Frank, 2018-07-03 Why do the keypads on drive up cash machines have Braille dots Why are round trip fares from Orlando to Kansas City higher than those from Kansas City to Orlando For decades Robert Frank has been asking his economics students to pose and answer questions like these as a way of learning how economic principles operate in the real world which they do everywhere all the time Once you learn to think like an economist all kinds of puzzling observations start to make sense Drive up ATM keypads have Braille dots because it's cheaper to make the same machine for both drive up and walk up locations Travelers from Kansas City to Orlando pay less because they are usually price sensitive

tourists with many choices of destination whereas travelers originating from Orlando typically choose Kansas City for specific family or business reasons The Economic Naturalist employs basic economic principles to answer scores of intriguing questions from everyday life and along the way introduces key ideas such as the cost benefit principle the no cash on the table principle and the law of one price This is as delightful and painless a way to learn fundamental economics as there is
