Future Screening Marc K. Peter,2011 Foresight that is the ability to foresee how the future will unfold is a desirable management capability which can be developed through engaging with strong and weak signals in the emerging environment The foresight process provides strategic guidance through identifying critical turning points in the evolution of the environment The importance of foresight in strategy development will increase

as the likelihood of market pressure and dynamics remains the same or even increases which will lead to stronger competition and a need for long term innovative planning capabilities The literature does not provide an overall best practice foresight framework as the investigations that have been completed are specifically focussed on weak signals management environmental scanning strategy adaptation or scenario management or a combination of the above Having examined existing literature on strategic planning strategic thinking envisioning and innovation it is evident that an integrated strategic foresight framework from signals collection to scenario building and strategy implementation has not yet been built and the impact of this approach on business practice is yet to be articulated The development and empirical investigation of a contemporary foresight driven approach to strategy development is the core of this research project Based on the conclusion from the literature review the research question can be formulated as how and why can strategic foresight based on the integration of strong and weak signals methodologies enrich the strategy process in a dynamic and changing environment Or in other words how does a contemporary best practice framework for advancing strategic corporate foresight need to be designed so it is applicable and value generating in a real business environment Abstract p 7

Get in Gear Sean Ryan, 2020-06-03 Get in Gear The Seven Gears that Drive Strategy to Results 978 0 367 47149 1 335422 Shelving Guide Business and Management Leadership Strategy Only 10% to 25% of organizations get it right when it comes to achieving the expected results from their strategic planning This means 75% to 90% of them are leaving results on the table and wasting their time on things that don't matter Almost a decade ago a major

steel manufacturer approached Sean Ryan and his team to help them think through how to better convert strategy to results. This was the catalyst for the seven gears that translate strategy to results found in Strategy Execution Results SXRTM. Why Gears? Gears transmit energy. The more aligned they are and the less friction in their chain, the better they function. Leaders can easily identify the gear creating the most friction and then take action to better align that gear with the strategy, generating better results. This creates momentum to improve the alignment and performance of other gears. This approach also emphasizes the ways everyone in the organization has some influence over every gear. Based on Sean Ryan's consulting and training with organizations from start-ups to the Fortune 100, he's found that these performance gears drive better results. You'll employ them to align your goals with your strategy, create visible scorecards to know whether or not you're on track, and identify the critical behaviors and actions that will drive performance. Readers will use this book to point their efforts toward getting meaningful results from their strategy. As noted in the Harvard Business Review, The prize for closing the strategy performance gap is huge: increasing performance by at least 50% for most organizations. After moving beyond their initial amazement of just how misaligned they were, they'll be able to quickly apply the seven gears to sell better and more, drive down costs, improve quality and safety, and recruit talent for the future. In addition, there's nothing in this book that has not been applied in actual business settings. While companies could use the SXRTM Framework to overhaul their organization top to bottom, they'll also appreciate that they don't have to change everything at once to make progress. Upon understanding each of the gears and how to create Follow-up and Follow-through, they'll be able to improve any gear to start seeing strategic outcomes. You've got it in Gear now. Stay in Gear.
