

An aerial photograph showing a coastal landscape. The top half of the image features a vast expanse of mangrove wetlands with a complex pattern of green and brown. A dark blue body of water, likely a bay or lagoon, is visible in the middle ground. Below the water, a multi-lane road with several vehicles is visible. The bottom half of the image shows a dense residential neighborhood with many houses having red-tiled roofs. The title 'Natural Experiments' is overlaid in large white letters across the middle of the image.

Natural Experiments Ecosystem Based Management And The Environment American And Comparative Environmental Policy:

Natural Experiments Judith A. Layzer, 2008 EBM entails collaborative landscape scale planning and flexible adaptive implementation American Environmental Policy, updated and expanded edition Christopher Mcgrory Klyza, David J. Sousa, 2013-08-30 An updated investigation of alternate pathways for American environmental policymaking made necessary by legislative gridlock The golden era of American environmental lawmaking in the 1960s and 1970s saw twenty two pieces of major environmental legislation including the Clean Air Act the Clean Water Act and the Endangered Species Act passed by bipartisan majorities in Congress and signed into law by presidents of both parties But since then partisanship the dramatic movement of Republicans to the right and political brinksmanship have led to legislative gridlock on environmental issues In this book Christopher Klyza and David Sousa argue that the longstanding legislative stalemate at the national level has forced environmental policymaking onto other pathways Klyza and Sousa identify and analyze five alternative policy paths which they illustrate with case studies from 1990 to the present appropriations politics in Congress executive authority the role of the courts next generation collaborative experiments and policymaking at the state and local levels This updated edition features a new chapter discussing environmental policy developments from 2006 to 2012 including intensifying partisanship on the environment the failure of Congress to pass climate legislation the ramifications of Massachusetts v EPA and other Obama administration executive actions some of which have reversed Bush administration executive actions Yet they argue despite legislative gridlock the legacy of 1960s and 1970s policies has created an enduring green state rooted in statutes bureaucratic routines and public expectations **Taking Sustainable Cities Seriously, second edition** Kent E. Portney, 2013-01-11 A theoretically driven comparison of sustainability programs in American cities updated with the latest research and additional case studies Today most major cities have undertaken some form of sustainability initiative Yet there have been few systematic comparisons across cities or theoretically grounded considerations of what works and what does not and why In *Taking Sustainable Cities Seriously* Kent Portney addresses this gap offering a comprehensive overview and analysis of sustainability programs and policies in American cities After discussing the conceptual underpinnings of sustainability he examines the local aspects of sustainability considers the measurement of sustainability and offers an index of serious sustainability for the fifty five largest cities in the country examines the relationship between sustainability and economic growth and discusses issues of governance equity and implementation He also offers extensive case studies with separate chapters on large medium size and small cities and provides an empirically grounded analysis of why some large cities are more ambitious than others in their sustainability efforts This second edition has been updated throughout with new material that draws on the latest research It also offers numerous additional case studies a new chapter on management and implementation issues and a greatly expanded comparative analysis of big city sustainability initiatives Portney shows

how cities use the broad rubric of sustainability to achieve particular political ends and he dispels the notion that only cities that are politically liberal are interested in sustainability Taking *Sustainable Cities Seriously* draws a roadmap for effective sustainability initiatives **Conceptual Innovation in Environmental Policy** James Meadowcroft, Daniel J.

Fiorino, 2017-09-29 Concepts and their role in the evolution of modern environmental policy with case studies of eleven influential concepts ranging from environment to sustainable consumption Concepts are thought categories through which we apprehend the world they enable but also constrain reasoning and debate and serve as building blocks for more elaborate arguments This book traces the links between conceptual innovation in the environmental sphere and the evolution of environmental policy and discourse It offers both a broad framework for examining the emergence evolution and effects of policy concepts and a detailed analysis of eleven influential environmental concepts In recent decades conceptual evolution has been particularly notable in environmental governance as new problems have emerged and as environmental issues have increasingly intersected with other areas Biodiversity for example was unheard of until the late 1980s negative carbon emissions only came into being over the last few years After a review of concepts and their use in environmental argument chapters chart the trajectories of a range of environmental concepts environment sustainable development biodiversity environmental assessment critical loads adaptive management green economy environmental risk environmental security environmental justice and sustainable consumption The book provides a valuable resource for scholars and policy makers and also offers a novel introduction to the environmental policy field through the evolution of its conceptual categories

