The Human Nature of a University Robert Francis Goheen, 2015-12-08 This is a collection of excerpts from the public addresses of Robert F Goheen during his twelve years as President of Princeton University The emphasis is on the people whose responsibility it is to promote and defend the principles underlying the modern American university students faculty administrators trustees alumni Several fundamental themes emerge the theme of individual responsibility and the ever present need to join rational intelligence with moral commitment for example Dr Goheen sees the university as a continuing institution with long range goals responding conservatively in its best sense to the human needs of the times He seeks to define its institutional relationships in the context of the university's tasks in education and research which must be understood and kept in balance if universities are to serve their functions effectively Originally published in 1969 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905

The Nature of Natural History Marston Bates, 2014-07-14 This classic work is an exploration of what natural history is and a sustained effort to see how it relates to other areas of biology Marston Bates did not attempt to overwhelm his audience with facts or overinterpret those he did use and perhaps for this reason *The Nature of Natural History* is a timeless work The author's genuine interest in the tropics has a very current feeling and the first ten or fifteen chapters of the work have a style that is parallel to that of David Attenborough's verbal presentations of nature From the book I have already made several remarks about the connection between parasitism and degeneracy I suspect this is a matter of point of view We are predatory animals ourselves and consequently admire the characteristics of predation agility speed cunning self reliance We feel a certain kinship with the lion and regard the liver fluke with horror If a sheep were given the choice though it might prefer to be debilitated by liver flukes rather than killed by a lion Originally published in 1990 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905

Rethinking the Concept of Law of Nature Yemima Ben-Menahem, 2022-06-13 This book subjects the traditional concept of law of nature to critical examination There are two kinds of reasons that invite this reexamination one deriving from philosophical concerns over the traditional concept the other motivated by theoretical and practical changes in science One of the philosophical worries is that the idiom of law of

nature especially when combined with the notion of laws governing individual events and processes is no longer as intelligible as it used to be in the theistic context in which the formulation of laws became central to science The traditional concept is also challenged in various ways by contemporary scientific theories such as quantum mechanics chaos theory and the general theory of relativity It is no longer clear that there are any universal laws laws do not always guarantee predictability and the border between physical and mathematical considerations is constantly shifting The most difficult challenge perhaps is to come up with a scientific explanation of the origin of laws Wrestling with these intriguing problems the papers in this volume broaden both our understanding of the natural order and our desiderata of scientific explanation

The Oxford Compendium of Visual Illusions Arthur Gilman Shapiro, Dejan Todorović, 2017 Visual illusions are compelling phenomena that draw attention to the brain s capacity to construct our perceptual world The

Compendium is a collection of over 100 chapters on visual illusions written by the illusion creators or by vision scientists who have investigated mechanisms underlying the phenomena *Paul Henri Thiry d'Holbach's and Richard Dawkins's Comprehensive Scientism* Gerold Reisinger ,2022-10-12 Science unbound In this book the author explores Comprehensive Scientism by juxtaposing the philosophies of one challenging figure of the European Enlightenment with those of a legendary evolutionary biologist Paul Henri Thiry d Holbach lived from 1723 1789 and wrote one monumental work known as the Bible of atheists Richard Dawkins a modern day scientist and self declared atheist is currently galvanizing the secularist movement Gerold Reisinger s treatise aims to uncover the motives of d Holbach and Dawkins for claiming that science is the only source of knowledge to defend atheism Various aspects of their forms of scientism are outlined and elucidated in relation to the comprehensive form that combines epistemological ontological moral and existential scientism Basic research by Stenmark and Peels frames this philosophical work s analysis and comparison of the two iconic philosophers and their writings The book shows that scientism is what unites their positions and proves to be as powerful a motive today as it was in the 18th century to render science the know all and be all of truth and reality and thereby attempt to obviate religion for humankind

functional bioethics the African approach goes further than biocentrism ecocentrism and holism to ground an inclusive African holistic moral egalitarianism suggesting that all forces and all created things have life We are not emphasizing how every system and creature command equal respect rather everything has life commands respect and moral concern as a minimum imperative within a Black African holistic approach to bioethics However holistic bioethics can neither be Western nor an African invention that people of other cultures only admire from a distance Moreover holistic bioethics doesn't offer the last word on the ethics of nonhuman animals holistic anamnestic solidarity the relational Other and intercultural theological bioethics

