Natural Language Parsing And Linguistic Theories Studies In Linguistics And Philosophy:

Natural Language Parsing and Linguistic Theories U. Reyle, C. Rohrer, 2012-12-06 presupposition fails we now give a short introduction into Unification Grammar Since all implementations discussed in this volume use PROLOG with the exception of BlockjHaugeneder we felt that it would also be useful to explain the difference between unification in PROLOG and in UG After the introduction to UG we briefly summarize the main arguments for using linguistic theories in natural language processing We conclude with a short summary of the contributions to this volume UNIFICATION GRAMMAR 3 Feature Structures or Complex Categories Unification Grammar was developed by Martin Kay Kay 1979 Martin Kay wanted to give a precise definition and implementation of the notion of feature Linguists use features at nearly all levels of linguistic description In phonetics for instance the phoneme b is usually described with the features bilabial voiced and nasal In the case of b the first two features get the value the third nasal gets the value Feature value pairs in phonology are normally represented as a matrix bilabial voiced I nasal Feature matrix for b In syntax features are used for example to distinguish different noun classes The Latin noun murus would be characterized by the following feature value pairs gender masculine number singular case nominative pred murus Besides a matrix representation one frequently finds a graph representation for feature value pairs The edges of the graph are labelled by features The leaves denote the value of a feature *Reference and Anaphoric Relations* H.K. von Stechow, U. Egli, 2012-12-06 This book is a collection of original research articles on the representation and interpretation of indefinite and definite noun phrases anaphoric pronouns and closely related issues such as reference scope and quantifier movement A variety of frameworks for the formal analysis of discourse semantics are represented including discourse representation theory file change semantics dynamic Logic E type theories and choice function approaches which was one of the main issues the Konstanz project were concerned with All of these frameworks are couched in the tradition of Montague Grammar even though they extend the classical formalism in different directions The developments emerged from the modern discussion of problems for the representation of cross sentential anaphoric relations involving pronouns and the interpretation of definite and indefinite noun phrases After a decade of controversy these approaches are merging together enriching each other's formal mechanisms rather than expressing opposition Thus the articles in this volume concentrate on fundamental semantic questions and also extend the current formalisms in order to capture more data The roots of this book lie in the workshop Reference and Anaphoric Relations which was held at the University of Konstanz in June 1996 Five main issues were discussed i the Stoic and scholastic treatment of reference and anaphora ii quantification and scope iii anaphoric reference iv the representation of indefinite NPs with choice functions and v the relation between linguistic expressions their representations and their meanings *Studies in Language*, 1991

The Semantics of Media J. Ross, 2012-12-06 Media are objects with content and character that we describe using in phrases in the story in the picture in the movie in the dream Like the propositional attitudes these objects present a variety

of hard problems for semantic and philosophical analysis The Semantics of Media is an organized exploration of fundamental questions in the semantics of media The first three chapters set out a straightforward model within the possible worlds framework and consider how it might account for a range of notions applying to media generally implicit vs explicit content propositional vs individual content causal vs intentional content and the idea of a single World of the Medium The final three chapters examine ways of elaborating the model to cover a range of phenomena keyed to the functionality of particular forms of media Chapter Four is a discussion of fiction and our apparent reference to fictional characters Chapter Five deals with the phenomenon of viewpoint in pictorial media Chapter Six is a study of interactions between users and characters of media centering on the puzzling case of seeing in films The Semantics of Media will be of interest to specialists in the fields of linguistics philosophy and communications

Predicates and Their Subjects Susan Rothstein, 2012-12-06 Predicates and their Subjects is an in depth study of the syntax semantics interface focusing on the structure of the subject predicate relation Starting from where the author's 1983 dissertation left off the book argues that there is syntactic constraint that clauses small and tensed are constructed out of a one place unsaturated expression the predicate which must be applied to a syntactic argument its subject The author shows that this predication relation cannot be reduced to a thematic relation or a projection of argument structure but must be a purely syntactic constraint Chapters in the book show how the syntactic predication relation is semantically interpreted and how the predication relation explains constraints on DP raising and on the distribution of pleonastics in English The second half of the book extends the theory of predication to cover copular constructions it includes an account of the structure of small clauses in Hebrew of the use of be in predicative and identity sentences in English and concludes with a study of the meaning of the verb be

Кабакчиев, 1989 *Aspect in English* K. Kabakchiev, 2013-03-09 Based on an earlier edition published in 1992 in Bulgarian this book offers a specific approach to one of the most controversial problems in linguistics According to it aspect is the result of a subtle and complex interplay between the referents of verbs and nouns in the sentence Special attention is paid to the role nouns and noun phrases play in the explication of aspect in English and similar languages The grammatical marking of aspect is shown to be a compensatory phenomenon imposed by language structure Comparisons made using Slavic mainly Bulgarian data reveal that compositional aspect is a mirror image of verbal aspect When explicated compositionally aspect is also determined by pragmatic factors Ultimately it is part of man's cognitive potential

The Humanities Computing Yearbook 1989-1990 Ian Lancashire, 1991 This is the second in a series of comprehensive annual reference guides to the use of computers in all the disciplines of the humanities Like its predecessor this volume provides a taxonomy of the field and an annotated survey of publications research centers text archives and termbanks electronic communications software and hardware relevant to the humanities It also includes special larger entries for important software that offer up to date information and practical help in applying that information to research projects and instruction in colleges and universities For the 1989 1990 edition

Lancashire has for the first time appointed an international advisory board of specialists to assist in discovering assembling and evaluating materials for inclusion and to keep up with the rapidly developing nature of the field and its international constituency Lancashire has included many completely new or revised sections including a major new chapter on computing in Law A monumental work of current and enduring value The Humanities Computing Yearbook will prove invaluable to a wide range of students teachers and researchers in humanities and social sciences computational linguistics and related fields in computer science

BLL ,1991 **Linguistics and Language Behavior Abstracts** ,1999 **Ellipsis and Nonsentential Speech** Reinaldo Elugardo, Robert J. Stainton, 2005-08-26 The papers in this volume address two main topics Q1 What is the nature and especially the scope of ellipsis in natural language Q2 What are the linguistic philosophical implications of what one takes the nature scope of ellipsis to be As will emerge below each of these main topics includes a large sub part that deals specifically with nonsentential speech Within the first main topic Q1 there arises the sub issue of whether nonsentential speech falls within the scope of ellipsis or not within the second main topic Q2 there arises the sub issue of what linguistic philosophical implications follow if nonsentential speech does not count as ellipsis

THE NATURE AND SCOPE OF ELLIPSIS A General Issue How Many Natural Kinds There are many things to which the label ellipsis can be readily applied But it's quite unclear whether all of them belong in a single natural kind To explain consider a view assumed in Stainton 2000 Stainton 2004a and elsewhere It is the view that there are fundamentally at least three very different things that readily get called ellipsis each belonging to a distinct kind First there is the very broad phenomenon of a speaker omitting information which the hearer is expected to make use of in interpreting an utterance Included therein possibly as a special case is the use of an abbreviated form of speech when one could have used a more explicit expression See Neale 2000 and Sellars 1954 for more on this idea
