Book Comparative Philosophy Without Borders Chakrabarti:

Comparative Philosophy without Borders Arindam Chakrabarti, Ralph Weber, 2015-11-19 Comparative Philosophy without Borders presents original scholarship by leading contemporary comparative philosophers each addressing a philosophical issue that transcends the concerns of any one cultural tradition By critically discussing and weaving together these contributions in terms of their philosophical presuppositions this cutting edge volume initiates a more sophisticated albeit diverse understanding of doing comparative philosophy Within a broad conception of the alternative shapes that work in philosophy may take this volume breaks three kinds of boundaries between cultures historical periods and sub disciplines of philosophy such as metaphysics epistemology ethics aesthetics and political philosophy As well as distinguishing three phases of the development of comparative philosophy up to the present day the editors argue why the discipline now needs to enter a new phase Putting to use philosophical thought and textual sources from Eurasia and Africa contributors discuss modern psychological and cognitive science approaches to the nature of mind and topics as different as perception poetry justice authority and the very possibility of understanding other people Comparative Philosophy without Borders demonstrates how drawing on philosophical resources from across cultural traditions can produce sound state of the art progressive philosophy Fusing the horizons of traditions opens up a space for creative conceptual thinking outside all sorts of boxes

Humanism in Trans-civilizational Perspectives Jana S. Rošker, 2023-09-10 This book introduces into the current global ethics debate models of humanism developed in classical Chinese traditions which have not yet been comprehensively presented to Western scholarship or integrated into the framework of global discourses on social ethics and morality It creates new paradigms for an understanding of humanism that meets the demands of our time It begins by presenting European descriptions and critical assessments of this discourse and then moves to an exploration of humanistic ideas shaped through historical developments in Asia with a focus on the Chinese tradition In this sense the book is written from a transcivilizational perspective The methods used in the research transcend that is surpass and overcome the rigid isolating and essentialist concept of civilization At the same time the book points to the possibility of transformation through the exchange of knowledge and ideas between different civilizations Within this framework the book starts from the assumption that the ontology of civilizations and cultures is not based on immutable substances but on the relations between different factors that constitute them as categories The transcivilizational perspective rooted in transcultural dialogues between philosophies that originated in different cultures and civilizations is particularly valuable because of the globalized world in which we live today This means that the problems that affect people in different parts of the world and the issues that are embedded in different geopolitical and developmental frameworks also

affect all of humanity This book is of particular interest to scholars and students of global ethics globalization Asian philosophy and Sinology *All Things Act* Assistant Professor of Philosophy Mercedes Valmisa, Mercedes Valmisa, 2025 This book explores the collective character of action to expand the ways we think about agency First it resists viewing agency as a capacity much less one exclusive to humans Instead it defines agency as an umbrella term for the concrete sociomaterial processes that emerge from the collaborative efforts of multiple entities acting together Agency isn't the faculty of an individual entity or self it's always the function of a network or assembly of actors Second many of the actors involved in these processes are nonhuman things without intentions will or even awareness This relational and collective approach adopts a conception of action that doesn't hinge on mental states To act is to participate in contribute to shape facilitate organize constrain and modify the course of events This book argues that there's no such thing as an individual action and that agency is collectively distributed across a heterogeneous field of human and nonhuman actors Provided by publisher

The Role of Comparative Philosophy in Bosnia and Herzegovina Nevad Kahteran, 2021-09-20 This collection of essays highlights that despite its history of conflict Bosnia and Herzegovina has a real enthusiasm for comparative philosophy It illustrates the role of this type of philosophy in Bosnian culture and links it with developments in other parts of the world and other cultures Part One consists of essays that have appeared in slightly revised versions in a number of journals and books that focus on relevant resources introducing this field in our region and especially Bosnia and Herzegovina while Part Two consists of interviews with prominent scholars outside of this country The book examines the challenges confronting the teaching of comparative philosophy within the university level philosophy curriculum in Bosnia and Herzegovina and the surrounding countries in the Balkans a part of the world where multicultural societies are the norm Facing the twenty first century these confluences and cross currents are increasingly gaining importance especially in this region with a comparativism of ethnocentrism and multiculturalism becoming a way of challenging stereotypes **Daya Krishna and**

Twentieth-Century Indian Philosophy Daniel Raveh, 2020-09-03 Daya Krishna and Twentieth Century Indian Philosophy introduces contemporary Indian philosophy as a unique philosophical genre through the writings of one its most significant exponents Daya Krishna 1924-2007 It surveys Daya Krishna's main intellectual projects rereading classical Indian sources anew his famous Samvad Project and his attempt to formulate a new social and political theory for India Conceived as a dialogue with Daya Krishna and contemporaries including his interlocutors Krishnachandra Bhattacharyya Badrinath Shukla Ramchandra Gandhi and Mukund Lath this book is an engaging introduction to anyone interested in contemporary Indian philosophy and in the thought provoking writings of Daya Krishna **Infinite Paths to Infinite Reality** Ayon

