frequently use multiplication in our daily lives too Just like learning to walk before you can run learning multiplication and familiarizing yourself with numbers are building blocks for other math topics taught in school such as division long multiplication fractions and algebra Mastering the basic math facts develops automaticity in kids Automaticity is the ability to do things without occupying the mind with the low level details that are required this is usually the result of consistent learning repetition and practice For instance an experienced cyclist does not have to concentrate on turning the pedals balancing and holding on to the handlebars Instead those processes are automatic and the cyclist can concentrate on watching the road the traffic and other surroundings Until students have developed sufficient sensory cognitive tools supporting access to symbolic memory they will not be able to image store or retrieve all of the basic facts with automaticity Therefore students need a comprehensive developmental and multi sensory structured system for developing automaticity with the facts