Steinberg, Stacy D. Vandeveer, 2012-02-17 Combining the theoretical tools of comparative politics with the substantive concerns of environmental policy experts explore responses to environmental problems across nations and political systems How do different societies respond politically to environmental problems around the globe Answering this question requires systematic cross national comparisons of political institutions regulatory styles and state society relations The field of comparative environmental politics approaches this task by bringing the theoretical tools of comparative politics to bear on the substantive concerns of environmental policy This book outlines a comparative environmental politics framework and applies it to concrete real world problems of politics and environmental management After a comprehensive review of the literature exploring domestic environmental politics around the world the book provides a sample of major currents within the field showing how environmental politics intersects with such topics as the greening of the state the rise of social movements and green parties European Union expansion corporate social responsibility federalism political instability management of local commons and policymaking under democratic and authoritarian regimes It offers fresh insights into environmental problems ranging from climate change to water scarcity and the disappearance of tropical forests

and it examines actions by state and nonstate actors at levels from the local to the continental The book will help scholars and policymakers make sense of how environmental issues and politics are connected around the globe and is ideal for use in upper level undergraduate and graduate courses

Changing Climates in North American Politics Henrik Selin, Stacy D. VanDeveer, 2009 In this age of high fuel prices and concern with continuing availability of oil scientists are working on a number of approaches to alternate fuel sources These concerns may provoke interest in how some people in gas starved Europe dealt with such problems throughout the war years 1939-1945 One of the most successful innovations were the so called gas producer vehicles that utilized the by products of solid fuel combustion employing such solids as coal charcoal turf and wood to produce fuel gas for a standard internal combustion engine This book provides an overview of such vehicles including those used by the Wehrmacht Schematics of operating systems and the regulations concerning their use are also included along with a translated German illustrated operators manual Publisher

The Power of Narrative in Environmental Networks Raul Lejano, Merrill Ingram, Helen Ingram, 2013-07-26 Theory and case studies demonstrate the analytic potential of mutually constitutive narrative networks in environmental governance

Beyond Consensus Richard D. Margerum, 2011-08-19 An examination of how to move from consensus to implementation using collaborative approaches to natural resource management urban planning and environmental policy Collaborative approaches are increasingly common across a range of governance and policy areas Single issue single organization solutions often prove ineffective for complex contentious and diffuse problems Collaborative efforts allow cross jurisdictional governance and policy involving groups that may operate on different decision making levels In *Beyond Consensus* Richard Margerum examines the full range of collaborative enterprises in natural resource management urban planning and environmental policy He explains the pros and cons of collaborative approaches develops methods to test their effectiveness and identifies ways to improve their implementation and results Drawing on extensive case studies of collaborations in the United States and Australia Margerum shows that collaboration is not just about developing a strategy but also about creating and sustaining arrangements that can support collaborative implementation Margerum outlines a typology of collaborative efforts and a typology of networks to support implementation He uses these typologies to explain the factors that are likely to make collaborations successful and examines the implications for participants The rich case studies in *Beyond Consensus* which range from watershed management to transportation planning and include both successes and failures offer lessons in collaboration that make the book ideal for classroom use It is also designed to help practitioners evaluate and improve collaborative efforts at any phase The book's theoretical framework provides scholars with a means to assess the effectiveness of collaborations and explain their ability to achieve results

The Resistance Dilemma George Hoberg, 2021-08-17 How organized resistance to new fossil fuel infrastructure became a political force and how this might affect the transition to renewable energy Organized resistance to new fossil fuel infrastructure particularly conflicts over pipelines has become a formidable political force in

