The new methods to transact and own digital goods are allowing creators to monetize their activities through tokens. In addition to monetization and as a means to exchange value, token holders can also participate in the platform's governance, e.g., vote on decisions. This democratic ownership economy coupled with the possibility of interoperability could unlock immense economic opportunities whereby digital goods and services are no longer captive to a singular gaming platform or brand. As the world steps into the metaverse, it is imperative to spark conversations with all objects and those interacting within the next dimension. Applying Metalytics to Measure Customer Experience in the Metaverse introduces metalytics, a new perspective on analytics for the new dimension of spatial and immersive Web 3.0. It presents the new conversations in the elements of a new digital age converging at a large scale. Covering topics such as big data analytics, financial services, and network analysis, this premier reference source is an essential resource for business leaders and executives, IT managers, entrepreneurs, financial specialists, consultants, statisticians, marketers, government officials, students, and educators of higher education, librarians, researchers, and academicians.

BUSINESS ORGANISATION AND BUSINESS SECTOR (FYBA Commerce) (Semester I & II) Dr. Kshamali Sontakke, 2025-03-22

INTRODUCTION In today's interconnected world, business, trade, and industry are the foundational pillars that drive the global economy. Though distinct, these three areas are deeply intertwined, collectively fueling economic growth, innovation, and job creation worldwide. To fully understand the modern economy, it is crucial to recognize the unique characteristics of each concept and how they interact. Business refers to any organization involved in commercial, industrial, or professional activities aimed at producing goods or offering services to meet customer needs and generate profit. These entities range from small independently owned businesses to large multinational corporations. The primary goal of any business is to create value, whether through physical products, services, or innovative solutions to emerging demands. Businesses operate in various sectors like retail, finance, manufacturing, technology, and hospitality, varying in scale and complexity. Critical functions such as marketing, finance, operations, human resources, and customer service work together to ensure smooth operations and achievement of goals. While profit generation is often a primary objective, many businesses also prioritize social responsibility, sustainability, and long-term growth. By providing goods, services, or a combination of both, businesses contribute to economic progress, job creation, tax revenue, and technological advancements.
