Figure 1 illustrates the research methodology. The process begins with a Literature Review, which informs the Conceptual Framework. This framework guides the Data Collection phase, which includes Interviews, Focus Groups, and Surveys. The collected data is then subjected to Data Analysis, involving Thematic Analysis and Statistical Analysis. The findings from this analysis are categorized into Qualitative Findings and Quantitative Findings. These findings are then synthesized into Overall Conclusions and Recommendations.

The diagram illustrates the experimental setup. A participant is seated at a table, looking at a screen. On the screen, there is a 'Stimulus' area containing a 'Target' and a 'Response' area. The participant's hand is positioned over the 'Response' area. The diagram shows the visual feedback loop where the participant sees their hand position relative to the target.
