Thomas Belt, 2017-08-07 A travelogue of Thomas Belt during his four year journey through Nicaragua he teaches us about the culture the nature both plant and animal and the topography geography He s an expert in gold mining glacial activity and ants but his deep understanding of people and the way their circumstances shape them is obvious throughout his travelogue His coverage of Nicaragua and her people is incredible and very interesting No stone is left unturned here and though his studies were obviously specific to the natural species he uncovered going to great lengths to detail the species he observed

and their habits this book offers a much bigger perspective than just that His way with words keeps the topics interesting even though his explanations are very scientific He did an amazing job of capturing the country and the culture as it existed then
