Pamphlet Architecture 33 Islands And Atolls:

Pamphlet Architecture 33 Luis Callejas, 2013-06-04 The competition for Pamphlet Architecture 33 asked previous authors in the series to nominate the architects and theorists whose work represents the most exciting design and research in the field today The first of two winning entries the other will be published in fall 2013 as PA 34 was submitted by Luis Callejas of LCLA Office in Medellin Colombia Pamphlet Architecture 33 Islands and Atolls asks how architecture might critically repurpose its traditionally limited disciplinary tools in order to make a meaningful impact at a territorial scale Functioning as a landscape architect in a country that has no infrastructure for such a profession Callejas questions pedagogical disciplinary and political norms at macro levels using micro tactics As a result PA 33 provocatively expands devices such as repetition and aggregation beyond their limits in scenarios where sociopolitical constraints seemingly prohibit what would normally be understood as an architectural intervention *Islands and Atolls* Luis Callejas, 2013

Pamphlet Architecture 36 Christopher Michael Meyer, Shawna Michelle Meyer, Daniel Hemmendinger, 2018-08-28 This newest addition to the Pamphlet Architecture series long admired for its willingness to propose architectural solutions to challenging problems addresses the issue of rising sea levels with an interrogation of the concept of floating cities a field of inquiry gaining increasing relevance and urgency with the impending reality of climate change The authors explore notions of buoyancy and the amphibious through a typology based on human response and adaptation to one of the hosting pressing issues of our day *Unorthodox Ways to Think the City* Teresa Stoppani, 2018-12-07 This book argues that architecture and the city and their processes can be better understood by drawing categories from disciplines that exceed the architectural and urban cultural context It performs an open intellectual reading that traverses architecture and architectural theory but also art theory and history cartography philosophy literature and cultural studies to unfold a series of figures that are ambiguously placed between the representation and the construction of space in architecture and the city The paradigm and philosophy the island and the city the map and representation the model and making and the questioning of form performed by dust are explored beyond their definition as processes that differently make space between architecture and the city and are proposed as unorthodox analytic techniques to decipher contemporary spatial complexity The book analyses how these figures have been employed at different times and in different creative disciplines beyond architecture and in relation to changing notions of space and traces the role that they have played in the shift towards the dynamic that has taken place in contemporary theory and design research What emerges is the idea of an architecture of the city that is not only physical but is largely defined by the way in which its physical spaces are regulated lived and perceived but also imagined and projected *Cartographic Grounds* Charles Waldheim, Jil Desimini, 2016-06-28 Mapping has been one of the most fertile areas of exploration for architecture and landscape in the past few decades While documenting this shift in representation from the material and physical description toward the depiction of the unseen and often immaterial Cartographic Grounds takes a

critical view toward the current use of data mapping and visualization and calls for a return to traditional cartographic techniques to reimagine the manifestation and manipulation of the ground itself Each of the ten chapters focuses on a single cartographic technique sounding spot elevation isobath contour hachure hatch shaded relief land classification figure ground stratigraphic column cross section line symbol conventional sign and illustrates it through beautiful maps and plans from notable designers and cartographers throughout history from Leonardo da Vinci to James Corner Field Operations Mohsen Mostafavi dean of the Harvard Graduate School of Design introduces the book *Lejos de la costa* Arantzazu Luzarraga Iturrioz, 2023-03-02 La palabra offshore tiene dos acepciones La primera significa literalmente en el mar alejado de la costa y la segunda hace alusión a lo hecho situado o registrado en el extranjero especialmente para obtener beneficios de menores costes o impuestos o de una regulación menos estricta Habitamos nuestro día a día a través de personas fuentes de energía servicios y productos llevados lejos de nuestra costa y operando fuera de nuestra ley Resulta difícil reparar en estas arquitecturas ya sea porque permanecen convenientemente ocultas como porque hayamos asimilado su existencia con gran naturalidad Este libro reúne una serie de casos de estudio que van desde el turismo y la migración hasta la logística pasando por las infraestructuras energéticas y los servicios telefónicos externalizados Brasil Rusia India y China son los países BRIC cuyo protagonismo a nivel mundial se debe a la deslocalización Los flujos compuestos por cuerpos infraestructuras servicios mercancías y un largo etcétera han de discurrir de la forma más ventajosa posible En consecuencia cada vez se sitúan más alejados de la costa yendo y viniendo desde emplazamientos que añaden la combinación siempre ganadora de desplazar ocultar y operar fuera de norma Un viaje de ida y vuelta que transforma no solo lo lejano sino también el entorno cotidiano más próximo La arquitectura lejos de la costa permite incluir la excepción en el orden vigente Crea un umbral esencial a las reglas económicas y jurídicas contemporáneas aunque estas lo excluyan explícitamente La relación con esa falta de ley es indisoluble en el transcurso del orden normal de las cosas La arquitectura offshore es una arquitectura de organización cuyas herramientas espaciales se enfrentan a las usuales en la disciplina En alta mar es posible eludir los inconvenientes de la legislación que regula en tierra El mercado se ajusta constantemente en arquitecturas que responden a demandas temporales o circunstanciales conformando un equilibrio complejo a la par que inestable Heredera de su pasado marítimo comercial la arquitectura lejos de la costa abre las propiedades espaciales y de gestión del mar para el espacio habitado