Maharaj, 2018-10-08 This pioneering study examines the philosophy of the nineteenth century Indian mystic Sri Ramakrishna bringing him into dialogue with Western thinkers Sri Ramakrishna's expansive conception of God as the impersonal personal Infinite Reality Maharaj argues introduces a new paradigm for addressing central issues in the philosophy of religion

Decolonizing Theory Aditya Nigam,2021-12-30 Decolonizing Theory Thinking across Traditions aims at disentangling theory from its exclusively Western provenance drawing insights and concepts from other thought traditions connecting to what it argues is a new global moment in the reconstitution of theory The key argument which is the point of departure of the book is that any serious theorizing in the non West should be fundamentally suspicious of any theory that only gives you one result that four fifths of the world does not and cannot do anything right Everything in the non West from its modernity and secularism to its democracy and even capitalism is always seen to be deficient In other words all it tells us is that we do not live up to the standards set by Western modernity From this point of departure it seeks to create a conceptual space outside Western modernity and capitalism by insisting on a rethink of non synchronous synchronicities The book takes three key themes around which the whole story of modernity can be unraveled namely the question of the political capital and historical time and secularism for a detailed discussion It does so by bracketing in a sense the autobiographical story that Western modernity gives itself In each case it tries to show that past forms never simply disappear without residue to be fully supplanted by the modern and merely applying theory produced in one context to another is therefore very misleading

Comparative Methods in Law, Humanities and Social Sciences Adams, Maurice, Van Hoecke, Mark,2021-11-19 This cutting edge book facilitates debate amongst scholars in law humanities and social sciences where comparative methodology is far less well anchored in most areas compared to other research methods It posits that these are disciplines in which comparative research is not simply a bonus but is of the essence Pluralizing Political Philosophy Ingrid

Robeyns,2025-02-04 Pluralizing Political Philosophy focuses on economic and ecological inequalities By reducing the current marginalization of a range of traditions and approaches outside liberalism which especially takes place at universities in the Global North political philosophy will have access to a richer range of theories This marginalization happens to some extent to traditions that could be understood as providing an internal critique to liberalism but happens especially to various non western political philosophies The chapters in this edited volume illustrate the wide range of perspectives that exist to analyze economic and ecological inequalities In addition to critical discussions of liberal egalitarianism and green liberalism contributing authors also offer discussions of Mori philosophy ecofeminism Confucian political philosophy an ethics of care Ubuntu philosophy Buen Vivir and hybrid approaches The different traditions and approaches not only differ in their normative commitments but also in their ontological assumptions and methodological underpinnings The volume closes with four shorter chapters that provide meta theoretical reflections on the volume and make suggestions on how to further pluralise political philosophy This is an open access title available under the terms of a CC BY NC ND 4 0 International licence It is free to read at Oxford Scholarship Online and offered as a free PDF download from OUP and selected open access locations

Philosophy's Treason D. M. Spitzer,2020-05-05 Philosophy's Treason Studies in Philosophy and Translation gathers contributions from an international group of scholars at different stages of their careers bringing

together diverse perspectives on translation and philosophy The volume's six chapters primarily look towards translation from philosophic perspectives often taking up issues central to Translation Studies and pursuing them along philosophic lines By way of historical logical and personal reflection several chapters address broad topics of translation such as the entanglements of culture ideology politics and history in the translation of philosophic works the position of Translation Studies within current academic humanities untranslatability within philosophic texts and the ways philosophic reflection can enrich thinking on translation Two more narrowly focused chapters work closely on specific philosophers and their texts to identify important implications for translation in philosophy In a final critical postscript the volume takes a reflexive turn as its own chapters provide starting points for thinking about philosophy and translation in terms of performativity From philosophers critically engaged with translation this volume offers distinct perspectives on a growing field of research on the interdisciplinarity and relationality of Translation Studies and Philosophy Ranging from historical reflections on the overlap of translation and philosophy to philosophic investigation of questions central to translation to close readings of translation within important philosophic texts Philosophy's Treason serves as a useful guide and model to educators in Translation Studies wishing to illustrate a variety of approaches to topics related to philosophy and translation **Toward a New Art of**

