Natural Theology Natural Theology:

Natural Theology Rev. Bernard Boedder, 1896 **The Openness of Being** Eric Lionel Mascall, 1971 *Lectures and Essays on Natural Theology and Ethics* William Wallace, 1898 *On Natural Theology* Thomas Chalmers, 2024-04-28 Reprint of the original first published in 1845 **Natural Theology** William Paley, 1828 *Natural Theology* William Paley, 1802

Natural Theology Andrew Ter Ern Loke, 2026 *Natural Theology A Reassessment* offers corrections to widespread misinterpretations of the authoritative sources of Christian theology and shows that these sources affirm a traditional view of natural theology that refers to what can be rationally believed about God without using religious doctrines as premises. Contrary to popular misconceptions Hume and Kant did not successfully rebut the arguments of natural theology which are still being defended today. This book develops a more rigorous deductively valid formulation of the Cosmological Teleological and Moral Arguments for the existence of God and shows how the truth of their premises can be defended thus demonstrating the soundness of these arguments which show that God exists. Using a unique approach which engages with philosophical theology of both analytic and continental traditions it offers new arguments to address longstanding problems in epistemology of theology concerning foundationalism epistemic circularity divine transcendence the culturally variant notion of human reason the lack of consensus and the accusation of anthropomorphism and ontotheology and provides a thorough response to theological objections. The author develops a multidisciplinary approach involving theology philosophy of religion natural sciences social sciences and biblical studies to move the discussion ahead in a new and significant way. Provided by publisher *The Bible, Natural Theology and Natural Law: Conflict Or Compromise?* Robert A. Morey, 2010-05. Dr Robert Morey's study of natural law and natural theology raises important questions that every Bible believer will want answered. His careful study and explanation of various Bible passages will yield a useful orientation to the classic arguments furnished us by the Reformers and their faithful heirs. Dr Nelson Kloosterman: The present volume presents a devastating critique of natural theology and natural law. Its argument is solidly biblical and its accumulation of biblical data is overwhelming. I hope that God prospers it so that many will read it and take heed. Dr John Frame: A. W. Tozer said the most important thing about any person is what comes into their mind when they think of the word God. If you digest Dr Morey's book you will think of God as the glorious One depicted in Holy Scripture. John G. Reisinger: I appreciate Dr Morey's emphasis on making the Bible alone the theoretical basis for science and the arts. All throughout the book he consistently points to the Scriptures as the basis for sustaining everything else. Dr Simon Kistemaker **Natural Theology** David Haines, 2021-12-02. Christians affirm that Scripture alone reveals truths about God which cannot be known by mere reason such as the Trinity or the Gospel itself. But how do we account for Scripture's apparent talk of a knowledge of God possible solely from creation? Or for our own sense of the divine in nature? Or for the startling insights of ancient philosophers about the nature of God? The answer: natural theology. Often misrepresented as a fruitless human attempt to comprehend God, natural theology has in fact

been a significant part of Christian theology throughout history. It has shaped the Christian doctrine of God and provided a starting point for evangelizing non-Christians. In an age when theologians and missionaries alike are in need of stronger doctrinal foundations, it is a doctrine as vital as ever. In this brief guide, David Haines first outlines the biblical basis for natural theology, suggesting that if Scripture is correct, certain truths about God should be well attested by non-Christians. A thorough historical survey demonstrates that this is indeed the case and that the Church has long made use of that which is revealed to reason in order to serve Christ who is revealed to faith.

Natural Theology William Paley, 2006-04-13 The consciousness of knowing little need not beget a distrust of that which he does not know. In *Natural Theology*, William Paley set out to prove the existence of God from the evidence of the beauty and order of the natural world. Famously beginning by comparing the world to a watch whose design is self-evident, he goes on to provide examples from biology, anatomy, and astronomy in order to demonstrate the intricacy and ingenuity of design that could only come from a wise and benevolent deity. Paley's legalistic approach and skilful use of metaphor and analogy were hugely successful and equally controversial. Charles Darwin, whose investigations led to very different conclusions in *The Origin of Species*, was greatly influenced by the book's cumulative structure and accessible style. This edition reprints the original text of 1802 and sets the book in the context of the theological, philosophical, and scientific debates of the nineteenth century.

