Ai Overview 2025:

KI 2025: Advances in Artificial Intelligence Tanya Braun, Benjamin Paaßen, Frieder Stolzenburg, 2025-08-31 This book constitutes the proceedings of the 48th German Conference on Artificial Intelligence Künstliche Intelligenz KI 2025 which was held in Potsdam Germany during September 16-19, 2025. The 15 full papers, 8 short papers and 5 extended abstracts presented in these proceedings were carefully reviewed and selected from 74 submissions. They focus on new research results on theory and applications in AI. The papers were categorized in the following sections: Full Technical Papers, Technical Communications, Extended Abstracts. *Elite Quality Index 2025* Tomas Casas i Klett, Guido Cozzi, 2025-07-15 The Elite Quality Index 2025 The Sustainable Value Creation of Nations EQx2025 the leading global political economy index is a comparative ranking measuring the sustainability of nations that assesses whether elites create value and expand a nation's knowledge capabilities or use their power to rent seek and maximize their own profits by transferring value from their stakeholders. The EQx2025 uses 149 indicators to analyze 151 countries and measures conceptual elements such as Power, Creative Destruction and Unearned Income to determine whether the elites of a given country create or extract value from their nation. Elites are defined as those that lead a society's most important business models and range from technology giants to labor unions with members including business, political and knowledge elites. Their collective coordination capacity helps them to leverage their power and influence over institutions. A nation's elite system and its most powerful business models are essential for value creation and economic and human development. The report describes high quality elites as those that can increase or grow the overall size of the economic pie while low quality elites use their power advantages to grow their own slice at the cost of others. **DIGITAL TRANSFORMATION IN UKRAINE: AI, METAVERSE, AND SOCIETY 5.0**, 2024-12-15 This monograph examines the intricate dynamics of Ukraine's digital transformation focusing on the intersections of artificial intelligence, the metaverse and Society 5.0. It offers a comprehensive analysis of how emerging technologies are redefining societal structures, governance frameworks and human identity in the context of global digitalization. By addressing the multifaceted nature of technological advancements, the research delves into philosophical, legal and ethical considerations tied to digital identity and the evolving concept of electronic jurisdiction, particularly in the regulation of virtual environments and cyberspace. Key themes include the implications of immersive technologies for human interaction, the ethical dilemmas surrounding digital avatars and the role of simulacra in hybrid warfare strategies. Additionally, the study explores the transformative potential of Industry 5.0 in Ukraine's economic and industrial revitalization, emphasizing the integration of digital ecosystems into post-quantum civilization. It underscores the need for interdisciplinary collaboration to tackle challenges associated with technological disruptions while fostering a sustainable balance between innovation and societal well-being. This work contributes to ongoing discourse on the role of digital technologies in shaping future societies, offering a unique perspective on their application and governance in Ukraine's

Artificial Intelligence and the Rule of Law Armando Aliu, 2025-10-26 This book explores the most pressing challenges in AI technologies and practices: the entanglements of the AI and law and AI and the rule of law nexus and a digitally transformed fracturing world that is shaped by digital governance and digital ethics underpinned by responsible AI and AI4People viewpoints. It draws attention to unraveling the legal labyrinth of regulatory frameworks on AI, the rule of law, digital human rights, digital democracy and how these AI regulations intervene in the digital transformation of LegalTech across the world. It emphasizes the need for a robust regulatory framework to mitigate the risks of AI and overcome legal hurdles. The book scrutinizes the issues, risks and opportunities of AI to uphold the rule of law, promote human rights, improve access to justice, protect people's rights and fundamental freedoms and strengthen the inclusive society based on the rule of law. Furthermore, the book delves into the challenges and risks of AI, protection of privacy, personal data and the GDPR. The book sheds light on the impact of AI use on the development of the rule of law and digital transformation in legal systems by considering the digitalization of justice systems, the impact of AI on safeguarding human rights, AI ethics, AI governance, AI use in justice systems, computational jurisprudence, Generative AI, the age of LegalTech, responsible, human-centric, explainable and trustworthy AI technologies, AI interdisciplinarity, procedural fetishism and substantive due process in AI governance and digital constitutionalism, the right to be forgotten, the legal feasibility of machine unlearning methods, the EU AI Act regulatory framework, digital vulnerability, bio-technological ethics and post anthropocentrism

Connected Objects, Artificial Intelligence, Telecommunications and Electronics Engineering Youssef Mejdoub, *Postdigital Education for Development* Michael A. Peters, Olivera Kamenarac, Benjamin J. Green, Petar Jandrić, Tina Besley, 2025-10-07 This edited volume unpacks the profound deterritorializing and reterritorializing shifts taking place across the globalized networked educational landscape interjecting into pervasive predominant education development. EdDev discourses. Highlighting the transdisciplinarity of postdigital studies, this book engages with core facets of contemporary educational development such as educational geopolitics, policy discourses, global funding institutions, cooperative developmental initiatives, national imaginaries of educational development, the university stakeholder collectives and pedagogical and curricular frameworks. It provides a comprehensive understanding of current EdDev discourse and practice, its failings and how technology-driven disruptions can open up avenues for alternative reimaginings of educational futures. The research presented foregrounds a conceptualization of inclusive postdigital educational ecosystems that catalyze educational futures built around human-centered technological advancements in support of sustainable bio-digital planetary development. This book is suited for educators and researchers of educational development and policy. *Postdigital Education for Development* is complemented by *The Geopolitics of Postdigital Educational Development* also edited by Michael A.
