Navigating Technomedia Caught In The Web Sam Han:

Navigating Technomedia Sam Han, 2008 This is an introductory survey of what the author calls the technomedia the generation of communication technologies after television cell phones and the first wave of the Internet Beginning with a history of media the book explores the nature and effects of technomedia like the blogosphere Blackberries and related technologies Because they are transforming the relations of their users to the social environment the topic is fast becoming an important focus of modern social theory **Americans Thinking America** Charles Lemert, 2025-01-31 In this dynamic book Charles Lemert elaborates a vigorous distinctive and creative American tradition in social thought American social theory has tended to be overshadowed by European social thought Yet looking deeper Americans have always made important contributions to social theory Drawing upon the work of a dazzling array of both seminal and unjustly overlooked philosophers sociologists litterateurs and political activists Lemert constructs a coherent yet variegated intellectual framework for understanding American social theory and culture from the colonial era to the present In doing so Lemert analyses American intellectual attitudes on race gender popular culture political thought capitalism and social movements while also exploring schools of thought from transcendentalism and pragmatism to interactionism and intersectionality In his inimitable style Charles Lemert a master of finding theory where you d least expect it offers a masterful rendering of the American tradition in social theory In doing so Lemert shines new light on social theory and American history Both authoritative and accessible this indispensable work will be essential reading for students scholars and general readers with interests in social theory and American social history **Web 2.0** Sam Han, 2012-03-29 Examining the arrival of Web 2 0 in accessible language as a multidimensional socio technological process this book provides and introduction to everything you ever wanted to know about Web 2 0 and the surrounding social impacts arising from our regular use of the Internet **The Routledge Companion to Social Theory** Anthony Elliott, 2009-12-04 A collection of introductory essays by an international range of contributors giving an insightful overview of classical and contemporary social theory No Family History Sabrina McCormick, 2009-06-16 No Family History presents compelling evidence of environmental links to breast cancer ranging from everyday cosmetics to industrial waste Sabrina McCormick weaves the story of one survivor with no family history into a powerful exploration of the big business of breast cancer As drugs pink products and corporate sponsorships generate enormous revenue to find a cure a growing number of experts argue that we should instead increase focus on prevention reducing environmental exposures that have contributed to the sharp increase of breast cancer rates But the dollars continue to pour into the search for a cure and the companies that profit including some pharmaceutical and cosmetics companies may in fact contribute to the environmental causes of breast cancer No Family History shows how profits drive our public focus on the cure rather than prevention and suggests new ways to reduce breast cancer rates in the future *Silence and Society* Charles Lemert, 2025-07-31 Silence and Society addresses the reality that social sciences have ignored the

importance of silence in human communication Without communication there is no community and thus no society Yet as classic communication theory explains communication must always deal with noise Increasingly as cyber technologies and media have gained the upper hand in social life so have they become purveyors of empty noise from mindless sitcom television to uninformed talk radio to cable news blather and more The book is organized into three sections each corresponding to a level of social order Each bears a distinctive relation to the general problem of silence and noise in human community Part One Social Facts of Silence presents examples of the ways silence intrudes on vital aspects of human life in personal self understanding in the irony that direction communication requires a third absent party such as Goffman's ego identity in the fact that personal identity is the challenge of dealing with the trouble of deciding who we are in a given social setting Part Two Noise Dreams and Identity Confusions considers a range of community issues from the strange noises of quiet neighborhoods to the way the necessity of social conformity silences individual autonomy to the fact that the dead are ever present in daily language and behavior especially in common religious practices Finally Part Three Waste Death and the Beyond of Time suggests the principal ways the growing global environment aggravates human inequality by forcing the poor into zones of exclusion by increasing the mountain of human waste that in turn wastes human lives by the extent to which global theories and programs for economic development are little more

Navigating Technomedia Sam Han, 2007-12-07 From email to video and text messaging so much of our present social life depends on media technologies Today it is clearer than ever that these not only play an active part in our everyday lives but constitute our increasingly global realities Caught in the Web argues for a new approach to media theory that allows technomedia to be studied on its own terms Engaging in sociology social theory philosophy and media studies it provides an analysis of contemporary media technologies through the lens of various themes including the modernity postmodernity debate the state of knowledge space time and cultural politics in our contemporary information age At once an introduction to concepts in media studies and a critical work Caught in the Web attempts to situate high theory in everyday life