North America In this book George Hoberg examines whether such place based environmental movements are effective ways of promoting climate action if they might inadvertently feed resistance to the development of renewable energy infrastructure and what other more innovative processes of decision making would encourage the acceptance of clean energy systems Focusing on a series of conflicts over new oil sands pipelines Hoberg investigates activists strategy of blocking fossil fuel infrastructure often in alliance with Indigenous groups and examines the political and environmental outcomes of these actions After discussing the oil sands policy regime and the relevant political institutions in Canada and the United States Hoberg analyzes in detail four anti pipeline campaigns examining the controversies over the Keystone XL the most well known of these movements and the first one to use infrastructure resistance as a core strategy the Northern Gateway pipeline the Trans Mountain pipeline and the Energy East pipeline He then considers the resistance dilemma the potential of place based activism to threaten the much needed transition to renewable energy He examines several episodes of resistance to clean energy infrastructure in eastern Canada and the United States Finally Hoberg describes some innovative processes of energy decision making including strategic environment assessment and cumulative impact assessment looking at cases in British Columbia and Lower Alberta

State and Environment Andreas Duit,2014-05-30 This volume of comparative studies documents the continuing relevance of the state in environmental politics and policy The book also demonstrates the analytical power of the comparative approach to the study of environmental politics and policy offering cross national comparisons of environmental governance in both developed and developing countries Some chapters are based on qualitative studies from a small number of countries others offer statistical analyses of quantitative data from many more countries over a longer time period

Capacity-Building and the Water-Energy-Food Nexus Maureen Papas,2023-12-22 This book critically explores how the water energy food nexus can be used as an organising framework to address environmental degradation and promote sustainable development Building effective and sustainable mechanisms to tackle environmental problems requires in depth understanding of relationships between natural resources going beyond conventional policy and siloed decision making The water energy food nexus has been promoted as a conceptual framework and management tool to facilitate integrated planning and practical linkages to support sustainable development The author opens this book with an overview of capacity building and reviews the significance of the water energy food nexus bringing in links to the 2030 Agenda Climate change is highlighted as a key consideration in any conversation about natural resource use and case studies from Japan India and China are utilised to show that whilst long term sustainable development practices are being implemented the environmental challenges across the region raise concerns about institutional capacity economic sustainability and future of the region Finally through the lens of capacity building the book suggests that whilst the water energy food nexus may provide a new approach to sustainable development it will not be enough to achieve long term sustainability or extend to the lives of those most affected This section is unchanged This book will be of interest to students

scholars and practitioners working in the water energy agriculture sectors and keen to adopt a transdisciplinary approach to public policy comparative politics and international relations It will also be a valuable resource to those working in governmental organisations and NGOs involved in capacity building and development *Carbon Captured* Matto Mildenerger, 2020-02-18 A comparative examination of domestic climate politics that offers a theory for cross national differences in domestic climate policymaking Climate change threatens the planet and yet policy responses have varied widely across nations Some countries have undertaken ambitious programs to stave off climate disaster others have done little and still others have passed policies that were later rolled back In this book Matto Mildenerger opens the black box of domestic climate politics examining policy making trajectories in several countries and offering a theoretical explanation for national differences in the climate policy process Mildenerger introduces the concept of double representation when carbon polluters enjoy political representation on both the left through industrial unions fearful of job loss and the right through industrial business associations fighting policy costs and argues that different climate policy approaches can be explained by the interaction of climate policy preferences and domestic institutions He illustrates his theory with detailed histories of climate politics in Norway the United States and Australia along with briefer discussions of policies in Germany Japan the United Kingdom and Canada He shows that Norway systematically shielded politically connected industrial polluters from costs beginning with its pioneering carbon tax the United States after the failure of carbon reduction legislation finally acted on climate reform through a series of Obama administration executive actions and Australia's Labor and Green parties enacted an emissions trading scheme which was subsequently repealed by a conservative Liberal party government Ultimately Mildenerger argues for the importance of political considerations in understanding the climate policymaking process and discusses possible future policy directions

