Arts in Nature with Children and Young People Zoe Moula, Nicola Walshe, 2024-12-23 This novel text brings together research and practice on the

intersection between arts and nature and their impact on children and young people's wellbeing, health, equality and sustainability. Existing literature focuses on either the impact of the arts or the impact of being in with nature on children's and young people's wellbeing. However, the intersection between the two arts and nature and their combined effect on wellbeing has received limited attention. Through five research-based and seven practice-based chapters, this book draws upon arts in nature practices that incorporate visual arts, music, movement, drama and poetry in a range of natural environments such as forests, beaches, greenhouses, parks, community areas and school playgrounds. *Arts in Nature with Children and Young People* will appeal to anyone working with children and young people, including mental health and healthcare professionals, teachers, researchers, artists and arts therapists. It is also an accessible guide for parents and families looking for inspiration and ideas for creative and outdoor activities. *Teaching Green - The High School Years* Tim Grant, Gail Littlejohn, 2013-09-23 This resource is ideal for anyone working with young people in grades 9-12, whether in schools or in non-formal educational settings. Richly illustrated, it offers fifty teaching strategies that promote learning about natural systems and foster critical thinking about environmental issues, both local and global. It contains new approaches to learning strategies for living sustainably and numerous activities that promote interdisciplinary learning. In addition, the book provides suggestions for how best to green individual subject areas, develop integrated learning programs or replicate exemplary programs created by innovative schools and communities. Containing contributions from over sixty educators from across North America, the book's strength lies in its diverse content. Readers learn how best to apply systems thinking, teach about controversial issues and use a step-by-step approach to creative problem solving in environmental projects. Also provided are instructions for measuring the ecological footprint of a high school, creating an indoor living system that cleans water, monitoring air quality with lichens and using green technologies to help green school campuses. Many articles and activities engage teenagers in outdoor learning and community restoration projects. Suggestions are included for connecting students with special needs to the environment around them. Readers will find accessible background information and suggestions for many practical projects and activities. It is sure to appeal to a wide range of teachers, educators and parents seeking innovative ideas for incorporating green themes into their programs. Tim Grant and Gail Littlejohn are the editors of *Green Teacher* magazine, North America's award-winning environmental teaching resource. *Nature and Spirituality During the Early Years* Ruth Wilson, 2025-10-15 This practical and easy-to-read guide shows you how to integrate nature, connectedness and spiritual development into your early childhood teaching, whether in a nature-based forest program or a more traditional one. It uses a research-based framework to illustrate ways nature and spirituality can contribute to quality of life during the early childhood years and beyond. Detailing favourable conditions for supporting children's connectedness to nature and spiritual development, including positive relationships with adults and peers, violence-free environments and respect for other living things, the book emphasizes the idea of children's whole-body engagement, challenging the idea that

spirituality is relevant to the mind and spirit only This guidebook is essential reading for all early childhood educators program directors families and anyone working with children and young people **Young Israel** ,1907 **Basic Concepts of Psychiatric-mental Health Nursing** Louise Rebraca Shives,2007 This seventh edition includes new chapters and maintains popular features from previous editions such as self awareness prompts while adding research boxes and student worksheets at the end of each chapter *San Bernardino National Forest (N.F.)
