Confessions of a Circuit Rider Stephen Faller, 2023-12-21 Chaplaincy Pastoral care Ministry The care of souls What lies beneath that which lies beneath them Like Virgil chaplain Stephen Faller guides an unusual tour winding through personal disclosure about ministry adoption chaplaincy and disability Contextualized within chaplaincy and clinical pastoral education Faller examines these visions from a little known country Within the landscape are the sights of living in a post 9 11 world as they prefigure the change and uncertainty that marked American life and ministry after the pandemic of 2020 A conclusion to a dialectical inquiry at the

end of the world Faller explores the history of philosophy and religion in order to navigate an already unusual life within strange times Essential reading for chaplains and helpful insights for all those within the helping professions As ministry continues to move beyond the surrounding walls of the institutional building Faller suggests that chaplaincy can be a meaningful space for ordained ministry as one of the great spaces between spaces Moreover this confessor's confession spells a way for storytellers and story collectors to find direction when meaning is lost Chaplaincy itself is a meaningful response to a world turned upside down

Every Screen on the Planet Emily Baker-White, 2025-09-30 The story of the most effective attention algorithm ever invented and the superpower struggle to control it Every Screen on the Planet is the first major book on one of the most dramatic business stories of our time Touching on politics finance data and technology the struggle over TikTok has enormous implications for our information landscape and the technological cold war between the United States and China Emily Baker White's engrossing narrative charts TikTok's rise from obscurity into the world's most valuable startup led by its ambitious founder Zhang Yiming arguably the father of the modern recommendation algorithm Zhang's products reshaped the global internet from a place where you searched for information to one where information came to you TikTok seemed to know its users in an almost spooky way provoking wonder and delight People were hooked We intend to become ubiquitous a new hire training video said to put TikTok on every screen on the planet But virtually everything about TikTok's users their interests locations and even their unspoken desires was accessible to staff in Beijing After Baker White a Harvard trained lawyer and investigative reporter revealed that Chinese engineers could access Americans private information a team of employees used the app to track her location and attempt to expose whistleblowers This incident triggered an ongoing criminal investigation and escalated the US government's fight against Chinese tech TikTok was the first Chinese app to become a US juggernaut and lawmakers soon recognized its potential for surveillance and propaganda and the threat it might pose in the hands of their rivals Yet even as hawks in Congress gained support to ban the app the White House was secretly negotiating for unprecedented control over its information stream In 2025 when President Donald Trump declined to enforce the so called ban law TikTok seemed to complete a miraculous corporate escape It retained its influence profits and power but now operated at the pleasure of two strongmen China's Xi Jinping and Trump himself

Critical Perspectives on Leadership Mark Learmonth, Kevin Morrell, 2019-05-01 Within contemporary culture leadership is seen in ways that appeal to celebrated societal values and norms As a result it is becoming difficult to use the language of leadership without at the same time assuming its essentially positive intrinsically affirmative nature Within organizations routinely referring to bosses as leaders has therefore become both a symptom and a cause of a deep largely unexamined new conceptual architecture This architecture underpins how we think about authority and power at work Capitalism and its turbo charged offspring neo liberalism have effectively captured leader and leadership to serve their own purposes In other words organizational leadership today is so often a particular kind of insidious conservatism dressed up

in radical adjectives This book makes visible the work that the language of leadership does in perpetuating fictions that are useful for bosses of work organizations We do this so that we and anyone who shares similar discomforts can make a start in unravelling the fiction We contend that even if our views are contrary to the vast and powerful leadership industry our basic arguments rest on things that are plain and evident for all to see Critical Perspectives on Leadership The Language of Corporate Power will be key reading for students academics and practitioners in the disciplines of Leadership Organizational Studies Critical Management Studies Sociology and the related disciplines Threat Modeling Best Practices Derek Fisher, 2025-10-31 Build threat modeling skills with practical advanced techniques to enhance risk analysis optimize security measures and stay ahead of emerging threats in the complex cybersecurity landscape Free with your book DRM free PDF version access to Packt's next gen Reader Key Features Identify and mitigate security threats across software cloud mobile IoT and supply chains using STRIDE PASTA and MITRE ATT&CK Learn from real world case studies showing practical threat modeling applications across industries Build threat modeling programs with the right team tools SDLC integration and continuous improvement Book Description Threat modeling has become a cornerstone of modern cybersecurity yet it is often overlooked leaving security gaps that attackers can exploit With the rise in system complexity cloud adoption AI driven threats and stricter compliance requirements security teams need a structured approach to proactively spot and stop risks before attackers do This book delivers exactly that offering actionable insights for applying industry best practices and emerging technologies to secure systems It breaks down the fundamentals of threat modeling and walks you through key frameworks and tools such as STRIDE MITRE ATT&CK PyTM and Attack Paths helping you choose the right model and create a roadmap tailored to your business You'll learn how to use leading threat modeling tools identify and prioritize potential threats and integrate these practices into the software development life cycle to detect risks early The book also examines how AI can enhance analysis and streamline security decision making for faster stronger defenses By the end you'll have everything you need to build systems that anticipate and withstand evolving threats keeping your organization secure in an ever changing digital landscape Email sign up and proof of purchase required What you will learn Create foundational threat modeling artifacts like Data Flow Diagrams and security architecture diagrams to visualize system threats Understand the relationship between vulnerabilities exploitable weaknesses and threats sources of harm Analyze real world case studies to see how threat modeling is applied in industry incidents Evaluate and compare popular threat modeling tools both open source and commercial Explore advanced topics including threat modeling for cloud environments and integrating with DevSecOps Who this book is for This book is for cybersecurity professionals security consultants penetration testers and compliance managers seeking to integrate threat modeling into their assessment methodologies and client engagements It's also ideal for software architects DevOps engineers risk managers and organizational leaders responsible for identifying assessing and mitigating security risks in their technological environments Whether you're new to threat modeling or looking