Can We Price Carbon? Barry G. Rabe, 2018-04-06 A political science analysis of the feasibility and sustainability of carbon pricing drawing from North American European and Asian case studies Climate change economists generally agree is best addressed by putting a price on the carbon content of fossil fuels by taxing carbon by cap and trade systems or other methods But what about the politics of carbon pricing Do political realities render carbon pricing impracticable In this book Barry Rabe offers the first major political science analysis of the feasibility and sustainability of carbon pricing drawing upon a series of real world attempts to price carbon over the last two decades in North America Europe and Asia Rabe asks whether these policies have proven politically viable and if adopted whether they survive political shifts and managerial challenges over time The entire policy life cycle is examined from adoption through advanced implementation on a range of pricing policies including not only carbon taxes and cap and trade but also such alternative methods as taxing fossil fuel extraction These case studies Rabe argues show that despite the considerable political difficulties carbon pricing can be both feasible and durable *Networking the Bloc* Klara Kemp-Welch, 2019-02-12 The story of the experimental zeitgeist in Eastern European art seen through personal encounters

pioneering dialogues collaborative projects and cultural exchanges Throughout the 1970s a network of artists emerged to bridge the East West divide and the no less rigid divides between the countries of the Eastern bloc Originating with a series of creative initiatives by artists art historians and critics and centered in places like Budapest Pozna and Prague this experimental dialogue involved Western participation but is today largely forgotten in the West In *Networking the Bloc* Klara Kemp Welch vividly recaptures this lost chapter of art history documenting an elaborate web of artistic connectivity that came about through a series of personal encounters pioneering dialogues collaborative projects and cultural exchanges Countering the conventional Cold War narrative of Eastern bloc isolation Kemp Welch shows how artistic ideas were relayed among like minded artists across ideological boundaries and national frontiers Much of the work created was collaborative and personal encounters were at its heart Drawing on archival documents and interviews with participants Kemp Welch focuses on the exchanges and projects themselves rather than the personalities involved Each of the projects she examines relied for its realization on a network of contributors She looks first at the mobilization of the network from 1964 to 1972 exploring five pioneering cases a friendship between a Slovak artist and a French critic an artistic credo an exhibition a conceptual proposition and a book She then charts a series of way stations for experimental art from the Soviet bloc between 1972 and 1976 points of distribution between studios private homes galleries and certain cities Finally she investigates convergences a succession of shared exhibitions and events in the second half of the 1970s in locations ranging from Prague to Milan to Moscow *Networking the Bloc* Kemp Welch invites us to rethink the art of the late Cold War period from Eastern European perspectives

Effective Advocacy Mary Alice Haddad, 2021-03-23 An examination of successful environmental advocacy strategies in East Asia that shows how advocacy can be effective under difficult conditions The countries of East Asia China Japan South Korea and Taiwan are home to some of the most active and effective environmental advocates in the world And the governments of these countries have adopted a range of innovative policies to fight pollution and climate change Japan leads the world in emissions standards China has become the world's largest producer of photovoltaic panels and Taiwan and Korea have undertaken major green initiatives In this book Mary Alice Haddad examines the advocacy strategies that persuaded citizens governments and businesses of these countries to change their behavior