Border Crossing Ananta Kumar Giri, Arnab Roy Chowdhury, David Blake Willis, 2024-11-05 Boundaries borders and margins are related concepts and realities and each of these can be conceptualized and organized in closed or open ways with degrees of closure or openness The logics of stasis and closure as well as cults of exclusivist and exclusionary sovereignty are reflected and embodied in the closed xenophobic conceptualization and organization of boundaries borders and margins But an open conceptualization of the borderlands where mixing and hybridity take place at a rapid even dizzying pace gives rise to Creolization at the threshold of sovereignties which can also be imagined At present our border zones are spaces of anxiety ridden security arrangements violence and death The existing politics of boundary maintenance is wedded to a cult of sovereignty at various levels which produces bare lives bodies and lands We need the new art of border crossing to be defined by the notion of camaraderie and shared sovereignties and non sovereignties Border zones can also be zones of meetings communication transcendence and festive celebration of the limits of our identities Thus we need a new art and politics of boundary transmutation transformation and transcendence in the broadest possible sense that entails the production of spatial scalar somatic cognitive affective and spiritual transitions *Biblical Philosophy* Dru

Johnson, 2021-04-22 In *Biblical Philosophy* Dru Johnson examines how the texts of Christian Scripture argue philosophically with ancient and modern readers alike He demonstrates how biblical literature bears the distinct markers of a philosophical style in its use of literary and philosophical strategies to reason about the nature of reality and our place within it Johnson questions traditional definitions of philosophy and compares the Hebraic style of philosophy with the intellectual projects of ancient Egypt Mesopotamia and Hellenism Identifying the genetic features of the Hebraic philosophical style Johnson traces

its development from its hybridization in Hellenistic Judaism to its retrieval by the New Testament authors He also shows how the Gospels and letters of Paul exhibit the same genetic markers modes of argument particular argument forms and philosophical convictions that define the Hebraic style while they engaged with Hellenistic rhetoric His volume offers a model for thinking about philosophical styles in comparative philosophical discussions **Japanese Environmental**

Philosophy J. Baird Callicott, James McRae, 2017-05-01 Japanese Environmental Philosophy is an anthology that responds to the environmental problems of the 21st century by drawing from Japanese philosophical traditions to investigate our relationships with other humans nonhuman animals and the environment It contains chapters from fifteen distinguished scholars from Japan the United States and Europe **Democracy after Virtue** Sungmoon Kim, 2018-05-11 Is Confucianism compatible with democracy Ongoing debates among political theorists revolve around the question of whether the overarching goal of Confucianism serving the people's moral and material well being is attainable in modern day politics without broad democratic participation and without relying on a one person one vote system One side of the debate voiced by traditional Confucian meritocrats argues that only certain people are equipped with the moral character needed to lead and ensure broad public well being They emphasize moral virtue over civic virtue and the family over the state as the quintessential public institution Moreover they believe that a system of rule headed by meritorious elites can better handle complex modern public affairs than representative democracy The other side voiced by Confucian democrats argues that unless all citizens participate equally in the public sphere the kind of moral growth Confucianism emphasizes cannot be fully attained Despite notable differences in political orientation scholars of both positions acknowledge that democracy is largely of instrumental value for realizing Confucian moral ends in modern society It would seem that Confucians of both types have largely dismissed democracy as a political system that can mediate clashing values and political views or even that Confucian democracy is a system marked by pluralism In this book Sungmoon Kim lays out a normative theory of Confucian democracy pragmatic Confucian democracy to address questions of the right to political participation instrumental and intrinsic values of democracy democratic procedure and substance punishment and criminal justice social and economic justice and humanitarian intervention As such this project is not only relevant to the much debated topic of Confucian democracy as a cultural alternative to Western style liberal democracy in East Asia but it further investigates the philosophical implications of the idea and institution of Confucian democracy in normative democratic theory criminal justice distributive justice and just war Ultimately Kim shows us that the question is not so much about the compatibility of Confucianism and democracy but of how the two systems can benefit from each other **Doing Philosophy Comparatively** Tim Connolly, 2022-12-29

Selfless Minds Monima Chadha, 2023 Selfless Minds offers a new interpretation of no self metaphysics in Vasubandhu s Abhidharmakosa Bhasya Monima Chadha reads Vasubandhu as defending not only eliminativism about self but also about persons and

illusionism about the sense of self and all kinds of self representation This radical no self thesis presents several challenges for Abhidharma Buddhist philosophy of mind Even if we then grant that there is no self we are left with deeper questions about the sense of self or self representations implicated in our ordinary everyday experience and thought about the world and ourselves And if we grant that there are no persons questions remain about the status of our person related concerns and interpersonal practices Selfless Minds answers these questions on behalf of the Abhidharma Buddhist The first part of the book defends the hypothesis that we can salvage much of our experience and thought without implicating self representations The second part of the book examines the revisionary implications of the no person metaphysics Some of these seem unpalatable if not downright absurd This she argues give us reason to re evaluate both the Abhidharma metaphysics and our ordinary person related practices and concerns in light of each other by using some sort of wide reflective equilibrium Selfless Minds is a contribution to cross cultural philosophy that studies the nature of selfless minds from a place at the crossroads of different traditions and disciplines philosophy in the traditional Buddhist and contemporary Western traditions and contemporary cognitive sciences
