Regional Approaches to the Responsibility to Protect Jochem Rietveld, 2023-02-10 This book studies regional approaches to the Responsibility to Protect R2P in Europe and West Africa The work assesses how and to what extent the European Union EU and the Economic Community of West African States ECOWAS have internalised the norm both generally in institutions policies and programs and specifically in crisis situations

of R2P concern such as the 2011 Libyan crisis and 2012 Malian crisis. It provides a historical analysis of how the two regional organisations have dealt with questions of sovereignty, security and human rights since their founding, as well as an analysis of some of the European and West African roots of the R2P norm. This reflects the notion that global norms are often informed by local and regional practices and that this needs to be recognised in order to fully understand regional responses to alleged global norms. The book uses process tracing to trace the regional internalisation of R2P and has benefited from qualitative research interviews with EU and ECOWAS stakeholders. One of the key findings is that ECOWAS and West Africa have delivered a key contribution to the norm construction of R2P, a finding insufficiently recognised in the current literature. This book will be of much interest to students of the Responsibility to Protect, EU human rights and foreign policy, African politics, security studies and International Relations in general.

Weak States, Vulnerable Governments, and Regional Cooperation Atena Ștefania Feraru, 2021-10-31. War, famine, poverty, organized crime, environmental catastrophes, refugees, epidemics and pandemics, modern slavery: all these affect people in the non-Western world to an increasingly disproportionate extent. It is also where wealthy governments wield economic leverage and military force to renegotiate existing norms of international relations. Under these circumstances, it is difficult to overestimate the importance and urgency of comprehending the mechanisms and motivations driving these phenomena. This book is the outcome of a decade-long effort to advance both theoretical and empirical understanding of what motivates non-Western governments' decisions to cooperate or not cooperate regionally. It starts by acknowledging the Western centrism of prevailing international relations theories, abandoning deeply entrenched assumptions regarding the nature and roles of states and redefining state weakness. The inquiry continues by elaborating this new concept and applying it to Southeast Asian polities, while positing that it creates governments vulnerable to internal and external threats in line with Joel S. Migdal's well-known findings on the topic. A set of regional cooperation strategies is then inferred based on the survival needs of insecure governing elites, and its empirical validity is tested against the experience of regional organizations in Africa, Asia and the Americas. The second part of the book provides an in-depth examination of how Southeast Asian governments shared security needs and interests, shaped the emergence of the identified regional cooperation pattern, and its evolution over 50 years of cooperation within the Association of Southeast Asian Nations (ASEAN). Overall, this book is a call to international relations scholars to do their part in understanding non-Western experiences and making a substantive contribution to addressing humanity's most intractable security threats.

The Oxford Handbook of the Responsibility to Protect Alex Bellamy,Tim Dunne,2016-06-30 The Responsibility to Protect R2P is intended to provide an effective framework for responding to crimes of genocide ethnic cleansing war crimes and crimes against humanity It is a response to the many conscious shocking cases where atrocities on the worst scale have occurred even during the post 1945 period when the United Nations was built to save us all from the scourge of genocide The R2P concept accords to sovereign states and international institutions a responsibility to assist peoples who are at risk or experiencing the worst atrocities R2P maintains that collective action should be taken by members of the United Nations to prevent or halt such gross violations of basic human rights This Handbook containing contributions from leading theorists and practitioners including former foreign ministers and special advisors examines the progress that has been made in the last 10 years it also looks forward to likely developments in the next decade

Global Governance, Human Rights and International Law Errol P. Mendes,2022-08-18 This book offers a stimulating introduction to the links between areas of global governance human rights global economy and international law By drawing on a range of diverse subject areas it argues that the foundations of global governance human rights and international law are undermined by a conflict or tragic flaw where insistence on absolute conceptions of state sovereignty are pitted against universally accepted principles of justice and human rights resulting in destructive self interest for both the state and the global community Following the election of President Donald Trump the second edition will explores how we are witnessing a critical battle to ensure that human rights international law and the beneficial aspects of globalization will still be relevant and applied in some of the critical institutions of global governance and in the operations of the global private sector The second edition will focus on how States institutions and global civil society will have to ramp up the struggle to fight this tragic flaw that is now even more evident with the actions of the US and other authoritarian states like China and Russia in this second decade of the 21st Century