Constructive Natural Theology Newman Smyth, 1913 **Natural Theology** Milton Valentine, 1885 [The Blackwell Companion to Natural Theology](#) William Lane Craig, J. P. Moreland, 2009-05-06 With the help of in-depth essays from some of the world's leading philosophers, *The Blackwell Companion to Natural Theology* explores the nature and existence of God through human reason and evidence from the natural world. Provides in-depth and cutting-edge treatment of natural theology's main arguments. Includes contributions from first-rate philosophers well known for their work on the relevant topics. Updates relevant arguments in light of the most current state of the art philosophical and scientific discussions. Stands in useful contrast and opposition to the arguments of the new atheists.

On Natural Theology Thomas Chalmers, 1850 **A Christian Natural Theology** John B. Cobb, 1965 This important and profoundly original book is written in the belief that the church has a fighting chance of restoring to modern man the wholeness of vision he seeks in the midst of fragmentation that fragmentation characteristic of every human apprehension and especially evident today in the splintered specialization of contemporary thought. Spiritual and intellectual health lie in the synthesizing of our religious convictions with understanding of nature and man. Contemporary cosmology inspired by science has been the dominant factor in undermining the Christian faith. A Christian natural theology is needed, says the author, and is of ultimate importance for the survival and integrity of the church. Rigorous philosophical reasoning alone can show the way to a world view that correlates Christianity and science, faith and intellect. With clarity and brilliance, Dr. Cobb presents here a comprehensive, cohesive, and coherent Christian natural theology derived with both logic and intuition from the philosophy of Alfred North Whitehead, greatest of twentieth-century

philosophers and one of the most creative thinkers of all time Whitehead's particular genius for synthesis resulted in a unification of all the compelled components of science logic and mathematics of social aesthetic moral and religious experience this totality plus the Christian vision of reality which was his starting point makes him extraordinary to a new completeness in Christian thinking the author not only explains how Whitehead's system makes tenable the personal God that many philosophical systems reject but draws out the great philosopher's thought in theological contexts Chapter 1 introduces the reader to Whitehead's total scheme of thought Chapter 2 analyzes his ideas on the nature of man which relate to theological anthropology Chapter 3 summarizes Whitehead's theories of value and draws deductions for ethics chapters 4 and 5 trace the development of his thought about God and suggest a systematic doctrine of God dependent upon Whitehead's philosophy but nevertheless differing from some of his explicit statements Chapter 6 breaks new ground in the interpretation of various religious experiences in Whiteheadian terms chapter 7 explicates the nature of philosophy and theology and compares them as methods This book is a necessity not only for students of theology and philosophy but for any minister or Christian layman who would try to communicate with the estranged intelligentsia to combat nihilism with knowledge to convey the possibility of an organic view of the universe with a Christian God at center Publisher The Reformed Objection to Natural Theology Dr Michael Sudduth,2013-06-28 Michael Sudduth examines three prominent objections to natural theology that have emerged in the Reformed streams of the Protestant theological tradition objections from the immediacy of our knowledge of God the noetic effects of sin and the logic of theistic arguments Distinguishing between the project of natural theology and particular models of natural theology Sudduth argues that none of the main Reformed objections is successful as an objection to the project of natural theology itself One particular model of natural theology the dogmatic model is best suited to handle Reformed concerns over natural theology According to this model rational theistic arguments represent the reflective reconstruction of the natural knowledge of God by the Christian in the context of dogmatic theology Informed by both contemporary religious epistemology and the history of Protestant philosophical theology Sudduth's examination illuminates the complex nature of the project of natural theology and its place in the Reformed tradition **A Christian Natural Theology** John B. Cobb,2007-01-01 When the first edition of A Christian Natural Theology appeared in 1965 it was a groundbreaking work that incorporated Alfred North Whitehead's metaphysical philosophy as a framework for developing a Christian natural theology The work was so significant it helped to launch process theology as a leading alternative to neo orthodox theology and has since become a classic in the literature of process theology This new edition by one of America's preeminent theologians is an essential work for all those interested in process theology **The Testimony of Natural Theology to Christianity** Thomas Gisborne,1818 **An Introduction to Natural Theology** Maurice R. Holloway,1959 **The Testimony of Natural Theology to Christianity** Thomas GISBORNE (the Elder, Prebendary of Durham.),1818
