methods of performance appraisal are conducted in order to analyze performance evaluation characteristics relative to the
requirements of the CSRA for performance appraisal The results of this analysis were then compared to specific positions
within Naval activity comptroller departments to demonstrate how the basis for a standardized framework for evaluations
can be developed for Navy wide applications Sets of potential critical elements for three specific positions were derived
based on this framework and an example of performance standards for a specific critical element was shown In conclusion
this thesis makes several recommendations for ensuring that the intent of the CSRA requirement for flexibility of
performance evaluation is maintained while allowing guidance and standardization from higher authority Author *Papers*
