change processes a fundamental distinction must be made between incremental change management and radical change management. While incremental change takes place continuously and is integrated into everyday working life, radical change represents a strategic realignment of the company which is largely associated with staff reductions and is intended to change the corporate culture. This is particularly true in the case of restructuring where cost cutting programs play a decisive role in ensuring the long term survival of the company. Employees are more willing to go along with incremental change also known as continuous improvement than radical change as they could also be affected by staff cuts. This fuels employees' fears and therefore often leads to high staff turnover.
