traditionally been studied individually examining the communication opportunities Shakespeare's work can offer for a range of marginalized people. It draws on a diverse range of projects from across the globe many of which the author has facilitated or been directly involved with including those with incarcerated people, people with mental health issues, learning disabilities and who have experienced homelessness. As this book evidences, Shakespeare can be used to alter the spatial constraints of people who feel imprisoned, whether literally or metaphorically, enabling them to speak and to be heard in ways which may previously have been elusive or unattainable. The book examines the use of trauma-informed principles to explore the ways in which consistency, longevity, trust and collaboration enable the development of resilience, positive autonomy and communication skills. It explores this phenomenon of creating space for people to find their own way of expressing themselves in a way that mainstream society can understand whilst also challenging society to see better and to hear better. This is not a process of social homogenisation but of encouraging positive interactions and removing the stigma of marginalization.
