Wow! I'm 80! Samuel Solomon, 2019-05-23 When I reached my 80th birthday I was reminded of my thinking when I was in my late 30's and my father was 72. He proudly stated he was a member of SCORE Service Corps of Retired Executives and was helping local businesses. I had difficulty believing he was capable of helping others based on his advanced age. In retrospect I now realize he was almost 10 years younger than I am so I am documenting to share with others what someone in his 80's can do.

Business Intelligence Esteban Zimányi, 2014-03-20 To large organizations business intelligence (BI) promises the capability of collecting and analyzing internal and external data to generate knowledge and value, thus providing decision support at the strategic, tactical and operational levels. BI is now impacted by the Big Data phenomena and the evolution of society and users. In particular, BI applications must cope with additional heterogeneous, often Web-based sources, e.g. from social networks, blogs, competitors, suppliers or distributors' data, governmental or NGO based analysis and papers or from research publications. In addition, they must be able to provide their results also on mobile devices, taking into account location-based or time-based environmental data. The lectures held at the Third European Business Intelligence Summer School (eBISS) which are presented here in an extended and refined format cover not only established BI and BPM technologies but extend into innovative aspects that are important in this new environment and for novel applications, e.g. pattern and process mining, business semantics, Linked Open Data and large scale data management and analysis. Combining papers by leading researchers in the field, this volume equips the reader with the state-of-the-art background necessary for creating the future of BI. It also provides the reader with an excellent basis and many pointers for further research in this growing field.