Fiorino, Rosemary O'Leary, 2017-08-25 Key topics in the ongoing evolution of environmental governance with new and updated material This survey of current issues and controversies in environmental policy and management is unique in its thematic mix broad coverage of key debates and in depth analysis The contributing authors all distinguished scholars or practitioners offer a comprehensive examination of key topics in the continuing evolution of environmental governance with perspectives from public policy public administration political science international relations

sustainability theory environmental economics risk analysis and democratic theory The second edition of this popular reader has been thoroughly revised with updated coverage and new topics The emphasis has shifted from sustainability to include sustainable cities from domestic civic environmentalism to global civil society and from global interdependence to the evolution of institutions of global environmental governance A general focus on devolution of authority in the United States has been sharpened to address the specifics of contested federalism and fracking and the treatment of flexibility now explores the specifics of regulatory innovation and change New chapters join original topics such as environmental justice and collaboration and conflict resolution to address highly salient and timely topics energy security risk assessment communication and technology innovation regulation by revelation and retrospective regulatory analysis The topics are organized and integrated by the book's 3R framework reconceptualizing governance to reflect ecological risks and interdependencies better reconnecting with stakeholders and reframing administrative rationality Extensive cross references pull the chapters together A broad reference list enables readers to pursue topics further Contributors Regina S Axelrod Robert F Durant Kirk Emerson Daniel J Fiorino Anne J Kantel David M Konisky Michael E Kraft Jennifer Kuzma Richard Morgenstern Tina Nabatchi Rosemary O Leary Barry Rabe Walter A Rosenbaum Stacy D VanDeveer Paul Wapner

Reclaiming the Atmospheric Commons Leigh Raymond, 2016-09-23 How the Regional Greenhouse Gas Initiative created a new paradigm in climate policy by requiring polluters to pay for their emissions for the first time In 2008 a group of states in the northeast United States launched an emissions trading program the Regional Greenhouse Gas Initiative RGGI With RGGI these states Connecticut Delaware Maine Maryland Massachusetts New Hampshire New Jersey New York Rhode Island and Vermont achieved what had been considered politically impossible they forced polluters to pay the public for their emissions The states accomplished this by conducting auctions of emissions allowances by 2014 they had raised more than 2.2 billion in revenues In this first in depth examination of RGGI Leigh Raymond describes this revolutionary and influential policy model and explains the practical and theoretical implications for climate policy Other cap and trade schemes had been criticized for providing private profits rather than public benefits allowing private firms to make money by buying and selling valuable rights to pollute RGGI by contrast directed virtually all emissions auction revenues to programs benefiting the public at large By reframing the issue in terms of public benefits environmental advocates emphasized the public ownership of the atmospheric commons and private corporations responsibility to pay for their use of it Raymond argues that this kind of normative reframing is significant not only for environmental policy making but also for theories of the policy process helping to explain and predict sudden policy change

Failed Promises David M. Konisky, 2015-03-27 A systematic evaluation of the implementation of the federal government's environmental justice policies In the 1970s and 1980s the U S Congress passed a series of laws that were milestones in environmental protection including the Clean Air Act and the Clean Water Act But by the 1990s it was clear that environmental benefits were not evenly distributed and that poor and minority

communities bore disproportionate environmental burdens The Clinton administration put these concerns on the environmental policy agenda most notably with a 1994 executive order that called on federal agencies to consider environmental justice issues whenever appropriate This volume offers the first systematic empirically based evaluation of the effectiveness of the federal government's environmental justice policies The contributors consider three overlapping aspects of environmental justice distributive justice or the equitable distribution of environmental burdens and benefits procedural justice or the fairness of the decision making process itself and corrective justice or the fairness of punishment and compensation Focusing on the central role of the Environmental Protection Agency they discuss such topics as facility permitting rulemaking participatory processes bias in enforcement and the role of the courts in redressing environmental injustices Taken together the contributions suggest that despite recent environmental justice initiatives from the Obama administration the federal government has largely failed to deliver on its promises of environmental justice Contributors Dorothy M Daley Eileen Gauna Elizabeth Gross David M Konisky Douglas S Noonan Tony G Reames Christopher Reenock Ronald J Shadbegian Paul Stretesky Ann Wolverton *Multilevel Environmental Governance* Inger Weibust, James Meadowcroft, 2014-03-28 The literature on Multi level governance MLG an approach that explicitly looks at the system of the many interacting authority structures at work in the global political economy has grown significantly over the last decade The authors in this volume
