The history of food is not as straightforward as it may seem. Food isn't just food. It is ritual, tradition and memory. So begins Ann Cooper's groundbreaking new book on the history of sustenance. Cooper, a renowned chef and graduate of New York's famed Culinary Institute of America, expertly guides us from the roots of agriculture in North America through the profound changes initiated by the Industrial Revolution all the way up to the present day, offering analyses of recent controversies such as Europe's campaign against Frankenfood and the genetic engineering of plants and animals in the United States. Throughout, Cooper takes both a macro and micro approach, examining the effect politics, technology, war, international trade and agribusiness have had on the world's food supply as well as the changing social patterns which have made a family meal at the table almost a relic of the past. Did you know 80% of chicken has salmonella? By the year 2010 95 percent of items bought at the grocery store may be consumed within 20 minutes of getting them home. Cancer researchers believe that over one third of all future cancers will be diet related, roughly the same proportion now attributable to smoking. Passionate, political, informed and engaging, *Bitter Harvest* is filled with fascinating facts and anecdotes. Cooper offers a comprehensive analysis of the issue of sustainability, arguing persuasively why we must begin to change everything from the way food is shipped to the basic components of our diets. Touching on virtually every aspect of the food culture, *Bitter Harvest* is a vibrant example of the emergence of the chef as a political voice to be reckoned with. A food manifesto for the new millennium, it is a must read for anyone concerned with health, nutrition and the future of our planet. You will never look at your dinner plate in quite the same way again. *Nature Cures* James C. Whorton, 2002-09-26. From reflexology and rolfing to shiatsu and dream work, we are confronted today by a welter of alternative medical therapies. But as James Whorton shows in *Nature Cures*, the recent explosion in alternative medicine actually reflects two centuries of competition and conflict between mainstream medicine and numerous unorthodox systems. This is the first comprehensive history of alternative medicine in America, examining the major systems that have emerged from 1800 to the present. Writing with wit and with fairness to all sides, Whorton offers a fascinating look at alternative health systems such as homeopathy, water cures, Mesmerism, Christian Science, osteopathy, chiropractic, naturopathy and acupuncture. He highlights the birth and growth of each system, including European roots where appropriate, and vividly describes both the theories and the therapies developed within each system, including such dubious practices as hour-long walks barefoot in snow or Samuel Thompson's puking and steaming regimen. In particular, Whorton illuminates the philosophy of natural healing that has been espoused by alternative practitioners throughout history and the distinctive interpretations of nature cure developed by the different

systems Though he doesn't hesitate to point out the failings of these systems he also shows that some cult medicines have eventually won recognition from practitioners of mainstream medicine Throughout Whorton writes with a light touch and quotes from contemporary humorists such as Mark Twain His book is an engaging and authoritative history that highlights the course of alternative medicine in the U S providing valuable background to the wide range of therapies available today
