Ranking Business Schools Linda Wedlin, 2006-01-01 In her admirable book Wedlin entangles what business school rankings really are and why they have become so important. The book contains plenty to interest the growing army of business school employees whose duties at least in part are concerned with boosting their institution's position in the rankings. Education and Training In times when the management education field is increasingly impacted by a proliferation of ranking exercises this book is a timely and welcome contribution. Linda Wedlin unpacks for us the real meaning of the contemporary explosion of rankings. Rather than simple classification schemes and mechanisms rankings are she suggests arenas where the field of business education is being created and re-created. They are the loci of boundary work whereby a field is progressively evolving and constituting itself. This is a convincing study relying on rich empirical data and carefully anchored in relevant theoretical debates. A must read for all those academics, students, policy makers and education professionals who want to understand the complex contemporary logics of higher education in management but also probably well beyond. Marie Laure Djelic ESSEC Business School Paris France League tables appear everywhere and have become important aspects of business school environments. Based on in-depth and creatively combined empirical studies Linda Wedlin provides us with explanations and insights on the emergence and impact of such rankings. This book should be of great value for all those who seek to play the ranking game. It gives a fresh perspective on how classification mechanisms drive the emergence, boundary setting and change of organizational fields. Kerstin Sahlin Andersson Uppsala University Sweden A fascinating study of the complex issues surrounding MBA rankings. Business schools really hate them but at times have to pretend to love them. Magazines and newspapers are really interested in their sales potential but have to make pretensions about their veracity. Linda Wedlin focuses on an area rich in hypocrisy and hype but also one where there are real consequences. Ranking furthered re-inforces the homogenising tendencies of MBAs. Anthony Hopwood Saïd Business School University of Oxford UK This is a most fascinating topic dealt with in a manner which is both serious and entertaining. Everyone in a business school would want to read it. Linda Wedlin's excellent research is presented with a no-nonsense approach: if there is anything worth counting she counts it and then interprets it, no fuss. Exemplary. Barbara Czarniawska Gteborg University Sweden This engaging book offers a fresh perspective on the burgeoning field of European management education and its intense concern with rankings. Using a creative mix of well-crafted research tools Wedlin deftly captures a professional field in transition as it both expands and develops shared standards. Walter W. Powell Stanford University US International comparisons and rankings of universities and business schools have proliferated in recent years. *Ranking Business Schools* provides a welcome analysis of this development and its implications for the field of management education, theorizing the role of classifications such as rankings in forming and structuring organizational fields. Focusing on the European experience with rankings and the subsequent response the book illustrates how business schools use rankings to

form identities and positions and to draw boundaries for the field By both creating and confirming belonging to a business school community and providing distinction within that group rankings are important for defining an international field of management education organizations constructing an international business school market and constitute an arena for debating and establishing the boundaries of this field Building an extensive theoretical framework for understanding classification The New York Times Practical Guide to Practically Everything Amy D. Bernstein, Peter W.

Bernstein, 2006-10-17 A collection of information on aspects of daily life and a variety of popular topics such as the home health animals nature sports and entertainment **Transnational Governance** Marie-Laure Djelic, Kerstin

Sahlin-Andersson, 2006-08-10 Globalization involves a profound re ordering of our world with the proliferation everywhere of rules and transnational modes of governance This book examines how this governance is formed changes and stabilizes Building on a rich and varied set of empirical cases it explores transnational rules and regulations and the organizing discursive and monitoring activities that frame sustain and reproduce them Beginning from an understanding of the powerful structuring forces that embed and form the context of transnational regulatory activities the book scrutinizes the actors involved how they are organized how they interact and how they transform themselves to adapt to this new regulatory landscape A powerful analysis of the modes and logics of transnational rule making and rule monitoring closes the book This authoritative resource offers ideal reading for all academic researchers and graduate students of governance and regulation

Railway Age ,1929 Public Higher Education That Works Mitchel B. Wallerstein,2024 Discover how one public higher education institution was able to succeed despite the many obstacles and challenges that it faced This is the story of how and why Baruch College of The City University of New York became a positive outlier overcoming serious financial constraints physical space limitations and other difficulties to be highly ranked academically and financially stable During a tumultuous time for public higher education Baruch has graduated tens of thousands of smart and striving individuals the majority of whom were the first in their family ever to attend college with little or no educational debt As the former president of the college Mitchel Wallerstein analyzes the lessons learned and he identifies the specific factors that explain Baruch s success He addresses the question of whether there is anything unique about Baruch s approach a secret sauce so to speak that accounts for its academic success and financial strength and he considers whether the Baruch model can be replicated by other public institutions Book Features Reviews the history of public higher education its development in the state of New York and the important role it has played in the economic development of the United States Presents a unique comparative analysis of 15 public higher education institutions in 6 states across the country comparing their strengths and standing in relation to one another and to Baruch College Explores the replicability and sustainability of the Baruch model in the context of other public higher education institutions across the country Reflects on the current and future challenges facing public higher education in the 21st century The Meritocracy Trap Daniel Markovits,2019 A revolutionary new argument from eminent Yale Law professor Daniel Markovits attacking the false promise of meritocracy It is an axiom of American life that advantage should be earned through ability and effort Even as the country divides itself at every turn the meritocratic ideal that social and economic rewards should follow achievement rather than breeding reigns supreme Both Democrats and Republicans insistently repeat meritocratic notions Meritocracy cuts to the heart of who we are It sustains the American dream But what if both up and down the social ladder meritocracy is a sham Today meritocracy has become exactly what it was conceived to resist a mechanism for the concentration and dynastic transmission of wealth and privilege across generations Upward mobility has become a fantasy and the embattled middle classes are now more likely to sink into the working poor than to rise into the professional elite At the same time meritocracy now ensnares even those who manage to claw their way to the top requiring rich adults to work with crushing intensity exploiting their expensive educations in order to extract a return All this is not the result of deviations or retreats from meritocracy but rather stems directly from meritocracy s successes This is the radical argument that Daniel Markovits prosecutes with rare force Markovits is well

placed to expose the sham of meritocracy Having spent his life at elite universities he knows from the inside the corrosive system we are trapped within Markovits also knows that if we understand that meritocratic inequality produces near universal harm we can cure it When *The Meritocracy Trap* reveals the inner workings of the meritocratic machine it also illuminates the first steps outward towards a new world that might once again afford dignity and prosperity to the American people *Research Handbook on University Rankings* Hazelkorn, Ellen, Mihut, Georgiana, 2021-12-10 Gathering unique and thoughtful contributions from leading international scholars this timely Research Handbook offers diverse perspectives on university rankings twenty years after the first global rankings emerged It presents an in depth analysis that reflects the current state of research on rankings their influence and impact **Advocate** , 1928 *The College Buzz Book* Carolyn C. Wise, Stephanie Hauser, 2007-03-26 Many guides claim to offer an insider view of top undergraduate programs but no publisher understands insider information like Vault and none of these guides provides the rich detail that Vault's new guide does Vault publishes the entire surveys of current students and alumni at more than 300 top undergraduate institutions Each 2 to 3 page entry is composed almost entirely of insider comments from students and alumni Through these narratives Vault provides applicants with detailed balanced perspectives
