Artefacts, Archives, and Documentation in the Relational Museum Mike Jones, 2021-07-14 Artefacts Archives and Documentation in the Relational Museum provides the first interdisciplinary study of the digital documentation of artefacts and archives in contemporary museums while also exploring the implications of polyphonic relational thinking on collections documentation Drawing on case studies from Australia the United Kingdom and the United States the book provides a critical examination of the history of collections management and documentation since the introduction of computers to museums in the 1960s demonstrating how technology has contributed to the disconnection of distributed collections knowledge Jones also highlights how separate documentation systems have developed managed by distinct increasingly professionalised staff impacting our ability to understand and use what we find in museums and their ever expanding online collections Exploring this legacy allows us to rethink current practice focusing less on individual objects and more on the rich stories and interconnected resources that lie at the heart of the contemporary plural participatory relational museum Artefacts Archives and Documentation in the Relational Museum is essential reading for those who wish to better understand the institutional silos found in museums and the changes required to make museum knowledge more accessible The book is a particularly important addition to the fields of museum studies archival science information management and the history of cultural heritage technologies

The Politics of Gun Control Robert J. Spitzer, 2025-08-28 Since its initial publication in 1995 this book has become the classic work on every important element of the tumultuous national gun debate in America This new edition brings together the latest developments and research in gun politics policy law history and criminology to provide a comprehensive and accessible source widely used by scholars journalists and in classrooms In this era of polarized politics this book provides a unique window into how and why that polarization drives our politics Among the new topics covered in this edition are the Supreme Court's new foray into applying history to evaluate modern gun laws the effects of political whipsawing between Democratic and Republican control of government and the consequences of that for gun laws violence and policy New to the Tenth Edition Analysis of the Supreme Court's *Rahimi* decision that for the first time implemented its controversial history based standard for judging the constitutionality of current gun laws Highlights the whiplash between the pro gun policy actions of the Biden administration and the second Trump administration's about face to roll back those initiatives Chronicles the rise and nearly cataclysmic implosion of the once vaunted National Rifle Association as self created problems brought it to the brink of disaster and as legal actions against the NRA finally came to an end Elucidates the scramble of other gun rights groups to replace the NRA as the nation's foremost anti gun law organization Presents new and updated statistical research on gun ownership in America gun related fatalities public opinion support of red flag laws and other gun control measures After a surge in gun

violence and gun ownership both have receded to pre pandemic levels and the murder rate continues its decline after a short upsurge Includes new pedagogical features of chapter summaries and discussion questions in each chapter **Law and Justice around the World** Mikaila Mariel Lemonik Arthur,2020-02-25 Law and Justice around the World is designed to introduce students to comparative law and justice including cross national variations in legal and justice systems as well as global and international justice The book draws students into critical discussions of justice around the world today by taking a broad perspective on law and justice rather than limiting its focus to criminal justice systems examining topics of global concern including governance elections environmental regulations migration and refugee status family law and others focusing on a diverse set of global examples from Europe North America East Asia and especially the global south and comparing the United States law and justice system to these other nations continuing to cover core topics such as crime law enforcement criminal courts and punishment including chapter goals to define learning outcomes sharing case studies to help students apply concepts to real life issues Instructor resources include discussion questions suggested readings films and web resources a test bank and chapter by chapter PowerPoint slides with full color maps and graphics By widening the comparative lens to include nations that are often completely ignored in research and teaching the book paints a more realistic portrait of the different ways in which countries define and pursue justice in a globalized interconnected world
