Book Labour Subjectivity Foucault Biopolitics Critique:

The Labour of Subjectivity Andrea Rossi, 2015-11-30 Michel Foucault defined critique as an exercise in de-subjectivation To what extent did this claim shape his philosophical practice What are its theoretical and ethical justifications Why did Foucault come to view the production of subjectivity as a key site of political and intellectual emancipation in the present Andrea Rossi pursues these questions in *The Labour of Subjectivity* The book re-examines the genealogy of the politics of subjectivity that Foucault began to outline in his lectures at the Collège de France in the late 1970s and early 1980s He explores Christian confession, *raison d'état*, biopolitics and bioeconomy as the different technologies by which Western politics has attempted to produce, regulate and give form to the subjectivity of its subjects Ultimately Rossi argues that Foucault's critical project can only be comprehended within the context of this historico-political trajectory as an attempt to give the extant politics of the self a new horizon *Philosophical Reflections on Black Mirror* Dan Shaw, Kingsley

Marshall, James Rocha, 2021-12-16 *Black Mirror* is a cultural phenomenon It is a creative and sometimes shocking examination of modern society and the improbable consequences of technological progress The episodes typically set in an alternative present or the near future usually have a dark and satirical twist that provokes intense question both of the self and society at large These kind of philosophical provocations are at the very heart of the show *Philosophical reflections on Black Mirror* draws upon thinkers such as Friedrich Nietzsche, Pierre Hadot and Michel Foucault to uncover how *Black Mirror* acts as philosophical television questioning human morality and humanity's vulnerability when faced with the inexorable advance of technology *Encountering Affect* Dr Ben Anderson, 2014-07-28 In *Encountering Affect* Ben Anderson explores why understanding affect matters and offers one account of affective life that hones in the different ways in which affects are ordered Intervening in debates around non-representational theories he argues that affective life is always already mediated the never-finished product of apparatuses, encounters and conditions Through a wide range of examples including dread, debility, dependency in torture, ordinary hopes and precariousness Anderson shows the significance of affect for understanding life today **Art, Critical Pedagogy and Capitalism** Paul Alexander Stewart, 2020-12-30 This book

offers a re-examination of art production in terms that understand the process of learning as the production of art itself Drawing on the thought of Rancière, Freire, Gramsci and Mouffe it provides an account of the politics of art production and a theoretical understanding of hegemonic power while developing a view of method in critical pedagogy founded on the process of making adversaries Through a re-evaluation of the relationships between process, arts production and pedagogy within accelerated developments of neoliberalism the author uncovers ways of forming a more co-operative and less conflictual approach to democratic politics An investigation of ways in which art practice can be used to engage with critical pedagogy in relation to a commodity-driven neoliberal agenda *Art Critical Pedagogy and Capitalism* constitutes a radical rethinking of art making and an attempt to address the paradox between the proliferation of the commodity of learning and

the perceived crisis of arts education As such it will appeal to scholars of education pedagogy and the arts with interests in social and critical theory

administration public policy power and citizenship Moreover governmental changes are analysed in terms of networks risk speed complexity power and citizenship

The Biopolitics of Development Sandro Mezzadra, Julian Reid, Ranabir Samaddar, 2013-12-27 This book offers an original analysis and theorization of the biopolitics of development in the postcolonial present and draws significantly from the later works of Michel Foucault on biopolitics Foucault's works have had a massive influence on postcolonial literatures particularly in political science and international relations and several authors of this book have themselves made significant contributions to that influence While Foucault's thought has been inspirational for understanding colonial biopolitics as well as governmental rationalities concerned with development his works have too often failed to inspire studies of political subjectivity Instead they have been used to stoke the myth of the inevitability of the decline of collective political subjects often describing an increasingly limited horizon of political possibilities and provoking a disenchantment with the political itself in postcolonial works and studies Working against the grain of current Foucauldian scholarship this book underlines the importance of Foucault's work for the capacity to recognize how this degraded view of political subjectivity came about particularly within the framework of the discourses and politics of development and with particular attention to the predicaments of postcolonial peoples It explores how we can use Foucault's ideas to recover the vital capacity to think and act politically at a time when fundamentally human capacities to think know and to act purposively in the world are being pathologized as expressions of the hubris and underdevelopment of postcolonial peoples Why and how it is that life in postcolonial settings has been depoliticized to such dramatic effect The immediacy of these themes will be obvious to anyone living in the South of the world But within the academy they remain heavily under addressed In thinking about what it means to read Michel Foucault today this book tackles some significant questions and problems Not simply that of how to explain the

