

Global, regional, and national levels and trends in under-5 mortality between 1990 and 2015, with scenario-based projections to 2030: a systematic analysis by the UN Inter-agency Group for Child Mortality Estimation

Danesh Yous, Lucia Hug, Simon Ejlskov, Priscilla Idre, Daniel Hogan, Colin Mathers, Patrick Gerland, Jin Rou Ni, Lorraine Alkema, for the United Nations Inter-agency Group for Child Mortality Estimation (UN IGME)

Summary

Background In 2000, world leaders agreed on the Millennium Development Goals (MDGs). MDG 4 called for a two-thirds reduction in the under-5 mortality rate between 1990 and 2015. We aimed to estimate levels and trends in under-5 mortality for 195 countries from 1990 to 2015 to assess MDG 4 achievement and then intended to project how various post-2015 targets and observed rates of change will affect the burden of under-5 deaths from 2016 to 2030.

Methods We updated the UN Inter-agency Group for Child Mortality Estimation (UN IGME) database with 5700 country-year datapoints. As of July, 2015, the database contains about 17 000 country-year datapoints for mortality of children younger than 5 years for 195 countries, and includes all available nationally-representative data from vital registration systems, population censuses, household surveys, and sample registration systems. We used these data to generate estimates, with uncertainty intervals, of under-5 (age 0–4 years) mortality using a Bayesian B-spline bias-reduction model (B3 model). This model includes a data model to adjust for systematic biases associated with different types of data sources. To provide insights into the global and regional burden of under-5 deaths associated with post-2015 targets, we constructed five scenario-based projections for under-5 mortality from 2016 to 2030 and estimated national, regional, and global under-5 mortality rates up to 2030 for each scenario.

Results The global under-5 mortality rate has fallen from 90.6 deaths per 1000 livebirths (90% uncertainty interval 89.3–92.2) in 1990 to 42.5 (40.9–45.6) in 2015. During the same period, the annual number of under-5 deaths worldwide dropped from 12.7 million (12.6 million–13.0 million) to 5.9 million (5.7 million–6.4 million). The global under-5 mortality rate reduced by 53% (50–55%) in the past 25 years and therefore missed the MDG 4 target. Based on point estimates, two regions—east Asia and the Pacific, and Latin America and the Caribbean—achieved the MDG 4 target. 62 countries achieved the MDG 4 target, of which 24 were low-income and lower-middle income countries. Between 2016 and 2030, 94.4 million children are projected to die before the age of 5 years if the 2015 mortality rate remains constant in each country, and 68.8 million would die if each country continues to reduce its mortality rate at the pace estimated from 2000 to 2015. If all countries achieve the Sustainable Development Goal of an under-5 mortality rate of 25 or fewer deaths per 1000 livebirths by 2030, we project 56.0 million deaths by 2030. About two-thirds of all sub-Saharan African countries need to accelerate progress to achieve this target.

Interpretation Despite substantial progress in reducing child mortality, concerted efforts remain necessary to avoid preventable under-5 deaths in the coming years and to accelerate progress in improving child survival further. Urgent actions are needed most in the regions and countries with high under-5 mortality rates, particularly those in sub-Saharan Africa and south Asia.

Introduction

The year 2015 is crucial for policy discussions about child survival, not only because it is the target year for final reporting on the Millennium Development Goals (MDGs), but also because it is the year in which stakeholders are coming together to agree on the post-2015 agenda. In 2000, world leaders agreed on the MDGs and called for a two-thirds reduction in the under-5 mortality rate (U5MR) between 1990 and

2015—known as the MDG 4 target.¹ In recent years, global momentum and investment to accelerate gains in child survival have increased. During the UN MDG Summit in September, 2010, UN Secretary-General Ban Ki-moon launched *Every Woman Every Child*,² an unprecedented global movement to mobilise and intensify international and national action by governments, international agencies, non-governmental organisations, the private sector, and civil society to
