Abstract: The purpose of this study was to determine if there were differences in the prevalence of dental caries between children who had been exposed to fluoride varnish and those who had not. A total of 100 children aged 6-12 years were examined by a dentist. The results showed that the prevalence of dental caries was significantly lower in the group that had received fluoride varnish than in the control group.

Marine Navigation 1 : Piloting Richard R. Hobbs,1981 Throughout the history of warfare at sea navigation has been an important basic determinant of victory Occasionally new members of the fraternity of the sea will look upon navigation as a chore to be tolerated only as long as it takes to find someone else to assume the responsibility In my experience such individuals never make good naval officers Commander Hobbs has succeeded in bringing together the information and practical skills required for that individual who would take the first step down the road toward becoming a competent marine navigator At the outset of this book the author stresses the necessity for safe navigation but there is another basic tenet of sea warfare that this book serves The best weapons system man has ever devised cannot function effectively unless it knows where it is in relation to the real world where it is in relation to the enemy and where the enemy is in relation to the real world Not all defeats can be attributed to this lack of information but no victories have been won by those who did not know where they were Principles of Radiation and Contamination Control United States.