ways in which postcolonial regimes of governance have achieved the debasements of political subjectivity they have nor that of how we might better equip them with the means to suborn the life of postcolonial peoples more fully but that of how such peoples in their subjection to governance can and do resist subvert escape and defy the imposition of modes of governance which seek to remove their lives of those very capacities for resistance subversion flight and defiance *Performance, [performance] and Performers* Bruce Barber, 2007 *Performance Performance Performers* consists of two volumes Volume 2 contains nine essays on performance art written over a thirty year period from 1976 to 2006 while Volume 1 contains fourteen interviews with leading performance artists in Canada and the U S conducted over the same period and is generously illustrated with photographs of many now landmark art performances **Biopolitical Experience** C. Blencowe, 2011-12-15 An original comprehensive interpretation of Michel Foucault's analysis of biopolitics situating biopolitics in the context of embodied histories of subjectivity affective investments and structures of experience Going beyond lamentation at the horrors of biopolitical domination the book develops a positive critique of biopolitical experience **International Viewpoint**, 2004-02 *Foucault's Politics of Philosophy* Sandro Chignola, 2018-07-04 Oriented around the theme of a politics of philosophy this book tracks the phases in which Foucault's genealogy of power law and subjectivity was reorganized during the 14 years of his teaching at the College de France as his focus shifted from sovereignty to governance This theme Sandro Chignola argues here is the key to understanding four features of Foucault's work over this period First it foregrounds its immediate political character Second it demonstrates that Foucault's Greek trip also aims at a politics of the subject that is able to face the processes of the governmentalization of power Third it makes clear that the idea of the government of the self is drawing on an ethics of intellectual responsibility that is Weberian in origin an answer to the processes that within neoliberal governance produce the subject as an individual as a consumer a market agent an entrepreneur and so on Fourth the theme of a politics of philosophy implies that Foucault's research was never simply scholarly or neutral but rather was characterized by a specific political position Against recent interpretations that risk turning Foucault into a scholar here then Foucault is re-presented as a key figure for jurisprudential and political philosophical research **A Foucault for the 21st Century** Sam Binkley, Jorge Capetillo-Ponce, 2009-01-23 How relevant is Foucault's social thought to the world we inhabit today This collection comprises several essays considering the contemporary relevance of the work of Michel Foucault While Foucault is best remembered for his historical inquiries into the origins of disciplinary society in a period extending from the 16th to the 19th centuries it seems that today under the conditions of global modernity the relevance of his ideas are called into question With the increasing ubiquity of markets the break up of centralized states and the dissolution of national boundaries together with new scientific and political discourses on biological life the world of today seems far removed from the bounded disciplinary societies Foucault described in his most famous books Yet in recent years it has become apparent that Foucault's thoughts on modern society have not been

exhausted and indeed that much remains to be explored Within this volume novel interpretations and thematic developments of key Foucauldian concepts are presented in the works of 24 authors Prominent among them are new forms of neoliberal economic conduct framed by distinct governmentalities new critical concepts of biological life reflected in Foucault's analysis of biopower and new theoretical treatments of the effects of subjectivation Moreover included among these theoretical departures are empirical studies of contemporary formations of religion and spiritual practice consumerism race and racism the discourse of genetics and the life sciences surveillance and incarceration and new social movements Drawn from a conference held at the University of Massachusetts Boston bearing the same title *A Foucault for the 21st Century* Governmentality Biopolitics and Discipline in the New Millennium both expands our understanding of Foucault's central theoretical legacy and applies his ideas to a range of contemporary empirical phenomena Marx and Foucault Antonio Negri, 2017-01-12 This is the first of a new three part series in which Antonio Negri a leading political thinker of our time explores key ideas that have animated radical thought and examines some of the social and economic forces that are shaping our world today In this first volume Negri shows how the thinking of Marx and Foucault were brought together to create an original theoretical synthesis particularly in the context of Italy from May 68 onwards At around that time the structures of industry and production began to change radically with the emergence of new producer subjects and new fields of capitalist value creation New concepts and theories were developed by Foucault Deleuze and Guattari and others to help make sense of these and related developments concepts such as biopower and biopolitics subjectivation and subsumption public and common power and potentiality These concepts and theories are examined by Negri within the broader context of the development of European philosophical discourse in the twentieth century Marx and Foucault provides a unique account of the development of radical thought in the late 20th and early 21st centuries and will be a key text for anyone interested in radical politics today *The Government of Life* Vanessa Lemm, Miguel Vatter, 2014-04-05 Foucault's late work on biopolitics and governmentality has established him as the fundamental thinker of contemporary continental political thought and as a privileged source for our current understanding of neoliberalism and its technologies of power In this volume an international and interdisciplinary group of Foucault scholars examines his ideas of biopower and biopolitics and their relation to his project of a history of governmentality and to a theory of the subject found in his last courses at the Collège de France Many of the chapters engage critically with the Italian theoretical reception of Foucault At the same time the originality of this collection consists in the variety of perspectives and traditions of reception brought to bear upon the problematic connections between biopolitics and governmentality established by Foucault's last works
