Rethinking the Pedagogy of Sustainable Development in the AI Era Chinedu, Caleb Chiidozie,Mafarja,

Nofouz,Hussein, Mahmood H.,Saleem, Atif,2025-03-14 Artificial intelligence AI technologies can transform the teaching and learning of sustainable development AI driven innovative approaches can transform traditional educational practices and encourage experimentation with and development of novel strategies that harness AI s capabilities to enhance sustainability education By incorporating practical strategies for integrating AI into sustainability education across various contexts teachers may foster a new generation of learners equipped to contribute to a sustainable future Additionally the use of AI allows teachers to foster a culture of continuous improvement and creativity Rethinking the Pedagogy of Sustainable Development in the AI Era explores the transformative potential of artificial intelligence AI in the context of sustainable development education It examines how AI technologies can be leveraged to enhance the pedagogy of sustainability offering new methods tools and approaches to empower learners with the necessary skills and knowledge to address global sustainability challenges Covering topics such as circularity power systems and vocational pedagogy this book is an excellent resource for educators curriculum developers administrators policymakers sustainability practitioners professionals researchers scholars academicians and more

The 21st Century Brain Richard Restak,2025-11-18 Discover the Influences of Social Media Artificial Intelligence AI Climate Change Stress and More on Our Brains and Behavior Unique to the Twenty first Century During the past twenty five years we ve encountered powerful influences for good and bad on brain function

and even brain structure Consider the changes that have already taken place in how we communicate During the last half of the twentieth century images displaced words as the common parlance of communication On the nightly news we've become accustomed to watching images drawn from video cameras used by law enforcement and thanks to a proliferating number of cellphones everyday use Yet AI is turning the traditional dynamic that images carry more weight than words seeing is believing upside down because we now have to question the authenticity of images We are finding ourselves forced to adjust to a world where what we see is not always what's really happening Next consider the effects of our changing environment on our brains and our behavior There is good reason to believe that a link exists between an increase in global temperature and suicide Wildfires becoming more and more common thanks to climate change affect air quality which is often undetectable by the average person until it reaches toxic levels Studies have proven that wildfire smoke is affecting our brains and potentially causing disease Perhaps the greatest twenty first century contributor to changes in brain function is stress Due to many factors explored in the book it's likely that levels of mental and emotional instability are on the horizon that can only be fully understood by focusing on the changes in the human brain brought about by these unparalleled levels of stress The brain is always evolving The 21st Century Brain will describe those influences on brain and behavior that are unique to this century as well as available preventive measures to mitigate some of these factors This book is a quintessential study on how our brains are uniquely changing in the twenty first century as well as a guide to the personal and collective measures that can be taken to eliminate these factors or reduce their impact

Contemporary Business Louis E. Boone, David L. Kurtz, Daniel Pfaltzgraf, 2024-08-14 Student friendly engaging and accessible *Contemporary Business 20e* equips students with the skills to assess and solve today's global business challenges and succeed in a fast-paced environment Designed to drive interest in business our newest edition offers a comprehensive approach to the material including a variety of resources to support today's students Its modern approach wealth of videos relevant and up-to-date content and career readiness resources keep your course current and engaging Leadership 2.0 in processes of a sustainable change Prof. Dr. Michael Kurwan, 2025-06-30 Document from the year 2025 in the subject Leadership and Human Resources Leadership language English abstract In order to successfully implement sustainable changes in a company in the context of change processes strong leadership is required at the top of a company which should have a great deal of empathy and a sure instinct in order to position the company in the market in the long term and profitably In order to successfully shape these sustainable changes it will not be the famous power of the leader of the past but will only work with the involvement of employees in the new world of work in the knowledge age which is characterized by digitalization and artificial intelligence This new form of leadership is also referred to as Leadership 2.0 in which it is important to retain top performers and in particular key personnel in the company in the long term which is a very challenging leadership task in HR management In change processes a fundamental distinction must be made between incremental change management and radical change management While incremental change takes place continuously and is integrated into everyday working life radical change represents a strategic realignment of the company which is largely associated with staff reductions and is intended to change the corporate culture This is particularly true in the case of restructuring where cost-cutting programs play a decisive role in ensuring the long-term survival of the company Employees are more willing to go along with incremental change also known as continuous improvement than radical change as they could also be affected by staff cuts This fuels employees' fears and therefore often leads to high staff turnover *ChatGPT Prompts — How You Can "Travel" the World for FREE with AI: Model Comparison (ChatGPT, Gemini "Nano Banana",*
