Apple Jay served as Steve's right hand man and trouble shooter overseeing all corporate operations and business planning as well as software development and HR. In *Leading Apple with Steve Jobs* Jay details how Steve managed and motivated his people and what every manager can learn from Jobs about motivating people to do the best work of their lives. Steve Jobs used the phrase *Pirates Not the Navy* as a rallying cry, a metaphor to *Think Different*. In the days of developing the Macintosh it became a four word mission statement. It expresses the heart of Apple and Steve. The management principles that grew out of that statement form the backbone of this book. Explains how to find talented people who will understand your objectives and be able to make a contribution to that effort. Lists traits that can determine whether a person will be so committed to the vision that they will provide their own motivation. Explains how to ensure that your employees hold an allegiance to the captain and to his/her shipmates and also possess the ability to come up with original, unique ways to approach a problem and be self-guided with a strong sense of direction. *Leading Apple with Steve Jobs* will shift your thought paradigm and inspire you to assemble and lead innovative teams.

Teaching, Learning & Assessing Science
5-12 Wynne Harlen,2000 The book is a practical work emphasizing the nuts and bolts of how to plan and deliver the curriculum in the classroom as well as assessing the learning outcomes It also looks at the pros and cons of the different types of teaching resources The book is good for curriculum planning for NQT s and experienced teachers alike

Environmental Education Wynne Harlen is an acknowledged authority in the United Kingdom on science education for children from five 12 years often referred to as the primary school phase This book is the product of a lifetime of dedicated work in this area Its success is indicated by the fact that it is a further edition of a book already accepted by the teaching community as one that addresses some of their immediate and most basic concerns For those who are familiar with the previous edition it may be helpful for readers to know that this latest one provides an update on thinking about the practice of primary school science particularly in the light of the considerable developments that have taken place in the last 4 years Science educators in particular will find this makes a valuable contribution to their professional development and environmental concerns are not neglected in the process

Environmental Education Research Teaching Learning Assessing Science 5 12 is a new and totally revised edition of Teaching and Learning Primary Science The author provides a theoretical rationale for why science should be taught in particular ways and ideas and examples of how to do it The opening chapters show how children learn and discuss the nature of the goals of teaching science to children aged from five to 12 years It is teachers understanding of these things that determines the kind of learning experiences they provide for children Evidence is given to support a constructivist view a view of learning which recognizes that children already have ideas about the world around them formed from their everyday experiences and everyday ways of thinking The teacher s role is to help children to build their understanding and change their ideas towards the more scientific view In science this means through inquiry which involves first hand investigation of materials the use of books and other resources and discussion Several chapters describe and illustrate aspects of the teacher s role in bringing about this learning including planning and providing learning resources
