Popović, Rainer Kulms, 2024-10-08 Online platforms and their ecosystems are the cornerstone of the digital economy They have brought forth positive network effects But they are also known for their information asymmetries their potential for market failures and their problematic relationship with data protection law This volume provides a detailed analysis of the current process of repositioning online platforms in the digital economy as regulators express concerns about the evolution from mere intermediaries to gatekeepers The exclusive reliance on competition law instruments has proven to be incapable of coping with cases of platforms abusing their market power Therefore the book explores the European Union's new approach to digital markets consisting in the adoption or drafting of new legislative instruments such as the Digital Markets Act Digital Services Act Proposal of AI Act Proposal of Data Act Proposal of Data Governance Act The EU's emphasis on new regulatory ex ante instruments as in the Digital Markets Act calls for an assessment of their overlap or their interface with existing supranational and national competition rules The book transcends mere competition law thinking by exploring the status of online platforms from the perspective of trade law rules unfair competition law data protection rules and intellectual property law But in view of the global reach of online platforms the risks of a jurisdiction wise approach with conflicting regulatory strategies are all too clear The volume therefore includes comparative studies on Australia and the USA The potential impact of regulatory policy choices will also be assessed from the economic perspective The book's message is not be confined to researchers and academics It is also of great importance to practitioners in the digital sector who stand to benefit from the analysis of the law of online platforms undertaken by a working group of renowned authors coming from different jurisdictions **CISSP Certification Exam Study Guide** Kumud Kumar, 2023-07-17 This book has been carefully crafted to delve into each of the 8 CISSP Common Body of Knowledge CBK domains with comprehensive detail ensuring that you gain a solid grasp of the content The book consists of 8 chapters that form its core Here's a breakdown of the domains and the chapters they are covered in Chapter 1 Security and Risk Management Chapter 2 Asset Security Chapter 3 Security Architecture and Engineering Chapter 4 Communication and Network Security Chapter 5 Identity and Access Management IAM Chapter 6 Security Assessment and Testing Chapter 7 Security Operations Chapter 8 Software Development Security

This book includes important resources to aid your exam preparation such as exam essentials key terms and review questions. The exam essentials highlight crucial topics that you should focus on for the exam. This book includes original unpublished contributions presented at the International Conference on Data Analytics and Management ICDAM 2024 held at London Metropolitan University London UK during June 2024. The book covers the topics in data analytics, data management, big data, computational intelligence, and communication networks. The book presents innovative work by leading academics, researchers, and experts from industry which is useful for young researchers and students. The book is divided into six volumes. *Confessions of the Pricing Man* Hermann Simon, 2015-10-20. The world's foremost expert on pricing strategy shows how this mysterious process works and how to maximize value through pricing to company and customer. In all walks of life we constantly make decisions about whether something is worth our money or our time or try to convince others to part with their money or their time. Price is the place where value and money meet. From the global release of the latest electronic gadget to the bewildering gyrations of oil futures to markdowns at the bargain store, price is the most powerful and pervasive economic force in our day-to-day lives and one of the least understood. The recipe for successful pricing often sounds like an exotic cocktail with equal parts psychology, economics, strategy, tools, and incentives stirred up together, usually with just enough math to sour the taste. That leads managers to water down the drink with hunches and rules of thumb or leave out the parts with which they don't feel comfortable. While this makes for a sweeter drink, it often lacks the punch to have an impact on the customer or on the business. It doesn't have to be that way though, as Hermann Simon illustrates through dozens of stories collected over four decades in the trenches and behind the scenes. A world-renowned speaker on pricing and a trusted advisor to Fortune 500 executives, Simon's lifelong journey has taken him from rural farmers' markets to a distinguished academic career to a long second career as an entrepreneur and management consultant to companies large and small throughout the world. Along the way, he has learned from Nobel Prize winners and leading management gurus and helped countless managers and executives use pricing as a way to create new markets, grow their businesses, and gain a sustained competitive advantage. He also learned some tough personal lessons about value, how people perceive it, and how people profit from it. In this engaging and practical narrative, Simon leaves nothing out of the pricing cocktail but still makes it go down smoothly and leaves you wanting to learn more and do more as a consumer or as a business person. You will never look at pricing the same way again. *The Song Machine* John Seabrook, 2015-10-05. An utterly satisfying examination of the business of popular music. Nathaniel Rich, *The Atlantic*. There's a reason today's ubiquitous pop hits are so hard to ignore: they're designed that way. *The Song Machine* goes behind the scenes to offer an insider's look at the global hit factories.
