Answering over Streaming and Distributed Data Shima Zahmatkesh, Emanuele Della Valle, 2020-01-21 This book examines the problem of relevant query answering over the Web and provides a comprehensive overview of relevant query answering over streaming and distributed data In recent years Web applications that combine highly dynamic data streams with data distributed over the Web to provide relevant answers have attracted increasing attention Answering in a timely fashion i e reactively is one of the most important performance indicators especially when the distributed data is evolving The book proposes a solution that retains a local replica of the distributed data and offers various maintenance policies to refresh the replica over time A limited refresh budget guarantees the reactivity of the system Focusing on stream processing and Semantic Web it appeals to scientists and graduate students in the field Sound Streams Andrew J Bottomley, 2020-06-01 In talking about contemporary media we often use a language of newness applying words like revolution and disruption Yet the emergence of new sound media technologies and content from the earliest internet radio broadcasts to the development of algorithmic music services and the origins of podcasting are not a disruption but a continuation of the century long history of radio Today s most innovative media makers are reintroducing forms of audio storytelling from radio s past Sound Streams is the first book to historicize radio internet convergence from the early 90s through the present demonstrating how so called new media represent an evolutionary shift that is nevertheless historically

consistent with earlier modes of broadcasting Various iterations of internet radio from streaming audio to podcasting are all new radio practices rather than each being a separate new medium radio is any sound media that is purposefully crafted to be heard by an audience Rather than a particular set of technologies or textual conventions web based broadcasting combines unique practices and features and ideas from radio history In addition there exists a distinctive conversationality and reflexivity to radio talk including a propensity for personal stories and emotional disclosure that suits networked digital media culture What media convergence has done is extend and intensify radio's logics of connectivity and sharing sonically mediated personal expression intended for public consideration abounds in online media networks Sound Streams marks a significant contribution to digital media and internet studies Its mix of cultural history industry research and genre and formal analysis especially of contemporary audio storytelling will appeal to media scholars radio and podcast practitioners audio journalism students and dedicated podcast fans Great Ideas Student's Book Leo Jones,Victoria