Persian Royal-Judaean Elite Engagements in the Early Teispid and Achaemenid Empire Jason M. Silverman, 2019-11-14 Jason Silverman presents a timely and necessary study advancing the understanding of Achaemenid ideology and Persian Period Judaism While the Achaemenid Persian Empire c 550-330 BCE dwarfed all previous empires of the Ancient Near East in both size and longevity the royal system that forged and preserved this civilisation remains only rudimentarily understood as is the imperial and religious legacy bequeathed to future generations In response to this deficit Silverman provides a critically sophisticated and interdisciplinary model for comparative studies While the Achaemenids rebuilt the Jerusalem temple Judaean literature of the period reflects tensions over its Persian re-establishment demonstrating colliding religious perspectives Although both First Zechariah 1:8 and Second Isaiah 40:55 are controversial the greater imperial context is rarely dealt with in depth both books deal directly with the temple's legitimacy and this ties them intimately to kings' engagements with cults Silverman explores how the Achaemenid kings portrayed their rule to subject minorities the ways in which minority elites reshaped this ideology and how long this impact lasted as revealed through the Judaean reactions to the restoration of the Jerusalem temple

Phrenitis and the Pathology of the Mind in Western Medical Thought Chiara Thumiger, 2023-11-30 Phrenitis is ubiquitous in ancient medicine and philosophy Galen mentions the disease innumerable times patristic authors take it as a favourite allegory of human flaws and no ancient doctor fails to diagnose it and attempt its cure Yet the nature of this once famous disease has not been understood properly by scholars This book provides the first full history of phrenitis In doing so it surveys ancient ideas about the interactions between body and soul both in health and in disease It also addresses ancient ideas about bodily health mental soundness and moral goodness and their heritage in contemporary psychiatric ideas Readers will encounter an exciting narrative about health illness and care as embedded in ancient life but will also be forced to reflect critically on our contemporary ideas of what it means to be insane This title is also available as open access on Cambridge Core

Pleasure and Leisure in the Middle Ages and Early Modern Age Albrecht Classen, 2019-08-05 Jan Huizinga and Roger Caillois have already taught us to realize how important games and play have been for pre modern civilization Recent research has begun to acknowledge the fundamental importance of these aspects in cultural religious philosophical and literary terms This volume expands on the traditional approach still very much focused on the materiality of game toys cards dice falcons dolls etc and acknowledges that game constituted also a form of coming to terms with human existence in an unstable and volatile world determined by universal randomness and fortune Whether considering blessings or horse fighting falconry or card games playing with dice or dolls we can gain a much deeper understanding of medieval and early modern society when we consider how people pursued pleasure and how they structured their leisure time The contributions examine a wide gamut of approaches to pleasure considering health issues eroticism tournaments playing music reading and listening drinking alcohol gambling and throwing dice This large issue was also relevant of course in non Christian societies and constitutes a critical concern both for the past and the present because we are all homines ludentes

A Flash of Golden Fire Thomas Elsner, 2025-05-01 In the early twentieth century C G Jung survived an intense encounter with the unconscious He did this by giving expression to his inner world in the paintings and dialogues found in the Red Book Yet Jung felt alone in this work unable to find a precedent or cultural parallel until he discovered alchemy This ancient protoscience became the bridge Jung had been seeking between the remote past and the present Yet between the downfall of alchemy in the eighteenth century and Jung's Red Book in the twentieth it seems that there was a gap in the tradition According to Jungian analyst and author Thomas Elsner Samuel

Taylor Coleridge's great visionary poem *The Rime of the Ancient Mariner* is another link in that golden chain. In Elsner's analysis, Coleridge's nineteenth-century night sea journey can today be understood as a symbolic self-portrait of the collective unconscious, a self-portrait that like the Red Book finds its historical context and continuity in the alchemical tradition. Continuing the highly esteemed works arising from the Fay Lecture Series sponsored by the Jung Center Houston, Elsner's *A Flash of Golden Fire: The Birth, Death, and Rebirth of the Modern Soul in Coleridge's The Rime of the Ancient Mariner* promises to further extend the understanding and appreciation of Jungian principles for practitioners, analysts, others interested in Jungian theory and practice, the psychological dimensions of Romantic poetry, and the evolution of Western consciousness.

[Why We Swim](#) Bonnie Tsui, 2021-04-13 A fascinating and beautifully written love letter to water, I was enchanted by this book. Rebecca Skloot, bestselling author of *The Immortal Life of Henrietta Lacks*, *We Swim* in freezing Arctic waters and piranha-infested rivers to test our limits. We swim for pleasure, for exercise, for healing. But humans, unlike other animals that are drawn to water, are not natural-born swimmers. We must be taught. Our evolutionary ancestors learned for survival; today, swimming is one of the most popular activities in the world. *Why We Swim* is propelled by stories of Olympic champions, a Baghdad swim club that meets in Saddam Hussein's former palace pool, modern-day Japanese samurai swimmers, and even an Icelandic fisherman who improbably survives a wintry six-hour swim after a shipwreck. New York Times contributor Bonnie Tsui, a swimmer herself, dives into the deep from the San Francisco Bay to the South China Sea, investigating what it is about water that seduces us and why we come back to it again and again. An immersive, unforgettable, and eye-opening perspective on swimming and on human behavior itself.
