Technical Services in the 21st Century Samantha Schmehl Hines, 2021-01-08 By showcasing the work of technical services and the ground breaking changes they have encountered this edited collection provides readers with an opportunity to re assess the opportunities and challenges for library administration and to understand how libraries should be managed in the future *Designing Assessment for Quality Learning* Claire Wyatt-Smith, Valentina Klenowski, Peta Colbert, 2014-03-10 This book brings together internationally recognised scholars with an interest in how to use the power of assessment to improve student learning and to engage with accountability priorities at both national and global levels It includes distinguished writers who have worked together for some two decades to shift the assessment paradigm from a dominant focus on assessment as measurement towards assessment as central to efforts to improve learning These writers have worked with the teaching profession and in so doing have researched and generated key insights into different ways of understanding assessment and its relationship to learning The volume contributes to the theorising of assessment in contexts characterised by heightened accountability requirements and constant change The book s structure and content reflect already significant and growing international interest in assessment as contextualised practice as well as theories of learning and teaching that underpin and drive particular assessment approaches Learning theories and practices assessment literacies teachers responsibilities in assessment the role of leadership and assessment futures are the organisers within the book s structure and content The contributors to this book have in common the view that quality assessment and quality learning and teaching are integrally related Another shared view is that the alignment of assessment with curriculum teaching and learning is linchpin to efforts to improve both learning opportunities and outcomes for all Essentially the book presents new perspectives on the enabling power of assessment In so doing the writers recognise that validity and reliability the traditional canons of assessment remain foundational and therefore necessary However they are not of themselves sufficient for quality education The book argues that assessment needs to be radically reconsidered in the context of unprecedented societal change Increasingly communities are segregating more by wealth with clear signs of social political economic and environmental instability These changes raise important issues relating to ethics and equity taken to be core dimensions in enabling the power of assessment to contribute to quality learning for all This book offers readers new knowledge about how assessment can be used to re engage learners across all phases of education Foundations of Library and Information Science Richard E. Rubin, Rachel G. Rubin, 2020-09-14 In its newest edition *Foundations of Library and Information Science* remains the field s essential resource *Partnerships and New Roles in the 21st-Century Academic Library* Bradford Lee Eden, 2015-09-18 The fifth volume in this series focuses on creating partnerships and developing new roles for libraries in the 21st century It includes such topics such as consulting coaching assessment and engagement partnerships university commercialization adult student support librarian faculty partnerships in developing and supporting

new academic courses and creating and staffing the information commons The concept of embedded librarianship is touched upon in the context of extending the role of the librarian outside the library The chapters in this volume demonstrate that just as students are extending the ways in which they learn librarians must embrace new roles and modalities if they are to provide the types of support required by patrons A typical example of growing importance massive open online courses MOOCs create challenges and opportunities as they are constantly evolving they change fundamentally the way students interact with teachers their fellow students any course content and existing or new library services To survive librarians need to be engaged in ways that push beyond current professional limits in order to better support the needs of learners Doing this will not be an easy task but one that librarians are certainly up to It is hoped that this volume and the series in general will be a valuable and exciting addition to the discussions and planning surrounding the future directions services and careers in the 21st century academic library

web jul 1 2020 by combining isotropic damage elasticity and isotropic tensile and compressive plasticity it can model nonlinear deformation and irreversible damage in plain concrete materials applied to different types of structures under different load conditions 15 22 23 inspired by this approach many researchers investigated the failures of concrete
