Good Meal Prep Ideas For Beginners and Dummies

Barbara Dawson,2020-08-18 Meal prepping is meal prepping a meal or recipe then portioning it out to grab and go meals for later If you've ever kept your leftovers from dinner to take with you for lunch then next time you've made a mini meal prepped Good meal prepping refers to preparing 3-7 days worth of food at a time Think of it like making your lunches for the week all at once instead of making your lunch throughout the week You can use this same technique for breakfast lunch dinner and snacks Meal prepping doesn't waste and reduce the time to get outside your house whether the plan is a diet or a budget When making your meal plan for the week the question is how many meals without having to do it each day to make it work Meal prepping is not for everyone It is good for the value convenience and efficiency more than anything else With meal prepping you can eat the same thing for a few days in a row so you don't look at leftovers or get bored with food Meal prepping is not for everyone If having a nutritious meal that maximizes your time and budget is more valuable to you than doing something different every day meal prepping is the way to go I've generally not seen a meal prep for the month or maybe one other person do a whole month Meal prepping for a whole month would be quite difficult but the reward is that you would be able to eat what you want and not have to eat what is stored in the refrigerator for a long time In addition to the way food is packed the individual nuances of your refrigerator can impact the food if it is refrigerated for a long time the food is not acceptable having a good texture and flavor will be a big benefit to the eater Always begin with the refrigerator guidelines that the FDA and then evaluate them against your own preferences In general I don't think it's more than a few days worth of food to eat but I find that a few days of food is a little more than I need to eat
