

Exploring Generative AI: A Comprehensive Overview

Generative AI - An Overview

Generative AI is a branch of artificial intelligence focused on developing algorithms and models capable of autonomously generating new data samples that closely resemble existing data. Generative AI models learn the underlying patterns and structures present in the training data and use that knowledge to generate new, novel outputs. Such outputs includes images, text, audio or even entire virtual environments. This potential to autonomously create new content raises ethical considerations regarding privacy, security, and the responsible use of AI-generated materials.

Working Mechanism of Generative AI Works

Generative AI functions on advanced machine learning algorithms like Generative Adversarial Networks and Variational Autoencoders. These models then generate new data samples by either directly sampling from learned distributions or by transforming existing data in creative ways to refine their ability to produce convincing outputs across various domains, including images, text, audio and more.

Readings in Artificial Intelligence and Databases John Mylopoulos, Michael L. Brodie, 2014-06-28 The interaction of database and AI technologies is crucial to such applications as data mining active databases and knowledge based expert systems This volume collects the primary readings on the interactions actual and potential between these two fields The editors have chosen articles to balance significant early research and the best and most comprehensive articles from the 1980s An in depth introduction discusses basic research motivations giving a survey of the history concepts and terminology of the interaction Major themes approaches and results open issues and future directions are all discussed including the results of a major survey conducted by the editors of current work in industry and research labs Thirteen sections follow each with a short introduction Topics examined include semantic data models with emphasis on conceptual modeling techniques for databases and information systems and the integration of data model concepts in high level data languages definition and maintenance of integrity constraints in databases and knowledge bases natural language front ends object oriented database management systems implementation issues such as concurrency control and error recovery and representation of time and knowledge incompleteness from the viewpoints of databases logic programming and AI

Teaching Information Seeking Jon Ostenson, 2025-05-30 Teaching Information Seeking redefines how we approach research and information literacy in today s information rich world inviting teachers to re imagine teaching research The book combines insights from fields such as library and information sciences journalism and media literacy to offer fresh strategies and perspectives for guiding students through evolving landscapes of information While a focus on concepts and skills has long been important in teaching research this book integrates significant new understandings about the role dispositions play in how well students embrace and utilize skill based knowledge The book provides conceptual knowledge and learning activities that support writing teachers as they help students learn throughout the research or inquiry process of asking questions finding information and sharing their learning purposefully and ethically Chapters with a pedagogical focus and approach include activities informed by the author s decades of experience teaching writing These activities are described in depth including assignment prompts sample work and scripts for think aloud protocols and discussions the author has led that engage students in deeper learning around these critical skills and dispositions Teaching Information Seeking serves as a comprehensive guide for educators looking to foster meaningful information literacy and critical thinking skills in their students This book is ideal for teachers and teacher educators who want to equip students with the skills and dispositions needed for effective research and information literacy Readers will find teacher friendly research grounded insights and activities that can be readily applied in the classroom

Human Factors and Design Yuri Spirochkin, 2023-02-27 This book describes various manifestations of human factors when interacting with potentially dangerous technical systems airplanes launch vehicles and spaceships nuclear power plants energy saturated ground

vehicles and infrastructure facilities The idea of the book arose from the desire to find a common ground between industries that are important for safety Their similarity lies in addition to the technological advancement of products and solutions in equally high safety requirements in particular taking into account the influence of human factor Thus it is of relevance to analyze an impact of human factor in the context of safety The matter is rather complex on the one hand humans manage technical systems on the other hand human errors negligence or evil intentions can turn the system into a threat with disastrous consequences However human interaction with any technical system begins earlier in the design stage In this stage designer being creator of the system must ensure a safe operation and take into consideration possible risks including those caused by human factors itself The book is interdisciplinary in nature and intended mainly for designers of technical systems aiming to assist the specialists in understanding the issues of human participation in life cycle of these systems The examples given are intended to benefit from experiences of not one but a number of industries

Competition and Intellectual Property Law in Ukraine Heiko Richter, 2023-01-22 This volume provides the most comprehensive contemporary academic writing on Ukrainian competition and intellectual property law in English Especially over the last few years these areas have been in considerable flux a main driver being the EU Ukraine Association Agreement The chapters cover a broad range of different topics and share a forward looking perspective They also outline the basic background that is necessary to understand the context of the issue discussed especially with regards to the legal system of Ukraine The publication is the result of a two year project and it is addressed to a wide range of international scholars practitioners and policy makers It aims to make the state of the art in Ukrainian legal scholarship visible and accessible to the international research community and to stimulate global debates in academia and politics Therefore it may be of interest and use to anyone who is interested in competition and intellectual property law and or in Ukraine
