Tannock,2012-12-06 Quality is a topical issue in manufacturing Competitive quality performance still eludes many manufacturers in the traditional industrialized countries A lack of quality competitiveness is one of the root causes of the relative industrial decline and consequent trade imbalances which plague some Western economies Many explanations are advanced for poor quality performance Inadequate levels of investment in advanced technology together with insufficient education and training of the workforce are perhaps the most prominent Some believe these problems are caused by a lack of awareness and commitment from top management while others point to differences between industrial cultures The established remedy is known as Total Quality Management TQM TQM requires a corporate culture change driven from the top and involving every employee in a process of never ending quality improvement aimed at internal as well as external customers The techniques deployed to achieve TQM include measures to improve motivation training in problem solving and statistical process control SPC Quality is however only one of the competitive pressures placed It is also upon the manufacturer by the modern global economy imperative to remain economical and efficient while increasing the flexibility and responsiveness of the design and manufacturing functions Here the reduction or elimination of stock is of great importance particularly as financial interest rates in the less successful manufacturing nations are frequently high Product life cycles must become ever more compressed in response to the phenomenal design to manufacture performance of some Pacific rim economies Live Looping in Musical Performance Alexsander Duarte,Susana Sardo,2023-08-23 Live Looping in Musical Performance offers a diverse range of interdisciplinary perspectives on the application of live looping technology by lusophone performers and composers This book explores various aspects including the aesthetic component instrumentation and setup highlighting the versatility of this technology in music making Written by musicians and researchers from Portuguese speaking countries this book comprises eleven chapters that delve into various musical contexts genres and practices The novelty of including collaborative texts written alongside non professional researchers offers the possibility of

drawing from real experience to consider how live looping has been changing and cyborguising the concept of music the ritual of the performance the identity of the musicians and the public's expectations Live Looping in Musical Performance provides cutting edge reading for composers and performers as well as ethnomusicologists students and researchers working in the areas of music production technology and performance This book addresses a broader audience both academic and non academic who are interested in new processes of musical creativity in a post human world *Body, Sound and Space in Music and Beyond: Multimodal Explorations* Clemens Wöllner, 2017-04-07 Body and space refer to vital and interrelated dimensions in the experience of sounds and music Sounds have an overwhelming impact on feelings of bodily presence and inform us about the space we experience Even in situations where visual information is artificial or blurred such as in virtual environments or certain genres of film and computer games sounds may shape our perceptions and lead to surprising new experiences This book discusses recent developments in a range of interdisciplinary fields taking into account the rapidly changing ways of experiencing sounds and music the consequences for how we engage with sonic events in daily life and the technological advancements that offer insights into state of the art methods and future perspectives Topics range from the pleasures of being locked into the beat of the music perception action coupling and bodily resonance and affordances of musical instruments to neural processing and cross modal experiences of space and pitch Applications of these findings are discussed for movement sonification room acoustics networked performance and for the spatial coordination of movements in dance computer gaming and interactive artistic installations *Designing Digital Musical Instruments Using Probatio* Filipe Calegario, 2018-12-24 The author presents Probatio a toolkit for building functional DMI digital musical instruments prototypes artifacts in which gestural control and sound production are physically decoupled but digitally mapped He uses the concept of instrumental inheritance the application of gestural and or structural components of existing instruments to generate ideas for new instruments To support analysis and combination he then leverages a traditional design method the morphological chart in which existing artifacts are split into parts presented in a visual form and then recombined to produce new ideas And finally he integrates the concept and the method in a concrete object a physical prototyping toolkit for building functional DMI prototypes Probatio The author's evaluation of this modular system shows it reduces the time required to develop functional prototypes The book is useful for researchers practitioners and graduate students in the areas of musical creativity and human computer interaction in particular those engaged in generating communicating and testing ideas in complex design spaces *New Directions in Music and Human-Computer Interaction* Simon Holland, Tom Mudd, Katie Wilkie-McKenna, Andrew McPherson, Marcelo M.