Technologies of Religion Sam Han, 2016-02-05 Bringing together empirical cultural and media studies of religion and critical social theory Technologies of Religion Spheres of the sacred in a post secular modernity investigates powerful entanglement of religion and new media technologies taking place today taking stock of the repercussions of digital technology and culture on various aspects of religious life and contemporary culture more broadly Making the argument that religion and new media technologies come together to create spheres environments produced by an architecture of digital technologies of all sorts from projection screens to social networking sites the book suggests that prior social scientific conceptions of religious worship participation community and membership are being recast Using the case of the strain of American Christianity called multi site an emergent and growing church model that has begun to win favor largely among Protestants in the last decade the book details and examines the way in which this new mode of religiosity bridges the realms of the technological and the physical Lastly the book situates and contextualizes these

developments within the larger theoretical concerns regarding the place of religion in contemporary capitalism Technologies of Religion Spheres of the sacred in a post secular modernity offers an important contribution to the study of religion media technology and culture in a post secular world **Routledge Handbook of Identity Studies** Anthony Elliott,2012-04-27 The Routledge Handbook of Identity Studies offers an exceptionally clear overview of the analysis of identity in the social sciences and in so doing seeks to develop a new agenda for identity studies in the twenty first century The key theories of identity ranging from classical accounts to postmodern psychoanalytic and feminist approaches are drawn together and critically appraised and there are substantive sections looking at racial ethnic gendered queer consumerist virtual and global identities The Handbook also makes an essential contribution to the debate now opening up over identity politics and its cultural consequences From anti globalization protestors to new ecological warriors from devotees of therapy culture to defenders of international human rights the culture of identity politics is fast redefining the public political sphere What future for politics is there after the turn to identity Throughout there is a strong emphasis on interdisciplinarity with essays covering sociology psychology politics cultural studies and history The Handbook s clear and direct style will appeal to a wide undergraduate audience in the social sciences and humanities *Political theologies and development in Asia* Giuseppe Bolotta,Philip Fountain,R. Michael Feener,2020-07-21 This innovative and timely reassessment of political theology opens new lines of critical investigation into the intersections of religion and politics in contemporary Asia Moving beyond a focus on the post Christian West this volume locates development conceptualised as a set of modern transnational networks of ideas and practices of improvement that connect geographically disparate locations as a vital focal point for critical investigations into Asian political theologies Investigating the sacred dimensions of power through concepts of transcendence sacrifice victimhood aspiration and salvation this collection demonstrates how European and Asian modernities are bound together through genealogical institutional and theo political entanglements as well as a long history of global interactions With contributions by leading anthropologists sociologists and political scientists this volume brings new theoretical approaches into conversation with detailed empirical case studies grounded in modern Asia In doing so it offers a fresh and critical analysis of the ways in which political theology is imagined materialised and contested both within and beyond nation states [The Consequences of Global Disasters](#) Anthony Elliott,Eric Hsu,2016-04-14 Disasters of the 21st century differ substantially from other kinds of hazards that previous societies have had to cope with because of the twin forces of globalization and the communications revolution But what makes today s disasters industrial technological environmental and socio cultural so different in scope and impact What are the possible disasters of the future And how can we as collective humanity best manage and respond to the globalization of disasters The Consequences of Global Disasters makes a distinctive contribution to the ever expanding field of disaster research by developing a multi contextual multi disciplinary and multi methodological approach to the social analysis of disasters Anthony Elliott and Eric L Hsu have brought together a

highly distinguished group of international contributors to focus on how people react to the unsettling effects of disasters which come in a multitude of forms Numerous contributors concentrate on the cultural political and psychological ramifications of the 2011 Great East Japan earthquake and tsunami but disasters in other contexts such as Australia China and Haiti are considered as well By offering unique empirical methodological and theoretical insights The Consequences of Global Disasters sets an agenda for future developments in the field of disaster research and will be a key resource for students and scholars working in social science disciplines such as sociology cultural studies international relations psycho social studies social work Japanese studies and social theory

Race of Time Daniel Chaffee, Samuel Han, 2015-11-17 Charles Lemert is one of the most renowned critics of social theory and theorists today The editors of this book have offered and contextualised many of his best essays and situated them against the backdrop of American sociology The breadth of Lemert's work doesn't stop at an academic engagement with theoretical debates such as globalisation or postmodernism but cuts right to the heart of abiding social issues His work is focused and continues to probe pressing questions such as the rise of vulnerabilities in an era of new capitalism By weaving together personal narrative research lucid explanations and a dynamic engagement with social theory of old and new his unique prose renders accessible complex theoretical debates
