Efficiency of the Immigration and Naturalization Service United States. Congress. House. Committee on the Judiciary. Subcommittee on Immigration, Refugees, and International Law, 1980      **Graduate Medical Education Outcomes and Metrics** National Academies of Sciences, Engineering, and Medicine, Health and Medicine Division, Board on Health Care Services, 2018-04-30 Graduate medical education GME is critical to the career development of individual physicians to the

functioning of many teaching institutions and to the production of our physician workforce. However, recent reports have called for substantial reform of GME. The current lack of established GME outcome measures limits our ability to assess the impact of individual graduates, the performance of residency programs and teaching institutions, and the collective contribution of GME graduates to the physician workforce. To examine the opportunities and challenges in measuring and assessing GME outcomes, the National Academies of Sciences, Engineering, and Medicine held a workshop on October 10-11, 2017, in Washington, DC. Workshop participants discussed meaningful and measurable outcomes of GME, possible metrics that could be used to track these GME outcomes, possible mechanisms for collecting, collating, analyzing, and reporting these data, and further work to accomplish this ambitious goal. This publication summarizes the presentations and discussions from the workshop.
