World Agriculture: Towards 2015/2030 Jelle Bruinsma, 2017-09-25 This report is FAO's latest assessment of the long term outlook for the world's food supplies nutrition and agriculture It presents the projections and the main messages The projections cover supply and demand for the major agricultural commodities and sectors including fisheries and forestry This analysis forms the basis for a more detailed examination of other factors such as nutrition and undernourishment and the implications for international trade The report also investigates the implications of future supply and demand for the natural resource base and discusses how technology can contribute to more sustainable development One of the report's main findings is that if no corrective action is taken the target set by the World Food Summit in 1996 that of halving the number of undernourished people by 2015 is not going to be met Nothing short of a massive effort at improving the overall development performance will free the developing world of its most pressing food insecurity problems The progress made towards this target depends on many factors not least of which are political will and the mobilization of additional resources Past experience underlines the crucial role of agriculture in the development process particularly where the majority of the population still depends on this sector for employment and income

Downhill from Here Katherine S. Newman, 2015-06-25 A sharp examination of the looming financial catastrophe of retirement in America As millions of Baby Boomers reach their golden years the state of retirement in America is little short of a disaster Nearly half the households with people aged 55 and older have no retirement savings at all The real estate crash wiped out much of the home equity that millions were counting on to support their retirement And the typical Social Security check covers less than 40% of pre retirement wages a number projected to drop to under 28% within two decades Old age poverty a problem we thought was solved by the New Deal is poised for a resurgence With dramatic statistics and vivid portraits acclaimed sociologist Katherine S Newman shows that the American retirement crisis touches us all cutting across class lines and

generational divides White collar managers have seen retirement benefits vanish Teamsters have had their pensions cut in half bankrupt cities like Detroit have walked away from their commitments to municipal workers And for Generation X the prospects are even worse a fifth of them expect to never be able to retire Only the vaunted one percent can face retirement without fear Other countries are confronting similar demographic challenges yet they have not abandoned their social contract with seniors Downhill From Here makes it clear that America too can and must do better **Minimum Wage**
