## **Palliative Medicine A Case Based Manual:**

**Palliative Medicine: A Case-Based Manual** Susan MacDonald, Leonie Herx, Anne Boyle, 2021-12-08 Palliative medicine is the medical care provided for people who have a life limiting illness or condition. It encompasses both the physical symptoms a person may experience but also the psychosocial, emotional and ethical issues that may arise. Now in its fourth edition, *Palliative Medicine A Case Based Manual* walks clinicians through the management of the most common situations found in palliative medicine from diagnosis and managing symptoms through to grief and bereavement. Using real patient case scenarios and an easy to read question and answer format, it gives students and medical professionals an accessible evidence based entryway to gain the skills and knowledge needed to provide high quality palliative and end of life care to patients and their families. This new edition has been fully updated to cover the latest guidance including new chapters dedicated to medical cannabis, opioids, grief and bereavement and wider issues including palliative care in the community, structurally vulnerable populations and public health. Written by over 50 experienced palliative care clinicians and educators, this book will be a welcome guide for palliative care workers, medical and nursing students and medical professionals of any specialty where palliative needs might arise. *Palliative Medicine* Neil MacDonald, 2005 Palliative care is now an integral part of the undergraduate medical curriculum. Medical education across the board is adopting a case based approach. This book uses a series of cases to illustrate critical points in palliative medicine. The case studies have been carefully chosen to reflect real life clinical practice. The contributors illustrate through the case studies the desired skills, attitudes and knowledge required in this field of medicine. The second edition of this popular book continues to offer a panoramic view of palliative care. The new edition introduces a number of new topics, new authors and a thorough update on continuing chapters. It includes material on non malignant disease which is an integral part of palliative care. The text distinguishes between evidence based practice and common practice which has yet to be verified by research studies. Each chapter includes a brief section at the end containing a commentary on future trends and promising areas of research. *Palliative Medicine* Neil MacDonald, Marcel Boisvert, Deborah Dudgeon, Neil Hagen, 1998 In line with much of today's medical teaching, the authors of this unique book have used a series of cases to illustrate critical points in palliative medicine. The case outlines are linked to learning objectives throughout the case discussions are used to illustrate the desired attitudes, skills and knowledge base outlined at the beginning of each chapter. In all thirty symptom problems and psychosocial issues are discussed including a number of symptoms not commonly considered in other textbooks such as sleep disorders. The comprehensive section devoted to psychosocial factors in palliative medicine contains an excellent chapter on ethics as well as chapters on cost containment and cultural issues in addition to the more commonly encountered psychosocial problems. **Palliative Medicine**, 2012 Using a series of cases to illustrate salient points, this manual matches the cases with curricular objectives effectively conveying to the student understanding of palliative medicine at undergraduate level. de l diteur **Children's Palliative Care: An International Case-Based Manual** Julia Downing,2020-04-01 This manual enables individuals working in children s palliative care CPC globally to learn through engaging real world cases The aim is to provide a clinical case based resource that is globally relevant and accessible to those working in CPC Drawing on case histories from around the world that reflect key issues and elements of CPC it provides a practical approach grounded in experience It addresses multidisciplinary care in the management of children and their families discusses cases from an international perspective and shares examples from a variety of countries utilising cases across a range of ages and conditions demonstrating holistic care It represents the first case based manual on global CPC and is endorsed and promoted by the International Children s Palliative Care Network ICPCN Children s palliative care is a rapidly developing field both in the UK and internationally The provision of CPC varies considerably with provision often being insufficient and over 65% of countries having no recognised CPC service provision whatsoever As such while there are an estimated 21 6 million children who require palliative care in many areas of the world CPC is poor or non existent and children are treated like little adults without their distinctive needs being recognised or understood There is also a dearth of literature on CPC hence this clinical case based manual fills a gap in the market and is aimed at a global audience making it a unique text in the field

**Textbook of Palliative Medicine** Eduardo Bruera,Irene Higginson,Charles F von Gunten,2009-01-30 Textbook of Palliative Medicine provides an alternative truly international approach to this rapidly growing specialty This textbook fills a niche with its evidence based multi professional approach and global perspective ensured by the international team of editors and contributing authors In the absence of an international curriculum for the study of palliative medicine this textbook provides essential guidance for those both embarking upon a career in palliative medicine or already established in the field and the structure and content have been constructed very much with this in mind With an emphasis on providing a service anywhere in the world including the important issue of palliative care in the developing nations Textbook of Palliative Medicine offers a genuine alternative to the narrative approach of its competitors and is an ideal complement to them It is essential reading for all palliative care physicians in training and in practice as well as palliative care nurses and other health professionals in the palliative care team **Palliative Medicine** ,2008 **Palliative Care** Jane E. Loitman,Christian T. Sinclair,Michael J. Fisch,2010-06-16 A clinical case based handbook has a role in general clinicians practice of caring for patients with serious or life limiting illness The explosion of the field of Hospice and Palliative Medicine impacts all physicians and healthcare providers Fellowship trained s cialists graduate in greater numbers annually These and more seasoned specialists are now certified by the American Board of Medical Specialties as subspecialists Research in this field is expanding in scope and quantity and peer reviewed journals devoted to this work are multiplying Moreover peer reviewed journals in primary care and other subspecialties of medicine regularly include papers that focus on end of life care quality of life issues and symptom management Overall then access to clinical information necessary to care for patients with life

limiting illness is not only essential but also increasingly available This case based clinical book aims to help with the actual practice of caring for patients with life limiting illness Numerous texts and journals exist to provide the data to inform care yet there remains a need to find practical points and information about the practical application of the principles of palliative care Thus we hope that the cases key points and practical tips will help health care providers who are not experts already in palliative care in the care of patients with serious illness and challenging problems Some chapters follow one patient through the course of an illness to highlight the applicability of palliative care throughout the disease process

**Ethics and Palliative Care** Dr. Paddy Stone,2005 Part one of this book provides an explanation of ethical theory looks at difficult decisions at the end of life questions autonomy and rights and covers the use of sedation at the end of life while part two presents case histories and clinical scenarios
