Nato In Afghanistan Fighting Together Fighting Alone:

NATO in Afghanistan David P. Auerswald, Stephen M. Saideman, 2024-11-01 Modern warfare is almost always multilateral to one degree or another requiring countries to cooperate as allies or coalition partners Yet as the war in Afghanistan has made abundantly clear multilateral cooperation is neither straightforward nor guaranteed Countries differ significantly in what they are willing to do and how and where they are willing to do it Some refuse to participate in dangerous or offensive missions Others change tactical objectives with each new commander Some countries defer to their commanders while others hold them to strict account NATO in Afghanistan explores how government structures and party politics in NATO countries shape how battles are waged in the field Drawing on more than 250 interviews with senior officials from around the world David Auerswald and Stephen Saideman find that domestic constraints in presidential and single party parliamentary systems in countries such as the United States and Britain respectively differ from those in countries with coalition governments such as Germany and the Netherlands As a result different countries craft different guidelines for their forces overseas most notably in the form of military caveats the often controversial limits placed on deployed troops Providing critical insights into the realities of alliance and coalition warfare NATO in Afghanistan also looks at non NATO partners such as Australia and assesses NATO s performance in the 2011 Libyan campaign to show how these domestic political dynamics are by no means unique to Afghanistan

Hubris, Self-Interest, and America's Failed War in Afghanistan Thomas P. Cavanaugh, 2015-07-22 This book describes the conduct of the US led post 9 11 war in Afghanistan Adopting a long term perspective it argues that even though Washington initially had an opportunity to achieve its security goals and give Afghanistan a chance to enter a new era it compromised any possibility of success from the very moment it let bin Laden escape to Pakistan in December 2001 and found itself locked in a strategic overreach Given the bureaucratic and rhetorical momentum triggered by the war on terror in America the Bush Administration was bound to deploy more resources in Afghanistan sooner or later despite its focus on Iraq The need to satisfy unfulfilled counter terrorism objectives made the US dependent on Afghanistan s warlords which compromised the country s stability and tarnished its new political system The extension of the US military presence made Washington lose its leverage on the Pakistan army leaders who aware of America s logistical dependency on Islamabad supported the Afghan insurgents their historical proxies more and more openly The extension of the war also contributed to radicalize segments of the Afghan and Pakistani populations destabilizing the area further In the meantime the need to justify the extension of its military presence influenced the US led coalition into proclaiming its determination to democratize and reconstruct Afghanistan While highly opportunistic the emergence of these policies proved both self defeating and unsustainable due to an inescapable collision between the US led coalition s inherent self interest hubris limited knowledge limited attention span and limited resources and on the other hand Afghanistan s inherent complexity As the critical contradictions at the very heart of the campaign increased with the extension of the latter

s duration scale and cost America's leaders entrapped in path dependence lost their strategic flexibility Despite debates on troops resource allocation and more sophisticated doctrines they repeated the same structural mistakes over and over again The strategic overreach became self sustaining until its costs became intolerable leading to a drawdown which has more to do with a pervasive sense of failure than with the accomplishment of any noble purpose or strategic breakthrough

NATO's Return to Europe Rebecca R. Moore, Damon Coletta, 2017-09-11 NATO's 2010 Strategic Concept officially broadened the alliance's mission beyond collective defense reflecting a peaceful Europe and changes in alliance activities NATO had become an international security facilitator a crisis manager even outside Europe and a liberal democratic club as much as a mutual defense organization However Russia's re entry into great power politics has changed NATO's strategic calculus Russia's aggressive annexation of Crimea in 2014 and its ongoing military support for Ukrainian separatists dramatically altered the strategic environment and called into question the liberal European security order States bordering Russia many of which are now NATO members are worried and the alliance is divided over assessments of Russia's behavior Against the backdrop of Russia's new assertiveness an international group of scholars examines a broad range of issues in the interest of not only explaining recent alliance developments but also making recommendations about critical choices confronting the NATO allies While a renewed emphasis on collective defense is clearly a priority this volume's contributors caution against an overcorrection which would leave the alliance too inwardly focused play into Russia's hand and exacerbate regional fault lines always just below the surface at NATO This volume places rapid fire events in theoretical perspective and will be useful to foreign policy students scholars and practitioners alike

Waging War Patricia A. Weitsman, 2013-12-18 Military alliances provide constraints and opportunities for states seeking to advance their interests around the globe War from the Western perspective is not a solitary endeavor Partnerships of all types serve as a foundation for the projection of power and the employment of force These relationships among states provide the foundation upon which hegemony is built Waging War argues that these institutions of interstate violence not just the technology capability and level of professionalism and training of armed forces serve as ready mechanisms to employ force However these institutions are not always well designed and do not always augment fighting effectiveness as they could They sometimes serve as drags on state capacity At the same time the net benefit of having this web of partnerships agreements and alliances is remarkable It makes rapid response to crisis possible and facilitates countering threats wherever they emerge This book lays out which institutional arrangements lubricate states abilities to advance their agendas and prevail in wartime and which components of institutional arrangements undermine effectiveness and cohesion and increase costs to states Patricia Weitsman outlines what she calls a realist institutionalist agenda one that understands institutions as conduits of capability She demonstrates and tests the argument in five empirical chapters examining the cases of the first Gulf War Kosovo Afghanistan Iraq and Libya Each case has distinct lessons as well as important generalizations for contemporary multilateral warfighting

NATO's Durability in a Post-Cold War World Joe Burton, 2018-02-15 Why is it that despite the end of the Cold War and the almost constant controversies surrounding the alliance's role in the world the North Atlantic Treaty Organization NATO is still a prominent and vital player in international security Joe Burton provides an in depth analysis of NATO's changing role in the post Cold War era and its ability to survive adapt and meet the needs of its members in an increasingly turbulent globalized security environment He offers a historically and theoretically informed account of NATO that isolates the core dynamics that have held the alliance together in troubled times In particular he examines a series of processes and events from the 1990 Gulf War to the rise of the Islamic State that help explain NATO's continuing relevance

Political Rationale and International Consequences of the War in Libya Dag Henriksen, Ann Karin Larssen, 2016-04-15 *Political Rationale and International Consequences of the War in Libya* focuses on the international intervention in Libya in 2011 and tries to answer two broad questions 1 What was the political rationale for the various actors to proceed as they did in the lead up and conduct of the military intervention in Libya 2 What are the consequences of the UN authorized military intervention in Libya R2P was the public raison d'être of the war and an important legitimizing factor of the intervention Still the humanitarian situation was a necessary but not in and by itself an adequate precondition for intervention A number of factors coalesced to enable the intervention While the humanitarian situation triggered the intervention in reality a variety of national interests governed the approach by the various international actors and more often than not these motives were not rooted in the particular circumstances in Libya The book offers a combination of unique perspectives While the perspectives of the US France and the UK on the Libyan Crisis War have been well documented the Arabic and Scandinavian political and military dynamics have been much less so While the perspectives of NATO the UN and R2P have been debated the view from the Arab League and African Union AU have been less in focus The volume redresses that imbalance and offers the most broad ranging analysis yet of a key moment in recent international relations
