Wildflowers and Plant Communities of the Southern Appalachian Mountains and Piedmont Timothy P. Spira, 2011-05-16 This richly illustrated field guide serves as an introduction to the wildflowers and plant communities of the southern Appalachians and the rolling hills of the adjoining piedmont Rather than organizing plants including trees shrubs and herbaceous plants by flower color or family characteristics as is done in most guidebooks botanist Tim Spira takes a holistic ecological approach that enables the reader to identify and learn about plants in their natural communities This approach says Spira better reflects the natural world as plants like other organisms don't live in isolation they coexist and interact in myriad ways Full color photo keys allow the reader to rapidly preview plants found within each of the 21 major plant communities described and the illustrated species description for each of the 340 featured plants includes fascinating information about the ecology and natural history of each plant in its larger environment With this new format readers can see how the mountain and piedmont landscapes form a mosaic of plant communities that harbor particular groups of plants The volume also includes a glossary illustrations of plant structures and descriptions of sites to visit Whether you're a beginning naturalist or an expert botanist this guidebook is a useful companion on field excursions and wildflower walks as well as a valuable reference Southern Gateways Guide is a registered trademark of the University of North Carolina Press

Davenport, 2010-08-08 Nature Journal is an innovative presentation of the best columns and photographs from L J Davenport's popular column in Alabama Heritage magazine. Readers of the magazine have come to relish his artful and often witty descriptions of common species encountered in the Alabama outdoors. But Nature Journal is designed to be much more than a mere collection of entertaining essays; it is also an educational tool, a means of instructing and encouraging readers in the art of keeping a nature journal for themselves. Each of the 25 chapters is a self-contained lesson in close observation of species morphology, behavior, and habitat; research in the literature; nondestructive capture of the subject by photography or drawing; and written description of the total observed natural phenomenon. At the end of each account, stimulating questions and gentle directives guide the reader into making his or her own observations and recordings. This book is intended for broad nature study use in Alabama and throughout the southeast by the general reader and nature enthusiast alike, as well as visitors to museums and outdoor centers and students of nature and nature writing at the high school and college levels. Beautifully designed to look like a personal journal, it is a perfect gift and treasured keepsake for all lovers of the natural world. Southern Region, 2004 **Orchids**, 2008 *Orchid Biology: Reviews and Perspectives* X Tiiu Kull, J. Arditti, Sek Man Wong, 2009-01-21 As stated many times before, the purpose of *Orchid Biology: Reviews and Perspectives* is to present reviews on all aspects of orchids. The aim is not to balance every volume but to make a balanced and wide-ranging presentation of orchids in the series as a whole. The chapters in this, the last volume of the series, range over a number of topics which were not covered before. Singapore is justly famed for its orchids. They can be seen on arrival or departure in its modern, highly efficient and comfortable Changi Airport and on the way from it to town. Vanda Miss Joaquim, the first hybrid to come from Singapore, became its National Flower. This natural hybrid can be seen on its currency stamps and public and private decorations. Many excellent breeders, starting with Prof Eric Holttum, who bred the first man-made hybrid *Spathoglottis* Primrose, produced numerous magnificent hybrids and won countless awards in Singapore and elsewhere. These hybrids served to enrich the country's orchid mystique. In the opening chapter of this volume, Dr Teoh Eng Soon, Western-style orchid breeder, grower, and author, writes about some of the breeders who contributed to the Singapore orchid fame. Prof Hans Fitting was one of the best-known plant physiologists of his time. As a young man, he studied the effects of pollen on orchid flowers. **National Forests in Alabama, Revised Land and**
