Global University Rankings and the Mediatization of Higher Education Michelle Stack, 2016-04-12 Higher Education Institutions simultaneously critique and participate in national and international rankings of universities However this creates a difficult situation since if universities do participate in rankings they acquiesce to a system based in media logics that has little to do with academic norms of research If they do not participate in the rankings they risk losing public funding students and donors in an increasingly competitive and globalized environment This book delves into the influence of journalists business tycoons and multinational corporations in defining what world class is and how it will be measured Rankings provide us with a rich study for understanding how universities define deploy and manage their assets and liabilities in a mediatized globalized economy

Breaking Ranks Colin Diver, 2022-04-12 Some colleges will do anything to improve their national ranking That can be bad for their students and for higher education Since U S News World Report first published a college ranking in 1983 the rankings industry has become a self appointed judge declaring winners and losers among America s colleges and universities In this revealing account Colin Diver shows how popular rankings have induced college applicants to focus solely on pedigree and prestige while tempting educators to sacrifice academic integrity for short term competitive advantage By forcing colleges into standardized best college hierarchies he argues rankings have threatened the institutional diversity intellectual rigor and social mobility that is the genius of American higher education As a former university administrator who refused to play the game Diver leads his readers on an engaging journey through the mysteries of college rankings admissions financial aid spending policies and academic practices He explains how most dominant college rankings perpetuate views of higher education as a purely consumer good susceptible to unidimensional measures of brand value and prestige Many rankings he asserts also undermine the moral authority of higher education by encouraging various forms of distorted behavior misrepresentation and outright cheating by ranked institutions The recent Varsity Blues admissions scandal for example happened in part because affluent parents wanted to get their children into elite schools by any means necessary Explaining what is most useful and important in evaluating colleges Diver offers both college applicants and educators a guide to pursuing their highest academic goals freed from the siren song of the best college illusion Ultimately he reveals how to break ranks with a rankings industry that misleads its consumers undermines academic values and perpetuates social inequality
