for practical change that will teach readers how to achieve consensus on goals garner support and turn talk to action Speaking to all stakeholders in graduate education faculty administrators and students it promises that graduates can become change agents throughout our world By fixing the PhD we can benefit the entire educational system and the life of our society along with it
