

A white light box sign is the central focus, displaying the text "BLACK FRIDAY SALE" in three rows. The sign is tilted slightly to the right. The background is a solid black, densely populated with numerous small, five-pointed gold stars of varying sizes, creating a sparkling, festive effect. The stars are scattered across the entire frame, with some appearing in small clusters and others in isolation.

Black Friday 2025:

Digital China: Selling to China Through Cross-Border E-Commerce Ashley Dudarenok, 2019-01-01 China's cross border e-commerce market was worth 8.8 trillion yuan transactions in 2018 with 25-34 year olds as the largest user segment making up 48% of China's highly educated CBEC consumers. In early 2020 China also approved 24 more cross border e-commerce pilot cities and has introduced relaxed foreign exchange regulations in its free trade zones. This is an area that China is clearly prioritizing. If you've ever thought about expanding your business into China but hesitated, this is the book for you. There are plenty of cross border e-commerce options available without having to set up a branch office or hire a large group of local staff. It's a great solution for brands of all sizes. Here's an excerpt to give you a taste. China is a huge market with great potential. It's unique, sophisticated, hyper-competitive, and it's not easy to succeed. Despite the challenges, international brands of all kinds are eager to get access to over 1.4 billion Chinese consumers. If you've decided that it's time for your company to take its next big step, the good news is that it's not necessary to set up shop in China to sell your products there. E-commerce is a way of life in China, and by the end of 2019, e-commerce sales are forecast by some to expand 27.3% reaching 1.935 trillion USD. This represents 36.6% of total retail sales in the country. Cross border e-commerce can blur geographical borders, so we've created this mini-book to help marketers better understand major online sales channels for cross border e-commerce in 2019. You'll find out about key players to watch and major e-commerce shopping festivals. We'll dive into information that will empower you to take action and make wise decisions when it comes to your marketing budget. Social E-commerce and We Commerce. Whether it's traditional media opening their own online stores or e-commerce sites adding more editorial content and social features, both sides are coming closer together in the form of social e-commerce. It's happening everywhere, but it's a trend that's even more advanced in China. In the West, it's more common to use an e-commerce site as the final stop when completing a transaction, whereas in China, e-commerce sites are destinations where you can make new discoveries, acquire information, socialize with others who can make informed recommendations, and communicate with people who share your interests or concerns. Social commerce has become very popular in China because customer acquisition costs have increased significantly on traditional platforms like Alibaba and JD.com, so brands and platforms are looking for new ways to engage customers. It's estimated that by the end of 2022, 15% of all e-commerce in China will be social, and it will become a major force in online retail sales. As more e-commerce outlets start adding a social element to their business model, three general categories have emerged: 1. Content Sharing Platforms. The content sharing model is based on consumers' trust in other consumers' influencers, key opinion leaders (KOLs), and key opinion consumers (KOCs). Brands and retailers cooperate with them to create content that informs potential buyers about their products and attempts to guide their purchasing decisions. KOLs and trusted consumers give products credibility and desirability. KOCs are a role specific to China, and WeChat KOCs are personal accounts listed under someone's name but they're administered by

brand employees and WeChat users are aware of this arrangement These accounts publish information content marketing and many also do a wide range of customer relationship management tasks such as handling complaints making product orders handling returns issuing coupons promoting sales and more This role was developed as a workaround on the highly influential WeChat social media platform as it is built for person to person contact so this method is not only functional but also feels more personal and can deliver the immediate action that many Chinese consumers demand It also enables a low cost ad network as advertising rates on WeChat are very high

updated examples included in chapter Risks and disasters but also new chapters have been introduced such as the chapter Indetermination and risk This new chapter was developed since the question Is it possible for risks to be completely eliminated and if not why has become a major point of concern Therefore especially in this chapter the focus of the book has tended from a simple mathematical or engineering point of view to include much broader concepts Here not only aspects of system theory have to be considered but also some general philosophical questions start to influence the considerations of the topic of risk The main goal of this edition however is not only the extension and revision of the book but also the translation into the English language to allow more readers access to the ideas of the book The author deeply hopes that the success the book made in the German edition continues and that readers experience a major gain from reading the book **Revista**
