

HTML Interview Q's

5) What is the difference between local storage and session storage?

Ans): **Local storage:**

- 1) Web page can be viewed simpliciterly for greater storage capacity.
- 2) The data is send back to the server for every HTTP request (html,images,javascript,css,etc) reducing amount of traffic between client and server

Session storage:

- 1) Similar to localStorage but expires when the browser closed (not the tab).
- 2) changes are available per window
- 3) Data is only available inside window/ door in which it was set

6) What is viewport?

Ans): The viewport is the user's visible area of a web page.

The viewport varies with the device, and will be smaller on a mobile phone than on a computer screen.

Before tablets and mobile phones, web pages were designed only for computer screens, and it was common for web pages to have a static design and a fixed size.

HTML5 introduced a method to let web designers take control over the viewport, through the <meta> tag.

7) What is META tag?

Ans): Metadata is data (information) about data.

The <meta> tag provides metadata about the HTML document. Metadata will not be displayed on the page, but will be machine parsable.
